REVIEW OF TENSORFLOW FOR MACHINE INTELLIGENCE A HANDS ON INTRODUCTION TO LEARNING ALGORITHMS

- Poignant and relevant. Oswald Chambers is a master at delivering teaching on all things biblical. I thoroughly enjoy reading this and other works he has written.

- If you wish to remain in that happy blissful world of suspended disbelief, where fairy stories continue to charm and inspire, and heroes are held sacred, then by all means never read this book. "He spat on the ground, and made clay of the spittle, and applied the clay to his eyes, and said to him, "Go, wash in the pool of Siloam" (which is translated, Sent). So he went away and washed, and came back seeing." Gospel of John: 9: 6-7. The intended audience of this work: the permanently cynical (me), writers, and English Literature undergraduates. For undergrads: after mentioning Foucault you quote Polti's structural plot diagnostic in some obfuscated sentence in about your third paragraph of any lit paper and you're on your way to graduating with honors. Heck, you professor won't even read any further and just slap an "A" on the darn thing. For writers: if you are stuck, reading this will send you screaming back to your alphanumeric clavichord faster than a Mustang with a tank full of white lightning and jet fuel. One of the horrible things about reviewing is you start to think about what you've seen and read. Given man's continued Aristotelian imperative to classify, we also begin to classify written and visual literature. Soon this is distilled to an essence, and soon you read the essence instead of the story. Or the familiar story is re-written in a disguised way, and with such excellent selection of language, you don't care. Georges Polti made things even worse than Aristotle did, and now there are no new stories under the sun. Instead of a Novel-O-Matic or "Mad-Lib: The Novel" we have Polti's "The Thirty-Six Dramatic Situations." Read this and you need never read again, but will always just flip to this most essential of the "Master Plots." Why 36? Why not. Nice factoring on that handy number, sounds plausible, and didn't Jesus die at 36 years old? Or was it 33? Aren't there "Form Critics" and deconstructionists who hold the Gospels out to be the first novels? Polti hesitates not.
