Understanding the global hotel business is not possible without paying specific attention to hotel chain management and dynamics. Chains are big business, approximately 80 percent of hotels currently being constructed around the world are chain affiliated and, in 2014, the five largest brands held over a one million rooms. The high economic importance of the hotel chains and their global presence

justifies the academic research in the field however, despite this, there is no uniform coverage in the current body of literature. This Handbook aids in filling the gap by exploring and critically evaluates the debates, issues and controversies of all aspects of hotel chains from their nature, fundamentals of existence and operation, expansion, strategic and operational aspects of their activities and geographical presence. It brings together leading specialists from range of disciplinary backgrounds and regions to provide state-of-the-art theoretical reflection and empirical research on current issues and future debates. Each of the five inter-related section explores and evaluates issues that are of extreme importance to hotel chain management, focusing on theoretical issues, the expansion of hotel chains, strategic and operational issues, the view point of the individual affiliated hotel and finally the current and future debates in the theory and practice of hotel chain management arising from globalisation, demographic trends, sustainability, and new technology development. It provides an invaluable resource for all those with an interest in hotel management, hospitality, tourism and business encouraging dialogue across disciplinary boundaries and areas of study. This is essential

reading for students, researchers and academics of Hospitality as well as those of Tourism, Marketing, Business and Events Management.

This research monograph aims at developing an integrative framework of hotel revenue management. It elaborates the fundamental theoretical concepts in the field of hotel revenue management like the revenue management system, process, metrics, analysis, forecasting, segmentation and profiling, and ethical issues. Special attention is paid on the pricing and non-pricing revenue management tools used by hoteliers to maximise their revenues and gross operating profit. The monograph

investigates the revenue management practices of accommodation establishments in Bulgaria and provides recommendations for their improvement. The book is suitable for undergraduate and graduate students in tourism, hospitality, hotel management, services studies programmes, and researchers interested in revenue/yield management. The book may also be used by hotel general managers, marketing managers, revenue managers and other practitioners looking for ways to improve their knowledge in the field.

Focusing on issues in the management and governance of IT

innovation, this book links concepts and theories of academic learning to actual real-life scenarios from the successful experiences of public and private sector organisations in Singapore. While there is little disagreement that innovation is the fundamental source of value creation and competitive advantage, investment in IT to support and foster innovation by no means guarantees success. There are various issues to be considered, such as the question of processes and structures that need to be in place in order to maximise value, how to leverage IT innovation to formulate constantly evolving strategies so as to seize emergent opportunities, and how

to overcome challenges faced in implementation, amongst others. Suitable as a complement to main texts for academic courses on accounting information systems and management information systems, as well as a guide for business professionals in this field, the book provides a concise introduction on the subject through the use of case studies and teaching notes, affording a broad perspective on the most important issues.

## **REVIEW OF OPERA HOTEL SOFTWARE USER GUIDE**

- This book would have been much better if it had been half the size and focused on a cohesive storyline. I am partial to urban fantasy but also enjoy the creativity required for a completely new and unique fantasy world. However, this book does not deliver on the promise of five intelligent species plus humans. (You can decide for yourself if humans are intelligent or not). There's a lion species that growls a lot, hawks that can fly, some weird psychic species with squid-like

appendages, a group that resembles Tolkien's elves, and dragons. For some reason it is a great secret that dragons can actually turn into ... (wait for it) ... dragons. If that was not enough, the author felt the need to include the possibility of vampires, angels, and space aliens. And while this may seem like a large fantasy world, all of the action takes place within easy walking distance. Even the lawless fiefs, where children die on the streets and monsters roam, are across the bridge from town. As other reviewers have suggested, you don't learn enough about any of the characters to care what happens to them in the end. Since the entire story is told from the perspective of Kaylin, I don't know why it is told in the third person. It can be very distracting as can the author's tendency to emphasize phrases by separating them into sentence fragments. "There was great sadness. In his eyes." My greatest complaint, and the reason I rated the book so low, was nothing was resolved. The book is over 500 pages and it is all set up for the next book. What I find inexcusable is that the reasons for all of these events are not explained and you are made to feel stupid that you don't understand. There is a great deal made of the fact that Kaylin didn't pay attention in class so is missing much of the knowledge that would tie the pieces

together. Is it going to take three or four more books before the framework is built or will the author just keep dabbling out secrets here and there? I, for one, will not be finding out.

- Miyoko Nishimoto Schinner has some

stunningly wonderful recipes in this book. Her believable bacon recipe is worth the cost of this book alone. I put her right at the top of the vegan cookbook author elite along with Isa Chandra Moskowitz, Colleen Patrick Goudreau and Robin Robertson.
