This book offers an overview of the legal, political, and broad intergovernmental environment in which relations between local and state units of government take place, the historical roots of the conflict among them, and an analysis of contemporary problems concerning local authority, local revenues, state interventions and takeovers, and the restructuring of local governments. The author pays special attention to local governmental autonomy and the goals and activities of local officials as they seek to secure resources, fend off regulations and interventions, and fight for survival as independent units. He looks at the intergovernmental struggle

from the bottom up, but in the process examines a variety of political activities at the state level and the development and effects of several state policies. Berman finds considerable reason to be concerned about the viability and future of meaningful local government.

Providing a safe driving environment and implementing safety improvements at the local level can pose significant challenges for municipal governments. Similar to challenges faced by federal and state agencies, financial and personnel limitation can make it difficult for local agencies to develop and implement safety initiatives. Information

is available to help local governments identify options and develop action plans for implementing safety measures. The purpose of this Traffic Safety Toolbox is to provide a resource of information for municipal practitioners. Specifically, the series of fact sheets provide guidance and information regarding selected traffic safety and engineering topics. These fact sheets provide information about valuable resources, including links to web pages as applicable. The fact sheets are presented in this Final Report and are available online at [www.mass.gov/mhd/safetytoolbox](http://www.mass.gov/mhd/safetytoolbox).

The survey findings also highlight the barriers that local governments face in promoting economic development and identify important technical assistance needs and gaps in local capacity.

## SUPPORTING PERSONALITIES IN CHALLENGES FACED BY MUNICIPAL GOVERNMENTS

The Future of the Public's Health in the 21st Century John Wiley & Sons

Over the last decade, world attention has begun to focus on the environmental problem of climate change. Despite

ongoing international negotiations discussing emission reduction opportunities, local government level of action is where success is being achieved. In Canada, municipal government has direct or indirect control over 52.2% of domestic greenhouse gas emissions. Yet despite this control, in 1998, only 53 of over 4000 municipalities were known to have emission reductions efforts in place. While municipal government in Canada has the potential to make a significant contribution toward helping Canada meet its commitment to the Kyoto Target, municipal potential remains unrealized. However, no comprehensive investigation into Canadian municipal response to climate change had ever been completed. This research

represents the first comprehensive examination of Canadian municipal response to climate change. Through a survey of staff at all Canadian municipal governments with populations greater than 10,000 people and using the data collected from the 236 municipal governments that responded to the survey (of a total of 393, a response rate of 60.3%), the extent to which municipal government has responded to climate change is determined and the potential role that information, political priority and capacity barriers play in preventing response is evaluated according to a framework for understanding barriers. The framework presented here contributes to advancing our understanding of the challenges faced by local government in responding to a

global environmental issue. The barriers identified through this research suggest that local government capacity and interest in addressing environmental issues is compromised by factors central to issues of governance and the relationship between local government and higher levels of government. These barriers are then considered in light of future action that could lead to widespread municipal response to climate change in Canada. Recommendations for new research are developed and a number of policy and program recommendations for future action are offered.

This volume provides a unique insight into the ways local governments have

maintained financial resilience in the face of the significant challenges posed by the era of austerity. Taking an international perspective, it provides an enlightening and practical analysis of the different capacities and responses that local governments deploy to cope with financial shocks. Moving beyond traditional approaches dealing with financial stress, the financial resilience perspective reveals a wider range of organisational responses and enables consideration of the dynamic role played by internal and external contextual factors. The international case study approach allows for a comparative analysis of financial resilience in the context of different administrative and policy environments. By providing a unifying view of financial resilience, the

importance of building resilience into organisational financial management is demonstrated, uncovering the relative effectiveness of different resilience building approaches. This edited volume is a valuable source for practitioners and academics, as well as students of public policy, public management and financial management.

After over a decade of administrative and economic reform in mainland China, the center has become increasingly remote and less important for many localities. In many ways, the mobilization capacity of the central government has been weakened. Central government policies are often ignored and local officials are often more interested in

personal projects than in centrally directed economic plans. In this study of local government and politics in China, the author explores when and why local government officials comply with policy directives from above. Drawing on interviews with government officials in various municipalities and a review of county records and other government documents, he provides the first in-depth look at policy implementation at the county and township levels in the PRC. The book examines the impact of the Chinese cadre system on the behavior of local officials, local party and government structure, relationships among various levels of Chinese local government, policy supervision mechanisms at local levels, village governance of China, and more.

Budgeting for Local Governments and Communities is designed as the primary textbook for a quarter or semester-long course in public budgeting and finance in an MPA programme. Many currently available texts for this course suffer from a combination of defects that include a focus on federal and state budgeting, a lack of a theoretical governance framework, an omission of important topics, and typically a lack of exercises and datasets for student use. Budgeting for Local Governments and Communities

solves all of these problems. The book is exceptionally comprehensive and well written, and represents the efforts of veteran authors with both teaching and real-world experience. Key Features: Special Focus on Local Government Budgeting: focuses exclusively on budgeting at the local levels of American government, which are responsible for spending 40 percent of the taxes collected from citizens. Integration of Theory and Practice: teaching cases and chapters capture the "lessons learned" by professional practitioners who have extensive experience in making local public budgeting work on the ground. Polity Approach to Local Budgeting: presents an introduction to local budgeting as the central political activity that integrates the resources of the

community into a unified whole. Budgeting is presented as governance work, rather than as a unique set of skills possessed by analysts and financial specialists. Legal, Historical, Economic and Moral Foundations of Local Government Budgeting: provides readers with an understanding of how the structures and processes of local budgeting systems are firmly tethered to the underlying core values, legal principles and historical development of the larger American federal, state and local political systems. Electronic Datasets and Budgeting Exercises: the text includes access to extensive electronic datasets and practice exercises that provide abundant opportunities for students to "learn through doing." Extensive Glossary and

Bibliography: covers terms on the history and practice of local public budgeting.

Over the next 20 years, most low-income countries will, for the first time, become more urban than rural. Understanding demographic trends in the cities of the developing world is critical to those countries - their societies, economies, and environments. The benefits from urbanization cannot be overlooked, but the speed and sheer scale of this transformation presents many challenges. In this uniquely thorough and authoritative volume, 16 of the world's leading scholars on urban

population and development have worked together to produce the most comprehensive and detailed analysis of the changes taking place in cities and their implications and impacts. They focus on population dynamics, social and economic differentiation, fertility and reproductive health, mortality and morbidity, labor force, and urban governance. As many national governments decentralize and devolve their functions, the nature of urban management and governance is undergoing fundamental transformation, with programs in poverty alleviation, health, education, and public services increasingly being deposited in the hands of untested municipal and regional governments. *Cities Transformed* identifies a new class of

policy maker emerging to take up the growing responsibilities. Drawing from a wide variety of data sources, many of them previously inaccessible, this essential text will become the benchmark for all involved in city-level research, policy, planning, and investment decisions. The National Research Council is a private, non-profit institution based in Washington, DC, providing services to the US government, the public, and the scientific and engineering communities. The editors are members of the Council's Panel on Urban Population Dynamics.

Drawing on classical and emerging research perspectives, this

comprehensive book provides an up-to-date review of local government in Europe. Featuring an impressive range of contributors from both eastern and western Europe, the book addresses three main topics: territorial reforms, democratic empowerment of citizens and the role of local leadership, as well as new trends in local finances. Acknowledging their inherent diversity, the book examines the ways that local governments have responded to shared challenges, such as climate change, increasing populism and democratic deficit in order to identify both the variety and communalities between the country-specific features. In doing so, it provides a rich picture of the latest trends in local government, as well as pointing the way for future

developments.

The Routledge Handbook of International Local Government conducts a rigorous, innovative and distinctive analysis of local government within a comparative, international context. Examining the subject matter with unrivalled breadth and depth, this handbook shows how different cultures and countries develop different institutions, structures and processes over time, yet that all have some features in common - the most obvious of which is the recognition that some decisions are better made, some services better delivered, and some engagement with the state better organised if there is structured organisational expression of the

importance of the local dimension of all these factors . Thematically organised, it includes contributions from international experts with reference to the wider context in terms of geographies, local government modes, recent developments and possible further lines of research. It has a wide academic appeal internationally and will steer a course between the two dimensions of mono-jurisdictional studies and 'cataloguing' forms of comparison. The Routledge Handbook of International Local Government will be essential reading and an authoritative reference for scholars, students, researchers and practitioners involved in, and actively concerned about, research on local government.

## **REVIEW OF CHALLENGES FACED BY MUNICIPAL GOVERNMENTS**

- (WARNING - SPOILERS!!!)The question mark refers to the word "misunderstood", not to the word

"masterpiece". I don't think there is much question that "Uncle Silas" is a masterpiece. According to E. F. Bleiler, an expert on the genre, it is the greatest mystery novel of the 19th century, one of only a handful of 19th century novels that are still read purely for pleasure today. But I do think that it has been widely misunderstood. The virtually unanimous opinion on "Uncle Silas" is that it has a wonderfully Gothic and ghostly atmosphere, but no actual ghosts. I beg to differ - I think that the supernatural absolutely pervades the book in a very fundamental way. True, LeFanu never makes the supernaturalism explicit - he leaves you free to interpret the events in the novel naturalistically if you want to. But it seems clear to me that he himself had quite a different idea of what "Uncle Silas" is really all about. For instance, there is all the talk of the Swedenborgians in the first third of the novel, to the effect that we are continually surrounded and being watched by invisible presences - the souls of the dead, as well as angelic and demonic forces. LeFanu spends many pages on this sort of thing, and it is all quite pointless (except as atmosphere) if it does not directly relate to the plot in some way. The father of the heroine (Maud), Austin Ruthyn, is himself a Swedenborgian. I believe it is LeFanu's intention to suggest that, although Austin Ruthyn dies early in the book, his spirit continues to be an active force for good, protecting his daughter from the evil forces he has unwittingly subjected

her to (through an ill-considered will), and possibly being instrumental in the ultimate destruction of those very forces. For example, at one point Maud hears a disembodied, unidentified voice in an empty room warning her against Uncle Silas. Another time, she enters some kind of trance state and awakens talking to her dead father, whom she seems convinced is present. Near the end of the book, in another strange trance state - indeed, seemingly possessed - she utters words of doom to her two main persecutors, Madame de la Rougierre and Uncle Silas himself, using the very words that had been spoken to her by her father in a dream. Silas' reaction to Maud's appearance in this scene is instructive. He asks her, in a terrified whisper: "Where do you come from?" - a

very odd question to ask his niece, who is living in his own house. The entranced Maud whispers in response: "Death! Death!" Regarding Maud's two evil persecutors, there are numerous strong hints that they are actually demons in human form, or humans possessed by demonic forces. Maud describes Madame as "ghostly", "like an evil spirit in a dream", and has a supernatural dread of her. Indeed, Madame's movements about the house mysteriously mimic the sights and sounds of two of the house's legendary ghosts. Madame even sings a song at one point explicitly comparing herself to one of the demons that possessed the swine in Mark's gospel. As for Uncle Silas, one of the main (good) characters says of him: "Perhaps other souls than

human are sometimes born into the world, and clothed in flesh." By the end of the book, I think that every reader will agree that this description suits Silas very well. There are other examples of the supernatural to be found - such as the gypsy fortune-teller who predicts the book's climactic scene with great accuracy - but you get the idea. All of these things can be, and generally have been, taken metaphorically and/or psychologically by most readers, and LeFanu does leave that door open to us, as I said. But he was a religious man - the son of a priest and a semi-Swedenborgian himself - who definitely believed in spiritual realities. I think that,

in his own mind, the events of "Uncle Silas" were not merely metaphorical, but rather reflected the workings of a hidden supernatural order. But he didn't want to insist that the reader share his own beliefs, and so kept the supernaturalism implicit (though strong). The novel is all the richer and more fascinating due to the ambiguity of LeFanu's approach. A misunderstood masterpiece (no question mark).

- I really liked this one. It's a definite page-turner with a very satisfying ending. I definitely recommend reading it if you're looking for a good mystery/thriller.
