REVIEW OF GOLF TDI OWNERS MANUAL

- Alice McDermott once again proves her best-selling author status in her novel THAT NIGHT. McDermott represents her original style of writing and her different point of view of important issues faced by the youth of today and yesterday. In this novel, she expands on a subject that is sometimes overlooked or shoved under the proverbial rug. This subject can be summarized in two words, teenage pregnancy. She uses her off-the-wall style of writing to enhance the importance of this subject and yet at the same time show the humorous side of it by portraying the story through the eyes of a child. Alice McDermott's purpose in writing the book That Night was to explore the other side of a teenage pregnancy, the side that deals with the emotions and feelings of the teens. She foreshadows the pregnancy by portraying the boyfriend as a hoodlum to begin with, so the pregnancy is believable and the relationship between the two teens is credible. Judging from the story, McDermott's values are somewhat flexible. She shows the relationship between the two kids as young and immature, yet she seems almost as if she condones the pregnancy. McDermott shows a moderately unbiased view towards the subject she writes about by continually shifting the focus to the young child through which the story is told. This act nonchalantly brings about the first person point of view from which she tells the story. McDermott's style is uniquely set apart from any other novel in its class. She jumps from present, into past, into present again, but she doesn't lose the attention of the reader somehow. Her tone is very laid back and conversational, yet she still shows her point of view in a very realistic manner. The story of two young teens in a passionate love affair really catches the attention of the reader. McDermott's use of symbolism in using two passionate teens to represent the hot summer nights is extraordinary. McDermott shows the irony of a little girl relating the story of a teen in the middle of a life decision that she, although much later, will have to face in her future. The diction used by McDermott proved also to be original. She depicts the little girl as being more mature than she really is by relating the deep and intelligent thoughts through the 8 year old. Her diction, although original, is somewhat unreal. McDermott fails to have the little child converse with anyone and also fails to give her a name. Granted, this fact may have some valid reasoning that is hidden among the suspense of the fighting and mystery. McDermott has the plot unravel in an odd sequence, which enhances the element of suspense in the novel. She uses intense imagery to display the raw emotion taking place in the novel. Descriptions of the fight are prevalent throughout the novel because the whole plot of the story is based around the one night when everyone's emotions went wild and the explanation of why this happened. I believe that Alice McDermott has her very own style of writing and she has a very effective style of writing. Although I may not always agree with the way she introduced an idea or event, I highly regard her opinion and accept that she has reasoning for writing the way she does and introducing things the way she does. Her literary tactics are completely her own and they do an excellent job of making the reader think and contemplate on a new level. Her use of retelling the story through the eyes of an unbiased child is genius. By relating her novel in this means also heightens the innocence factor of the novel. That Night by Alice McDermott confirms this author's ability to bring forth a novel of such character and originality that it can become a best seller. Her other novels also attest to her brilliant writing style, however odd it may seem. Making a best sellers list usually requires large amounts of experience, but Alice McDermott accomplished this status twice within only a few years of a published career.

- It's what in academia is sometimes disparagingly called a "non book," a collection of essays with a few contributions by the editors. In this case, it happens to be quite a good non book. The contributors seem to know what they're talking about. Some of the essays are older than others, so it's not exactly a snapshot in time, but that's not bad in itself. The focuses run from early gangster films through the so-called neo noirs of the 1970s and after. (They're the ones in color.)Here is how Todd Erikson describes the jelling of the genre."What made the noir films of the forties such as Double indemnity, The Killers, and Out of the Past so revolutionary in their day was that they distorted the viewer's psychological reference points by establishing a new set of generic codes. This new set of generic codes incorporated iconography from the detective and gangster genres, the distinctive narrative voice (or attitude) of the hard-boiled writers, and the first-person sensibility of the expressionistic subjective camera, through which the underworld could be experienced vicariously by the viewer."Now, that's writing that both informed and informative. The prose is not for the casual viewer. It's not for tabloid fans. It's a little challenging. You have to think twice about "generic codes" and "iconography" and "expressionistic," but it condenses a good deal of data in a relatively small space.I'm hardly an expert on the subject of film noir and I admit to not having read this book from cover to cover, page by page, all 327 of them, seriatim. But it's not that kind of a book anyway. It's more like an encyclopedia than a novel. You don't gobble it all down, you have to dabble in it.I was grateful that it wasn't one of those heavily philosophical treatises. I wasn't overwhelmed with aesthetic theory. If Derrida and folk of that ilk showed up, I happily missed them.

"Phenomenology" popped up once in a while, true, but at least I know what that means -- at least I THINK I know what it means. I have a feeling that if you asked 100 philosophers to define "phenomenology" you'd get 100 different definitions. At any rate, I found I sometimes stumbled (or levitated) but it wasn't like running into a brick wall. There are a good number of illustrative photos, mostly frames from the films, that help the reader along. Some of the essays are particularly useful. Paul Schrader concentrates on two elements of a production that help to define it as "noir". Fir

instance, the use of lighting dramatic enough to distinguish it from, say, a television situation comedy. He even goes to the trouble of explaining key lights, fill lights, back lights, and kick lights. He doesn't assume you already know what they are. I rather like being treated as someone who knows practically nothing, especially on subjects about which I know practically nothing. The second focus of his attention is camera angles and placement within the setting, which he reasonably treats as equal in importance. Of course Schrader acknowledges the importance of other noir elements, the femme fatale, the revenge motive, the fatalism, and the rest.
