REVIEW OF DATA ABSTRACTION AND PROBLEM SOLVING WITH C WALLS AND MIRRORS 3RD EDITION

- OK let me get the bad stuff out of the way first: the book was a little too long, all the description made it boring at times, the pacing was slow, and the characters hadn't really developed or grown by the end of the novel. But why does it get four stars, you ask? The book followed the lives of some very different people and that was interesting: a 12 year old girl, a restaurant owner, a big drunk guy, a black doctor, and two mute guys. Each chapter was about one of these people so if you got tired of reading about one, the next chapter was about someone different. There were lots of interesting parts it the book once you get past the boring, depressing description. People die, a child is shot in the head, a man gets his feet cut off. None of this stuff is good, but it makes the better more interesting to read. The book is set in 1930s Georgia and the book addresses racism and segregagtion too. Even though its long, its worth it. You'll be proud you finished the 400+ pages.

- What a waste of time. I seriously cannot figure out how this book was an Oprah book club pick. The characters where unlikeable to me. I didn't relate or sympathize with one of them. I didn't feel that there was a true story with a conclusion or point of any kind. It was down right strange. I forced myself to read it because it was a selection for my book club. I would not recommend it to anyone. If you want a good book w/ likeable characters and a moral message, read to Kill A Mockingbird. Now that's a classic.
