REVIEW OF GRADE 12 PHYSICS PAPER 2 2014 EXAMPLER

- Re-reading Foundation showed it to be rather dated in its depiction of an advanced galactic empire, rooted in its 1940s science fiction environment. The overall plot, such as it is, betrays the novel's origins as separate short stories, and the characters tend to be wooden. Foundation and Empire, the next book in Asimov's original Foundation trilogy, is a much better novel, especially in its depiction of the character of the Mule. However, the concept of psychohistory introduced in this work is fascinating and the key to the other books by Asimov and others describing past and future developments in the Foundation universe.

- Throughout the past 12,000 years, the Galactic Empire has been expanding from Trantor, its capital planet, throughout the galaxy. How humans found Trantor, or where Earth is (and other questions about Earth), are currently unanswerable. All that is known is that this empire, which controls billions of worlds, is in a permanent social and political recession -- in other words, it is dying. Hari Seldon, renowned psychohistorian (AKA scientist who predicts future trends) has predicted that 30,000 years will pass before a second Galactic Empire will rise. To shorten the dark age to 1,000 years, he has created a Foundation - a group of people dedicated to preserving knowledge - on the edge of the galaxy in the hope that they will share their knowledge after the fall of the Galactic Empire and create a new, and greater, Galactic Empire. Foundation is divided into four stories, which go through history from Seldon's project through the ascent of the Foundation. Taking concepts from Gibbon's Decline and Fall of the Roman Empire, Foundation is an extraordinary book and is strongly recommended to all readers of science fiction.
