REVIEW OF ELECTROTECHNICS N4 STUDY

- Tim Flannery is able to break down the science that goes way over my head and present it in a way that should be able to make anyone understand the clear and present danger that is going on around us...if you really want to understand why scientists are so alarmed without being buried in scientific formulas and data..this is the book to read...read this book then watch Al Gores documentary and I think you'll have a grasp on global warming..I know I do...Mr Flannery is still optimistic that we can change our ways and save ourselves and for that I am grateful thought the tipping point might already be upon us.

- I started reading this book because the title itself seemed interesting.. The idea of the book seemed good.. The beginning was interesting enough, but far too soon did I know who the killer was, and.. well let me sum up the book for you:A female had pepper spray sprayed up her, and her face set on fire.A girl was raped on a stage during a rave.A number of peoples heads are cut off'I'm not saying the book was terribly written. It had a few good points, it was an interesting style of writing. It was the extreme vividly explain killing, he went way overboard on explaining each way someone was killed, and the whole pepper spray was a bit.. disturbing.
