## REVIEW OF MANOHAR RE MATH BOOK

- I think that overall *The Giver* was an interesting and suspenseful book. It's interesting in the way that the town is so organized. They get assigned jobs. They can't see color and they get put in a family. They also have to tell their dreams if they had any. It was a hard book to understand sometimes like when people got released. It was also hard to understand how much freedom they don't get. It was suspenseful in many ways. One time when they were at the ceremony waiting for their tasks. And another time when Jonas (a main character) was going to *The Giver* while wondering what they meant by pain. And finally, the time when they could never get to *Elsewhere*. One of many life lessons that I thought of while reading was to never give up. When Jonas was biking to *Elsewhere* he knew not to give up and that it was somewhere. I would strongly suggest this book to anyone over 12 years of age because sometimes it is hard to follow along.

- This book is beautiful. I had to read it in middle school, and then read it again multiple times when I was in high school and college. I suggest it to anyone. It really makes you think and it is so easy to relate to the main character. The world portrayed by this author is so vivid! Read and enjoy!
