Political and Investment Risk in the International Oil and Gas Industry
National Academies Press

This year's Survey, the fifty-sixth edition in this series, is divided into two parts. The first analyses the main features of the regional economy, while the second examines the situation in the individual countries of Latin America and the Caribbean. A summarized statistical appendix is supplemented by the more detailed information that is provided on the accompanying CD-ROM for ease of data processing.

The Economic and Budget Outlook
National Academies Press

OECD's 2005 Economic Survey of Japan analyses whether Japan can sustain its economic expansion. The special report examines how Japan gets the most out of public sector decentralisation.

Survey of the Sufficiency Economy's Elements Applied to EP Student's Spending Habits Public Interest

Publication

This 2010 edition of OECD's periodic review of Canada's economy includes chapters covering policies to sustain the recovery, fiscal consolidation strategies, and health care reform.

What America's Users Spend on Illegal Drugs, 1988-1993 RCOG

Health care costs represent a nearly 18% of U.S. gross domestic product and 20% of government spending. While there is detailed information on where these health care dollars are spent, there is much less evidence on how this spending affects health. The research in *Measuring and Modeling Health Care Costs* seeks to connect our knowledge of expenditures with what we are able to measure of results, probing questions of methodology, changes in the pharmaceutical industry, and the shifting landscape of physician practice. The research in this volume investigates, for example, obesity's effect on health care spending, the effect of generic pharmaceutical releases on the market, and the disparity between disease-based and population-based spending measures. This vast and varied volume applies a range of economic tools to the analysis of health care and health outcomes. Practical and descriptive, this new volume in the *Studies in Income and Wealth* series is full of insights relevant to health policy students and specialists alike.

OECD Economic Surveys: Canada 2010 Oxford University Press

This book examines the financial, legal and institutional strategies available to the international oil and gas industry to manage political and investment risk. The financial techniques for mitigating and allocating risk include corporate

finance, joint ventures, and project finance. The legal techniques include production sharing agreements, profit sharing agreements, service contracts, bilateral investment treaties, and multilateral investment treaties. The institutional techniques include domestic courts, national constitutions, international arbitral tribunals, governmental and non-governmental regulatory agencies, alliances and energy diplomacy. This book traces the historical development of these techniques and their application in practice. The effectiveness with which companies manage political and investment risk is important for the financial sustainability of individual firms and the industry as whole. The real and perceived level of risk affects the level of exploration expenditures and therefore the balance between supply and demand, and the price of oil and natural gas. The search for a secure supply of oil and gas affects the political, military, and economic relations between countries. Consequently, every developed and developing country has placed energy policy at or near the top of its national priorities.

Summary of a Workshop OECD Publishing

The *Routledge Handbook of European Elections* explores the multifaceted dimension of the European Parliament's (EP) electoral contests across the European Community and European Union since 1979. After setting a general empirical and theoretical framework, this collaborative project presents original contributions from leading experts from virtually all the corners of the European Union. Each case study adheres to a common template that makes it easy to compare data, methodology and

outcomes. Every country chapter includes: a brief geopolitical profile and historical background of the Member State; a glance at the national political landscape; a short account of the main political parties, including their attitude toward the European Union; a section on public opinion and European integration; a summary of electoral systems; an overview of all EP and national elections; an in-depth analysis of the 2009 EP electoral race; an overall theoretical interpretation of European elections. A comparative chapter closes the Handbook followed by an Epilogue focussing on the 2014 EP contest with a detailed analysis of the newly elected European Assembly in terms of political group and gender composition. The volume aims to enhance readers' understanding of the European Parliament and revive their interest in the European integration process. By providing a wide range of national and European facts and figures, this investigation represents a comprehensive reference guide to scholars, practitioners, and students of the European Parliament, European elections, political parties, European Union and comparative politics.

[Telescoping causes overstatement in recalled food consumption: Evidence from a survey experiment in Ethiopia](#)

University of Chicago Press

In March 2008, the Committee on National Statistics of the National Academies held a workshop to assist the Bureau of Economic Analysis (BEA) with next steps as it develops plans to produce a satellite health care account. This account, designed to improve its measurement of economic activity in the medical care sector, will benefit health care policy. The purpose of the workshop, summarized in this volume, was to elicit expert guidance on strategies to implement the objectives of the BEA program. The ultimate objectives of the program are to: compile medical care spending information by type of disease—a system more directly useful for measuring health care inputs, outputs, and productivity than current estimates of spending by type of provider; produce a comprehensive set of accounts for health care-sector income, expenditure, and product; develop medical care price and real output measures that will help analysts to break out changes in the delivery of health care from changes in the prices of that care; and coordinate BEA and Centers for Medicare and Medicaid Services (CMS) health expenditure statistics.

The Healthcare Imperative United Nations

Written for students and professionals, this revised textbook surveys the mineral industry from geological, environmental and economic perspectives. Thoroughly updated, the text includes a new chapter on technology industry metals as well as separate chapters on mineral economics and environmental geochemistry. Project Independence World Bank Publications

It has become trite to observe that increases in health care costs have

become unsustainable. How best for policy to address these increases, however, depends in part on the degree to which they represent increases in the real quantity of medical services as opposed to increased unit prices of existing services. And an even more fundamental question is the degree to which the increased spending actually has purchased improved health. Accounting for Health and Health Care addresses both these issues. The government agencies responsible for measuring unit prices for medical services have taken steps in recent years that have greatly improved the accuracy of those measures. Nonetheless, this book has several recommendations aimed at further improving the price indices.

The Burden of Ill Health Among the Urban Poor Office of National Drug Control Policy

Telescoping errors occur if survey respondents misdate consumption or expenditure episodes by including events from outside the reference period in their recall. Concern about telescoping influenced the design of early Living Standards Measurement Study (LSMS) surveys, which used a two-visit interview format to allow a bounded recall. This design fell out of favor although not for evidence-based reasons. Recent guidelines to harmonize food data collection in low- and middle-income countries by using one-week recall increase the relevance of telescoping because errors spread over a shorter period will loom larger. To provide evidence on telescoping, we conducted a survey experiment in Ethiopia, randomly assigning a balanced sample - either a two-visit bounded recall or a single visit unbounded recall. The average value of

reported food consumption is 16 percent higher in the unbounded single visit recall relative to the two-visit bounded recall. Put differently, in this experiment, telescoping errors amount, on average, to an entire extra day worth of consumption being included in the report for the last seven days. Most of the error is explained by difference in reporting of spending on less frequently consumed, protein-rich foods, so apparent diet diversity and dietary quality indicators are likely to be overstated when using unbounded recall.
