*108-1 Hearings Departments of Transportation and Treasury, and Independent Agencies Appropriations For 2004, Part 6, May 8, 2003, \* Springer Nature*

This book examines the dramatic increase in automotive assembly plants in the former Socialist Central European (CE) nations of Czechia, East Germany, Hungary, Poland, and Slovakia from 1989 onwards. Enticed by relatively lower-wage labour and significant government incentives, the world's largest automakers have launched more than 20 passenger car assembly complexes in CE nations, with production accelerating dramatically since 2001. As a result, the annual passenger car production in Western Europe declined by more than 20% between 2001 and 2015, and alternatively in the CEE it increased by nearly 170% during this period. Drawing on case studies of 25 current and former foreign-run assembly plants, the author presents a rare historical account of automotive foreign assembly plants in the CE following this dramatic geographic shift. This book will expand the knowledge of policy-makers in Europe in relation to their pursuits of FDI and will be of great interest to

scholars and students of business, economic history, political science, and development.

Volume One traces the history of Opel and Vauxhall separately from inception through to the 1970s and thereafter collectively to 2015. Special attention is devoted to examining innovative engineering features and the role Opel has taken of providing global platforms for GM. Each model is examined individually and supplemented by exhaustive supporting specification tables. The fascinating history of Saab and Lotus begins with their humble beginnings and examines each model in detail and looks at why these unusual marques came under the GM Banner. Included is a penetrating review of Saab through to its unfortunate demise. Volume Two examines unique models and variations of Chevrolet and Buick manufactured in the Southern Hemisphere and Asia but never offered in North America. Daewoo, Wuling and Baojun are other Asian brands covered in detail. This volume concludes with recording the remarkable early success of Holden and its continued independence through to today. Volume Three covers the smaller assembly operations around the world and the evolution of GM's export operations. A brief history of Isuzu, Subaru and Suzuki looks at the three minority interests GM held in Asia. The GM North American model specifications are the

most comprehensive to be found in a single book. Global and regional sales statistics are included. GM executives and management from around the globe are listed with the roles they held. An index ensures that these volumes serve as the ideal reference source on GM.

On a Global Mission: The Automobiles of General Motors International Volume 3 A&V

As Toyota skids into an ocean of problems and uncertainty continues in the U.S. automotive industry, Lemon-Aid Used Cars and Trucks 2011/2012 shows buyers how to pick the cheapest and most reliable vehicles from the past 30 years. Lemon-Aid guides are unlike any other car and truck books on the market. Phil

Edmonston, Canada's automotive Dr. Phil for 40 years, pulls no punches. Like five books in one, Lemon-Aid Used Cars and Trucks is an exposé of car scams and gas consumption lies; a do-it-yourself service manual; an independent guide that covers beaters, lemons, and collectibles; an archive of secret service bulletins granting free repairs; and a legal primer that even lawyers can't beat! Phil delivers the goods on free fixes for Chrysler, Ford, and GM engine, transmission, brake, and paint defects; lets you know about Corvette and Mustang tops that fly off; gives the lowdown on Honda, Hyundai, and Toyota engines and transmissions; and provides the latest information on computer module glitches.

### The Case of the Korean Chaebol and the Automotive Industry Krause Publications

When gasoline prices rise, people notice: the news is filled with reports of pinched household budgets and politicians feeling pressure to do something to ameliorate the burden. Yet, raising the gasoline tax to internalize externalities is widely considered by economists to be among the most economic efficiency-improving policies we could implement in the transportation

sector. This dissertation brings new evidence to bear on quantifying the responsiveness to changing gasoline prices, both on the intensive margin (i.e., how much to drive) and the extensive margin (i.e., what vehicles to buy). I assemble a unique and extremely rich vehicle-level dataset that includes all new vehicle registrations in California 2001 to 2009, and all of the mandatory smog check program odometer readings for 2002 to 2009. The full dataset exceeds 49 million observations. Using this dataset, I quantify the responsiveness to gasoline price changes on both margins, as well as the heterogeneity in the responsiveness. I develop a novel structural model of vehicle choice and subsequent utilization, where consumer decisions are modeled in a dynamic setting that explicitly accounts for selection on unobserved driving preference at both the time of purchase and the time of driving. This utility-consistent model allows for the analysis of the welfare implications to consumers and government of a variety of different policies, including gasoline taxes and feebates. I find that consumers are responsive to changing gasoline prices in both vehicle choice and driving decisions, with more responsiveness than in many recent studies in the literature. I estimate a medium-run (i.e., roughly two-year) elasticity of fuel economy with respect to the price of gasoline for new vehicles around 0.1 for California, a response that varies by whether the vehicle manufacturer faces a tightly binding fuel economy standard. I estimate a medium-run elasticity of driving with respect to the price of gasoline around -0.15 for new personal vehicles in the first six years. Older vehicles are driven much less, but tend to be more responsive, with an elasticity of roughly -0.3. I find that the vehicle-level responsiveness in driving

to gasoline price changes varies by vehicle class, income, geographic, and demographic groups. I also find that not including controls for economic conditions and not accounting for selection into different types of new vehicles based on unobserved driving preference tend to bias the elasticity of driving away from zero -- implying a greater responsiveness than the true responsiveness. This is an important methodological point, for much of the literature estimating similar elasticities ignores these two issues. These results have significant policy implications for policies to reduce gasoline consumption and greenhouse gas emissions from transportation. The relatively inelastic estimated responsiveness on both margins suggests that a gasoline tax policy may not lead to dramatic reductions in carbon dioxide emissions, but is a relatively non-distortionary policy instrument to raise revenue. When the externalities of driving are considered, an increased gasoline tax may not only be relatively non-distortionary, but even economic efficiency-improving. However, I find that the welfare changes from an increased gasoline tax vary significantly across counties in California, an important consideration for the political feasibility of the policy. Finally, I find suggestive evidence that the "rebound effect" of a policy that works only on the extensive margin, such as a feebate or CAFE standards, may be closer to zero than the elasticity of driving with respect to the price of gasoline. This suggestive finding is particularly important for the analysis of the welfare effects of any policy that focuses entirely on the extensive margin.

Why do we choose specific modes of transport and what are the perceived rationalities for our choice? How are different theoretical concepts within mobility research actually perceived

and lived in everyday life? At this book's core is a conceptual and empirical contribution to critical mobility research. It focuses on the tension between freedom and unfreedom, articulated through the dichotomy between individuality and community, as well as critical perspectives on the multitude of unintended consequences of mobility. In a range of everyday life narratives, this tension is analyzed through the concept of 'structural stories'. In teasing out the ambivalences of late modern everyday life, Malene Freudendal-Pedersen exposes how mobility both generates and helps to overcome and live with these ambivalences.

This book criticizes the widespread view that the 1997 Asian crisis was due to 'crony capitalism' and puts the blame instead on misguided liberalization. It analyzes the case of Korea's business conglomerates, the chaebol, with particular attention to the car industry, to show how liberalization contributed to the crisis even

at the level of the firm. It shows how those firms that had developed innovative capabilities survived the crisis much better than those that had merely expanded into markets opened up by liberalization.

### **REVIEW OF DAEWOO NUBIRA**

- This book is incredible. Not only does Michio Kaku bring the most puzzling aspects of modern physics down to the laymans erms, he describes them in a revolutionary way that anyone can understand and grasp thoroughly. I recommend this book for anyone interested in basic or advanced cosmology, physics, or any science. This book will change your outlook on life and give you perspective on your place in the universe. Warning: This book

will blow your mind.

- Edward Abbey reflects and reports on a summer he spent as a ranger at Arches National Park in Utah. At that time, Arches was in a pre "industrialized park" state. *Desert Solitaire* is his tale of adventures and his book of memories. Below is a sprinkling of quotes to give you a taste, a flavor, of what you can expect. "Every man, every woman, carries in heart and mind the image of the ideal place, the right place, the one true home, known or unknown, actual or visionary" (p. 1). "... I have personal convictions to uphold. Ideals, you might say. I prefer not to kill animals. I'm a humanist; I'd rather kill a man than a snake" (p. 20). "Don't actually care for ants. Neurotic little pismires" (p. 30). "We need more predators. The sheepmen complain, it is true, that the coyotes eat some of their lambs. This is true but do they eat enough? I mean, enough lambs to keep the coyotes sleek, healthy, and well fed. That is my concern" (p. 35). "We are kindred all of us, killer and victim, predator and prey, me and the sly coyote, the soaring buzzard, the elegant gopher snake, the trembling cottontail, the foul worms that feed on our entrails, all of them, all of us. Long live diversity, long live the earth!" (p. 38-39). "An increasingly pagan and hedonistic people (thank God!), we are learning finally that the forests and mountains and desert canyons are holier than our churches. Therefore let us behave accordingly" (p. 60). "A man could be a lover and defender of the wilderness without ever in his lifetime leaving the boundaries of asphalt, powerlines, and right-angled surfaces. We

need wilderness whether or not we ever set foot in it" (p. 148). "Ralph Newcomb', I say, 'do you believe in God?' 'Who?' he says. 'Who?' 'Who.' 'You said it,' I say" (p. 180). "Newcomb, for godsake where do we come from?' 'Who knows?' 'Where are we going?' 'Who cares?' 'Who?' 'Who'" (p. 185). "But the love of wilderness is more than a hunger for what is always beyond reach; it is also an expression of loyalty to the earth, the earth which bore us and sustains us, the only home we shall ever know, the only paradise we ever need - if only we had the eyes to see. Original sin, the true original sin, is the blind destruction for the sake of greed of this natural paradise which lies all around us - if only we were worthy of it" (p. 190). "What does [the desert] mean? It means nothing. It is as it is and has no need for meaning. The desert lies beneath and soars beyond any possible human qualification. Therefore, sublime" (p. 219). "I am almost prepared to believe that this sweet virginal primitive land will be grateful for my departure and the absence of the tourists, will breath metaphorically a collective sigh of relief - like a whisper of wind - when we are all and finally gone and the place and its creations can return to their ancient procedures unobserved and undisturbed by the busy, anxious, brooding consciousness of man" (p. 300). Enjoy. Abbey is a writer first, a naturalist second. He takes liberties as necessary to tell his story, so this only seems like an autobiography. Obviously, he was less concerned then about "political correctness." I suspect he would be as irreverent today.
