REVIEW OF CHRISTIAN LOUBOUTIN

- I got this book only last week, and I'm already experimenting with the techniques explained in it. A major positive effect is that one becomes very focused on running form, proper breathing and relaxation. "ChiRunning" basically involves running with a forward lean, letting gravity pull you forward (as the author describes it). Instead of lifting the knees, you should keep them low and lift your heels instead. Landing should be done on midfoot, and not on the heels. When running this way, you almost get the feeling of falling, which is how it's meant to work! Granted, it's a slightly unorthodox method, but I am willing to give it a try. Danny Dreyer claims that this is a more effective (less effort-demanding) way of running and that it makes you less prone to injuries,

compared to what he calls the "Power Running paradigm" (the "no pain, no gain" mindset; developing muscle power to do the work). These claims aren't quite substantiated in the book, at least not scientifically, but many of the underlying principles (keeping relaxed, listening to your body, gradual progress) are quite sound. Despite the author's constant use of "chi" (which is a somewhat controversial and elusive concept), he manages to avoid becoming completely new age-y - there are lots of highly practical tips throughout the book, from exercises to loosen up tense muscles and ligaments, to a couple of creative ways to ensure that your shoelaces don't come untied! I have to admit though, that the chapter on diet had me giggling a little. "Getting the most chi from your food"? But even here, the actual advice given seems sensible: Eat lots of fruit, vegetables and grains, eat meat, fish and eggs regularly but sparingly, etc. Honestly, I'd rather go with the "High Chi" diet than the ridiculous low-carb fad suggested by Atkins and his followers! ChiRunning is a nice book to add to your library of running books, even if you don't intend to change your running style as drastically as it asks you to. It's a welcome change of tone if you've been reading sundry training books full of training schedules and pace charts. If you desperately want to break 35 minutes for the 10K or 3 hours for the maraton, you'll get a much needed reminder from Danny Dreyer to put less emphasis on externally motivated goals. Instead he tells you to "let your goals be an expression of who you are". That sentence alone made the book a worthwhile read for me.

- This is a great book. I highly recommend it to anyone who wants to run or already loves running.
