REVIEW OF MYSTERIES OF THE PAST

- The *Reproduction of Mothering: Psychoanalysis and the Sociology of Gender*, Updated Edition An important text in the development of gender theory/ gender studies; fundamental text for critical Men's Studies as well as for Women's Studies. The tone of two of the earlier views reflect the continuing debates over quantitative versus qualitative research, nature versus nurture,

and a bias for metricization: If one cannot measure it, count it (if there are no statistics) it is not science, not meaningful scholarship. Such a straitjacket view wants to invalidate Chodorow's work, which is held by many, perhaps the majority, to be foundational. I support the positive reviews and strongly recommend the book.

- Alexandra Styron's *"All the Finest Girls"* is a slight novel with touches of some genuinely fine writing most of which comes at the end when the story has unfolded and the main character Addy is evaluating her life and that of her parents and her beloved nanny, Lou. At times in this novel Ms. Styron suffers from what I call "TonyMorrisonization" which translates as: make the prose so dense and so convoluted that it must be read at least twice to understand it. Oh yes, and flash forward and back as many times as possible (hence the allusion to a movie script in the title of my review). ... All and All a good first novel. Ms. Styron is talented and I look forward to her second effort.
