As the single most populous nation in Africa, Nigeria recently overtook South Africa as the largest economy on the continent. Natural resources, oil and gas in particular, comprise the country's single largest revenue-earner but the 170m person economy also has seen significant activity in recent years into the industrial, financial, telecoms and - as of 2013 - power sectors. Hydrocarbons reserves have traditionally attracted the vast majority of domestic and foreign investment in Nigeria. Oil production capacity has remained at roughly 2.5m barrels per day (bpd) since the start of 2000, although output fell to 2.2m bpd on average in 2012. Still, the country has long operated below its true potential and government efforts in recent years have sought to increase local value addition, by boosting refining capacity and minimising theft and bunkering. The country's banking sector has been through a significant shake-up as well, resulting in a far healthier and more robust financial industry, while reforms in the telecoms and agricultural sectors have strengthened medium-term prospects.

As with almost every other part of our daily lives, information technology is now indispensable in the legal sphere. The variety of applications has grown, keeping pace with developments in the wider field of artificial intelligence: logic and argument have been joined by statistical methods and data, and knowledge engineering has been enriched by machine learning. This book presents the papers delivered at the 29th International Conference on Legal Knowledge and Information Systems – JURIX 2016, held in Nice, France, in December 2016. From the 56 submissions received for the conference, 11 were selected for publication as full papers, 10 as short papers, and 10 as posters, which are included in the proceedings for the first time. The papers address a wide range of topics at the interface of Artificial Intelligence (AI) and Law, such as argumentation, norms and evidence, network science, information retrieval, and natural language processing. Many of the theories and technologies explored in the papers are drawn from real-life materials, including cases brought before the European Court of Human

Rights, Dutch and Greek legal texts, and international investment agreements and contracts. Reflecting the many facets and the interdisciplinary character of AI and Law, the book will be of interest to all those whose work involves them in these fields.

International Minimum Standards for the Protection of Taxpayers' Rights Almanac Foundation

This ground-breaking book brings clarity to the dynamically developing field of international tax law. It empowers individuals and corporate taxpayers to navigate their way around and helps tax authorities take taxpayers' rights into account from the beginning. The book is the result of several years of research conducted with the support of the International Law Association. Taxpayers in International Law puts taxpayers' rights on the global international tax agenda as the necessary counterweight and complement to Base Erosion and Profit Shifting (BEPS). Importantly, it pleads for a global minimum standard of legal protection of the fundamental rights of taxpayers and extracts the content of such rights from relevant constitutional principles of many countries around the world. The book is structured in 3 parts: Part I focusses on the legal sources and on the relations between taxation and international human rights law. Part II identifies general principles and specific taxpayers' rights, groups them into 3 categories (procedural, related to sanctions, and substantive), and analyses the different implications that arise in each of them. Part III features concrete proposals for establishing a global framework for the protection of taxpayers' rights, including guidelines for tax authorities. The book is a unique instrument for the daily work of practitioners and international tax scholars interested in securing the protection of taxpayer's fundamental rights, as well as for those involved in tax collection worldwide. Taxpayers can refer to the book to find out which rulings and concepts can help them enforce their rights; tax authorities and judges can use the book to verify which rights have to be respected.

REVIEW OF PERSONAL INCOME TAX ACT PITA AMMENDED FIRS

- Stevens is a quirky and imaginative poet with a taste for unusual diction, a fluidity of ideas and an unerring instinct for the haunting and intriguing. The poems are meditational in their completeness and memorability and present a more delightful and pleasurable style of Modernism than the other 'greats' of the period such as T S Eliot or Ezra Pound. His attempts to create a 'Supreme Fiction' can at times be baffling, but there is a richness of pure self-indulgence in the poetry which means that it is immediately compulsive and a book which several of my friends agree is 'essential' to any poetry collection, whether its concern be with Poetry at its literary finest or with the languorous pleasure of 'the green freedom of a cockatoo...'and inspirational dream-like meditations. Treat yourself!
