### REVIEW OF AMERICAN UNIVERSITY OF NLP

- In the future, a massive flood swamps Earth, covering every last bit of land. Scientists see this coming, and even while the military tries to safeguard the last pieces of high ground in the United States, groups of wealthy intellectuals are busy building secret solutions to the flood problem. Some scientists decide to build a spaceship. Ark One is an incredible piece of machinery, relying on technology that is invented even as the ship is being built. It will take on a crew of 80 young twentysomethings, Candidates who have mostly been groomed since childhood to be the future of mankind. Ark One's mission first takes the crew to Jupiter, to collect enough energy for a warp jump into the universe, where they will travel for decades to reach an Earth-like planet. Tensions are high before the launch, as Candidates struggle to solidify their positions on Ark One. Things get even more difficult as the mission continues and this group of very different people are forced to work together in an environment with no privacy and no escape from each other. The very idea of this story is terrifying, but I thought the way the people aboard Ark One interacted was fascinating. I loved reading about the subsequent generation of children and the cultural evolution that occurs amongst those born into such a restrictive and unusual environment. I thought that the major conflicts that ended up doing so much damage to the crew should have been better anticipated, though, especially in a group of people who spent all of their time together and should have been keen observers of each other.

- This book is comprehensive. Read the summary at the end 3 or 4 times, and you're set for life.
