REVIEW OF KINETIX SAFE TORQUE OFF FEATURE ROCKWELL AUTOMATION

- I've probably read this book six times over the course of my life, first when I was thirteen. I still enjoy it as an adult. It's a great present for sixth grade birthdays. The story takes you from a regular boy in high school wishing he could go to the moon and leads you much further, further out, one step at a time. He wins a spacesuit, and that 's how his space travel and encounters with aliens begins. Laura

- Kip Russell tells his story. One minute, he's playing in the backyard of his house with an old space suit named Oscar, and a friend named Ellie, the next thing he knows, he's abducted by aliens who take him to the moon. Blair Colquhoun @cybertours.com
