The author of the bestseller *The Disappearing Spoon* reveals the secret inner workings of the brain through strange but true stories. Early studies of the human brain used a simple method: wait for misfortune to strike -- strokes, seizures, infectious diseases, horrendous accidents -- and see how victims coped. In many cases their survival was miraculous, if puzzling. Observers were amazed by the transformations that took place when different parts of the brain were destroyed, altering victims' personalities. Parents suddenly couldn't recognize their own children. Pillars of the community became pathological liars. Some people couldn't speak but could still sing. In *The Tale of the Dueling Neurosurgeons*, Sam Kean travels through time with stories of neurological curiosities: phantom limbs, Siamese twin brains, viruses that eat patients' memories, blind people who see through their tongues. He weaves these narratives together with prose that makes the pages fly by, to create a story of discovery that reaches back to the 1500s and the high-profile jousting accident that inspired this book's title.* With the lucid, masterful explanations and razor-sharp wit his fans have come to expect, Kean explores the brain's secret passageways and recounts the forgotten tales of the ordinary people whose struggles, resilience, and deep humanity made neuroscience possible. **"The Tale of the Dueling Neurosurgeons"* refers to the case of French king Henri II, who in 1559 was lanced through the skull during a joust, resulting in one of the most significant cases in neuroscience history. For hundreds of years scientists have gained important lessons from traumatic accidents and illnesses, and such misfortunes still represent their greatest resource for discovery.

The Origins of Power, Prosperity, and Poverty THOTH

The civilization of Ancient Egypt extended from the fourth millennium BC to the conquest of Alexander. The Egyptians in their tombs recreated life for the dead in a naturalistic way, often against the background of the landscape in which they lived. They also left revealing portraits ranging from the civil servants of the kings to the kings and queens themselves who built the pyramids at Giza and Saqqara; the tombs at Thebes, including the treasure-filled burial-place of Tut-ankh-amon; the temples of Luxor and Karnak and the palaces of Akhenaten at Tell el Amarna and of Amenhotep III at Thebes.

In 1959 journalist John Roderick joined the Tokyo bureau of the Associated Press. There, he befriended a Japanese family, the Takishitas. After musing offhandedly that he would like to one day have his own house in Japan, the family—unbeknownst to John—set out to grant his wish. They found Roderick a 250-year-old minka, or hand-built farmhouse, with a thatched roof and held together entirely by wooden pegs and joinery. It was about to be washed away by flooding and was being offered for only fourteen dollars. Roderick graciously bought the house, but was privately dismayed at the prospect of living in this enormous old relic lacking heating, bathing, plumbing, and proper kitchen facilities. So the minka was dismantled and stored, where Roderick secretly hoped it would stay, as it did for several years. But Roderick's reverence for natural materials and his appreciation of traditional Japanese and Shinto craftsmanship eventually got the better of him. Before long a team of experienced carpenters were hoisting massive beams, laying wide wooden floors, and attaching the split-bamboo ceiling. In just forty days they rebuilt the house on a hill overlooking Kamakura, the ancient capital of Japan. Working together, they renovated the farmhouse, adding features such as floor-to-ceiling sliding glass doors and a modern kitchen, bath, and toilet. From these humble beginnings, Roderick's minka has become internationally known and has hosted such luminaries as President George H. W. Bush, and Senator Hillary Clinton. John Roderick's architectural memoir *Minka* tells the compelling and often poignant story of how one man fell in love with the people, culture, and ancient building traditions of Japan, and reminds us all about the importance of craftsmanship and the meaning of place and home in the process.

One of the Boston Globe's Best Sports Books of the Year: "Incisive, heartbreaking, important and even funny" (Jeremy Schaap, New York Times—bestselling author of Cinderella Man). The people of Brazil celebrated when it was announced that they were hosting the World Cup—the world's most-viewed athletic tournament—in 2014 and the 2016 Summer Olympics. But as the events were approaching, ordinary Brazilians were holding the country's biggest protest marches in decades. Sports journalist Dave Zirin traveled to Brazil to find out why. In a rollicking read that travels from the favelas of Rio de Janeiro to the fabled Maracanã Stadium to the halls of power in Washington, DC, Zirin examines Brazilians' objections to the corruption of the games they love; the toll such events take on impoverished citizens; and how taking to the streets opened up an international conversation on the culture, economics, and politics of sports. "Millions will enjoy the World Cup and Olympics, but Zirin justly reminds readers of the real human costs beyond the spectacle." —Kirkus Reviews

Woodworker's Guide to Carving (Back to Basics) Little, Brown

Quando se fala das grandes navegações da humanidade, logo se pensa no período que ferveceu os séculos XV e XVI com naus de madeira, bússolas e sextantes. Porém, muito antes deste tempo havia um povo que já realizava incríveis façanhas marítimas no maior oceano da Terra, então desconhecido pelos europeus. O Oceano Pacífico é o berço dos maiores navegadores da Antiguidade: o povo polinésio. A principal ferramenta desta aventura foi sua típica embarcação, que hoje ganha o mundo na forma de esporte. Com uma leitura ímpar da natureza, esses velejadores do período da pedra polida entregaram-se a heroicas travessias oceânicas. De onde vieram e como desenvolveram suas técnicas de navegação são temas deste livro, que também traz relatos de desbravadores europeus da era da expansão marítima, de expoentes navegadores da modernidade e de transformadoras emoções experimentadas em remadas nos dias de hoje, quando travessias assumem uma curiosa simbologia que nos permite atravessar de um estado de consciência a outro. Em Vou de canoa, Luiza Perin, fundadora de projeto homônimo, lança seu olhar sobre a cultura polinésia e resgata muitas destas histórias com sabor de mar.

REVIEW OF ENTALHAR MADEIRA EQUIPAMENTO E MADEIRAS CORTES B SICOS

- Wow. I am so glad to have bought this book. I cannot put it down! At first I must admit I was intimidated by its size as well as the period it was written. I find that many period books are really dense and difficult reads. Not this one at all!!! Easy to read and such a gripping tale! It draws you in and you do not want to put it down. I am so glad that I am reading the unabridged version because I cannot imagine it any other way. I am also so happy that it is so long because I do not want the story to end!

- Very well written story. Would recommend this to everyone. I've enjoyed this author for many years. You will have a great adventure with this story.
