REVIEW OF ANIMATION WALT DISNEY ANIMATION STUDIOS THE ARCHIVE SERIES

- This is one of those feel good stories. I'm not one of those to tell you practically the whole story to spoil it but I will tell you it was great book and I didn't want it to end!!! On Mystic Lake and Between Sisters are other great books by Hannah!!!
- Andrew Chaikin is best known for his classic book "A Man on the Moon" which describes the Apollo missions to the moon and was basis for the equally

classic HBO series "From the Earth to the Moon." In his latest offering, Andrew Chaikin presents the history of space exploration from the early space pioneers, through the space race, to the latest space shuttle missions to the International Space Station (ISS) using numerous high quality, large format photographs and a very small amount of introductory text for each chapter. I feel that this book will be another one of his classic space exploration books. The book opens with a small discussion of the early space pioneers such as Wernher von Braun, Sergei Korolev and Robert Goddard, and their efforts to develop workable rockets. The book then moves into the dawn of the space age and the race between Russia and the United States to achieve various "firsts." For

example, the first satellite, the first probe to the moon or another planet and of course the first country to put a man into space. After this portion of the book, the Mercury, Gemini, Vostok, Voskhod and early Apollo programs are examined. The next section is devoted to NASA's exploration of the moon and contains many full page photographs. To further emphasize the grandeur of these missions of exploration, there are several two page foldouts. The next chapter of the book covers the early robotic exploration of the solar system, up to and including the Viking and Voyager missions. The next portion of the book examines the space shuttle era. It is here that I feel that the book should have included more. While the space shuttle has been flying for over

twenty years, there is less than twenty pages of shuttle related photographs. The book concludes with the current robotic exploration of the solar system, some really excellent photographs from the Hubble Space Telescope and the construction of the International Space Station. I only have two minor criticisms about the book. First, most of the photographs are devoted to the space

race up to the Apollo moon landings, with very little dedicated to the Space Shuttle and International Space Station projects. Secondly, many of the photographs are ones that have been published before so there is very little new here. Nevertheless, these two very minor complaints, are overshadowed by the splendor of the numerous high quality photographs in this book.
