Lexington, Mass. ; Toronto : Lexington Books

In an era of accelerating change in the world economy, services are assuming greater importance for the economies of both developed and developing countries. As technological developments allow increasing tradeability of services, huge global firms are offering services across national boundaries. This important book explores the global impact of t

It is the end of the Cold War. Defense

markets begin to dwindle as the global community emerges into the new era of perestroika. Military engine manufacturers brace for the impact, and in a surge of survival instinct and shrewd business sense, one makes the transition into the commercial engine market and eventually surpasses the rest. Witness as GE Aircraft Engines moves from military markets to commercial ventures through the eyes of a 40-year company veteran. Robert Garvins enlightening history details the political and external forces affecting the engine industry and how GE avoided some of the problems posed by environmental politics. Much more than a memoir, "Starting Something Big" tracks GEs progress from the early 1950s to its present-day dominance in the global market.

Interview accounts and anecdotes add personal flair to Garvins analysis of the long-term economic characteristics of the aircraft engine industry, including GEs contract with the U.S. Department of Commerce to help Russian aerospace engineers adapt and survive in civil markets. Youll learn, through Garvins experience, how to gain an edge in finding money for new programs, staying competitive in the production of commercial aircraft engines, and positioning your financial investors and start something big of your own.

To Amend and Extend the Export-Import Bank Act of 1945 Lulu.com

"Brian H. Rowe took General Electric to world market leadership in commercial engines. A brilliant engineer, a sound businessman, and a popular leader,

Rowe established relationships of trust with Boeing, Douglas, and Airbus and most most importantly, the world's airlines. He also worked effectively with the French industry and government." -- book jacket.

Export Policy AIAA

The third in a series of sector-specific assessments of U.S.-Japan technology linkages, this book examines U.S.-Japan relationships that develop or transfer aircraft technology, the motivations of participating organizations, and the

impacts on U.S. and Japanese capabilities. Incorporating detailed accounts of the business and technology aspects of U.S.-Japan aircraft alliances, the volume also describes the U.S. and Japanese policy contexts, presents alternative scenarios for the future and outlines how linkages with Japan can be leveraged as part of a strategy to reenergize U.S. leadership in this critical industry.

Aircraft Financing and Leasing: Tools for Success in Aircraft Acquisition and Management provides researchers, industry professionals and students with a thorough overview of the skills necessary for navigating this dynamic field. The book details the industry's foundational concepts, including aviation law and regulation, airline credit analysis, maintenance reserves, insurance, transaction cost modeling, risk management tools, such as fuel hedging, and the art of lease negotiations. Different types of aircraft are explored, highlighting their purposes, as well as when and why airline operators choose specific models

over others. In addition, the book also covers important factors, such as maintenance reserve development, modeling financial returns for leased aircraft, and appraising aircraft values. Most chapters feature detailed case studies, applying concepts to actual industry circumstances. Users will find this an ideal resource for practitioners or as an outstanding reference for senior undergraduate and graduate students. Presents the foundations of aircraft leasing and financing, including aviation law and regulation, airline credit analysis, maintenance reserves, insurance, transaction cost modeling, and more Provides an overview of the different types of aircraft, their purposes, and when and why operators choose specific models over others Offers a

blend of academic and professional views, making it suitable for both student and practitioner. Serves as an aircraft finance and leasing reference for those starting their careers, as well as for legal, investment, and other professionals.

Hearings Before the Subcommittee on Technology and National Security of the Joint Economic Committee, Congress of the United States, One Hundred Second Congress, First and Second Session, December 3, 1991 and February 27, 1992 National Academies Press

Examines the 1984 "war" that pitted Pratt and Whitney against GE in head-to-head competition for multi billion dollar defense contracts to provide high performance engines for front line

fighter aircraft. The circumstances surrounding the lengthy battle led to the Air Force decision to split future engine sales between the two. Attempts to cut through emotional opinions of the "combatants," to report reality, and to identify lessons learned. Helps the reader to understand the government-to-contractor personality issues; to understand management styles, business expectations and communication skills of key participants.

Department of Defense appropriations for 1985 University of Michigan Press

There is an increasing emphasis in aeronautical engineering on design. Concentrating on large scale commercial jet aircraft, this textbook reflects areas of growth in the aircraft industry and the procedures and practices of civil aviation

design.

REVIEW OF CFM56 ENGINE FOR SALE

- I have been a fan of L.J. Smith ever since book one of *The Vampire Diaries*. With each of her books you can honestly BELIEVE that what she is writing about is the truth, even if the characters are fictitious. *Dughters of Darkness* (as well as any *Night World* book or the *Vampire Diaries* trilogy) should be required reading for anyone who believes in Vampires (or thinks they are one *grin*). Happy reading
- This was a great book! But the dialogue between Nicoletta and her guardian just seem to drag on forever! I missed the intense dialogue that Feehan

usually devotes to the two leads. It seemed that they had very little interaction except for the last 1/4 of the book. Why such devotion to this mother-daughter relationship when it didn't seem to lead to anything crucial within

the story? It really detracted from the couple's story. Other than that, the two leads were great and I agree with previous entries - PLEASE write a book on the other brothers.
