In 2004 Kevin Roberts wrote Lovemarks: the future beyond brands. It was admired by many as a breakthrough in marketing thinking but was also controversial because of its surprisingly obvious thesis: that emotional connections are at the heart of sustained relationships between producers, retailers, and consumers. While many

companies were using the language of war in their marketing (target, penetrate, ambush), Roberts was using the language of love (mystery, sensuality, intimacy). He explained in simple terms what people are often loath to admit: we make decisions with our emotions over our reason. Lovemarks described the journey by which brands could move from consumer respect based on intellect, to consumer love based on emotion—and in return gain "loyalty beyond reason." In 2010 Advertising Age magazine named Lovemarks one of their "ideas of the decade," while noting that the roadmap for brands to achieve Lovemark status was still not entirely clear. Loveworks: How the world's top marketers make emotional connections to win in the

marketplace adds to the original Lovemarks by showcasing real-world business examples and outlining the roadmaps followed by several world-renowned brands to achieve Lovemark status: Procter & Gamble, Toyota, Visa, General Mills, Miller, T-Mobile, and Lenovo are just a few examples of businesses winning in the marketplace through the application of the Lovemarks theory, maintaining laser-like focus on making and sustaining emotional connections with consumers. Loveworks features 20 case stories from clients and markets worldwide in widely varying categories. "My book shows that Lovemarks thinking works—anywhere, anytime. All it takes is having the brains to implement it, the guts to see it through, and an abiding faith in emotion

as your compass," says Brian Sheehan.

Recounting his three years in Korea, the highest-ranking non-Korean executive at Hyundai sheds light on a business culture very few Western journalists ever experience, in this revealing, moving, and hilarious memoir. When Frank Ahrens, a middle-aged bachelor and eighteen-year veteran at the Washington Post, fell in love with a diplomat, his life changed dramatically. Following his new bride to her first appointment in Seoul,

South Korea, Frank traded the newsroom for a corporate suite, becoming director of global communications at Hyundai Motors. In a land whose population is 97 percent Korean, he was one of fewer than ten non-Koreans at a company headquarters of thousands of employees. For the next three years, Frank traveled to auto shows and press conferences around the world, pitching Hyundai to former colleagues while trying to navigate cultural differences at home and at work. While his appreciation for absurdity enabled him to laugh his way through many awkward encounters, his job began to take a toll on his marriage and family. Eventually he became a vice president—the highest-ranking non-Korean at Hyundai headquarters. Filled with unique insights

and told in his engaging, humorous voice, Seoul Man sheds light on a culture few Westerners know, and is a delightfully funny and heartwarming adventure for anyone who has ever felt like a fish out of water—all of us.

The illustrations stylize the placement of wheels and chassis and the distinctive qualities of passenger compartments...valuable resource"-- Booklist Cars today fit a fairly small number of body types--sedan, coupe, station wagon, SUV, hatchback and a few others. The meanings of these familiar terms have changed over the decades as automotive design has evolved. Along the way, a greater number of earlier body types have fallen out of use and become historical curiosities. Who today can identify a charabanc, a dos-a-dos or even a phaeton? In this expanded second edition, the dictionary defines with clear

line drawings all distinct body types from the early days of the automobile, many of which were derived from established models of horse-drawn vehicles. Entries describe popular types and variations from different countries and time periods. Subtypes and subtle distinctions are explained and common misuses of terms and designations are clarified.

REVIEW OF RENAULT KOLEOS 2008 2011 WORKSHOP

• I am in no position to comment on this book, except to suggest others read it.

What an incredible man and what a book! I will keep this book in my home forever, just in case I ever feel that life is difficult. Wow - this book will stop you complaining and help anyone focus on what really is important in life. I am honored to have read Viktor Frankl's words in this book.

• Viktor Frankl was, as he put it, "a professor in two fields, but a survivor of four camps - concentration camps, that is". Already a renowned psychotherapist, Frankl's experiences at Auschwitz and other concentration camps provided him profound and striking insights into human psychology. He sets them out in this brief and elegant book. Firstly, when put in a situation of extreme adversity or deprivation human personalities do not blur into one "uniform expression of the

unstilled urge", as Sigmund Freud had supposed they would but, on the contrary, true personalities are accentuated. Secondly, despair and depression are not at all correlated with the experience of adversity, but if anything inversely so: in our modern, plentiful and comfortable times, neuroses are legion. By contrast, on the whole they weren't in Nazi death camps. Frankl was uniquely placed and qualified to comment on this; Freud was not: "Thank heaven," Frankl remarks dryly, "Freud was spared knowing the concentration camps from the inside". This seems right: I dare say you don't see much neuroticism in modern day Somalia either (though I do quite like the idea of obsessive-compulsive Mogadishan parents pushing their kids

into extra cello lessons.) Frankl uses his anecdotal observations to propose what was in its day a revolutionary psychology: it isn't our primal physical urges which determine our behaviour, with intellectual constructions being mere epiphenomenal by-products (Freud would have it that love, for example, was a spin-off of the deeper primal sexual urge), but the other way round: it is the intellectual content - the *meaning* of our lives that shapes and drives our behaviour and, crucially, our happiness. The more profound and compelling you find the meaning in your own life, the less neurotic you're likely to be. This leaves open the question of what "meaning" might be, and what might make a profound and compelling one. This question Frankl doesn't answer,

rightly I think, other in rather an airy fashion. Anecdotally, meanings are more likely to count as profound and compelling the more gravely connected with the "tragic triad" of pain, guilt and death they are (no shortage, therefore, at Auschwitz). But beyond those axes, the implication will be that we, the users, determine our own meaning. This may perhaps be a little self-fulfilling, and neurosis may be a product of existential frustration (in other words the confounding of one's own quest for meaning through preoccupation with things you don't truly value): Frankl cites a senior American diplomat who sought treatment from depression arising from

discontent with his working life. Frankl's advice was not undergo psychotherapy, but to change his job to something he cared more about! But all the same this seems to me a plausible explanation for modern melancholy: who, these days, isn't continually and forcibly preoccupied with things he or she doesn't truly value? That seems to perfectly capture the "asset rich, time poor" existence. This is a short book, but it's a gem: the message of plurality and self-determination are ones which should strike harmonious chords in the ears of those, like this reviewer, who are nudging into middle age and wondering if it is quite all what it cracked up to be. Olly Buxton
