REVIEW OF CHEVROLET CRUZE SERVICE

- I recently finished reading this outstanding book and I wanted to highly recommend it to anyone who is considering buying it. It's an incredible intellectual undertaking and I can't praise it enough. For anyone who has been following the creation/evolution debate for any length of time, the book is a treasure. It may best be described as an "exegesis" of the supporting volumes of the Intelligent Design movement. Its major contributions to the debate are its philosophical analysis of the rhetoric supporting the evolutionary paradigm, the exposure of its "a priori" nature, and the exposure of the scientific establishment's metaphysical commitment to naturalism. The evolutionary paradigm is shifting, and this book will be a major contributor to the shift. Many of the book's conclusions have, of course, been suggested before

throughout the history of this movement, but never have they been stated and summarized in such an intellectually stimulating, compelling, and thorough way. This is truly a monumental book.

- In order to be successful, you need to determine first what success for you is. Don't let yourself be programmed by the consumeristic media about what success is. Zig Ziglar delves into this issue by making the point that success doesn't just mean being successful in one area of your life, like in your career. True success comes from living a well rounded life and being successful in all areas of your life from family and personal relationships, to self image to money and career. I believe that this is a good overall approach to take and I found the book interesting and informative on this front. I personally believe that people often take success too seriously. Self help is ok, but just don't get all bent out of shape about it. Do what you love to do and be the best person that you can be in life. Success is not an event, but a continuing process. Ziglar makes this point in the book as well. The one annoyance I have with this book is that the author uses religion to make some of his points. I am not religious in the traditional sense of the word, and felt that he could have made the same points without alienating people by bringing religion into it.
