Rebecca Rusch is one of the great endurance athletes of our time. Known today as the Queen of Pain for her perseverance as a relentlessly fast runner, paddler, and mountain bike racer, Rusch was a normal kid from

Chicago who abandoned a predictable life for one of adventure. In her new book *Rusch to Glory: Adventure, Risk & Triumph on the Path Less Traveled*, Rusch weaves her fascinating life's story among the exotic locales and extreme conditions that forged an extraordinary athlete from ordinary roots. Rusch has run the gauntlet of endurance sports over her career as a professional athlete - climbing, adventure racing, whitewater rafting, cross-country skiing, and mountain biking--racking up world championships along the way. But while she might seem like just another superhuman playing out a fistful of aces, her empowering story proves that anyone can rise above self-doubt and find their true potential. First turning heads with her rock climbing and

paddling skills, Rusch soon found herself spearheading adventure racing teams like Mark Burnett's Eco-Challenge series. As she fought her way through the jungles of Borneo, raced camels across Morocco, threaded the rugged Tian Shan mountains, and river-boarded the Grand Canyon in the dead of winter, she was forced to stare down her own demons. Through it all, Rusch continually redefined her limits, pushing deep into the pain cave and emerging ready for the next great challenge. At age 38, Rusch faced a tough decision: retire or reinvent herself yet again. Determined to go for broke, she shifted her focus to endurance mountain bike racing and rode straight into the record books at a moment when most athletes walk away. Rusch to Glory is more than an epic

story of adventure; it is a testament to the rewards of hard work, determination, and resilience on the long road to personal and professional triumph.

What would happen if someone invented a machine that could create an exact duplicate of anything? That is the simple but remarkable premise of Damon Knight's classic 1959 novel, *A for Anything*. "The Gismo," as the machine is known, seems like it will end poverty and need forever. But of course, things are not that simple. Like any truly great work of science fiction, Knight's novel boldly pursues the ramifications of his premise. What will people do if there is no longer any need to work for anything? What happens if this device is spread carelessly throughout the world (it can

even duplicate itself!). Finally, there is the supreme and most chilling of questions: what happens if you try to duplicate a human being? *A for Anything* is a classic work of science fiction, but it considers questions that are as relevant and compelling today as they were fifty years ago, perhaps more so. Like most of us, Knight watches the mind-boggling technological advancements of our time with a mixture of awe and alarm, and wonders whether we are really in control of the things we are creating. Knight has put his finger on the pulse of our modern sensibility and, mixed with his truly remarkable imagination, created a novel that is gripping, thought-provoking and impossible to put down.

REVIEW OF S4H400 SAP

- I'm very glad to have discovered this
 original, complicated but enthralling
 book by Kim Newman. In this take-off of
 Bram Stokers Dracula, the Count
 survived execution and went on to
 become the consort of Queen Victoria in
 1888. England is made up of the "un-
 dead" and the "warm," and when a killer
 'Silver Knife' begins murdering vampire
 prostitutes, they must work together to

track him down. Many names from the original Dracula, as well as other literary works find this way into the story, which is fun. I had a little trouble sticking with this book at first--it is quite complex and with many characters--but once I got pulled in, I could not put the book down. I highly recommend this for fans of the original Dracula.

- This review is for the audio book narrated by Martin Jarvis. This is one of the better audio books I've listened to in a while from the perspective of the narrator doing excellent voice characterizations. Jarvis was able to make each character sound distinct and they each sounded just like I would have imagined. Bounderby was thunderous, Tom Gradgrind sounded like a whelp, and Blackpool sounded meek and

humble. It made for an enjoyable listen that made it very easy to follow the characters. I've always been a fan of Dickens and have read most of his books, but this was my first time through "Hard Times". As with most of Dickens novels, the characters are almost caricatures, but this method does a good job of pointing out human strengths and weaknesses. This is a short novel for Dickens, but still did a good job exploring the impact of what would happen if science is emphasized too much over emotional education. He once again highlighted the problems with class distinctions in English society at that time. I like how his humble characters have more wisdom than those that are rich or of high social position. I highly recommend this audio book as a great

way to be introduced to Dicken's "Hard Times".
