Souvent, les projets interdisciplinaires sont une juxtaposition d'approches dénuées d'articulation. Ce manque d'intégration est lié pour une part à des problèmes de vocabulaire. Aussi, le CTB (Centre de terminologie de l'Institut Libre Marie Haps) et l'AEPL (Association européenne des linguistes et des professeurs de langues) ont-ils réuni des scientifiques, des techniciens et des terminologues pour un colloque sur l'interdisciplinarité. Ces troisièmes journées internationales de terminologie poursuivaient un double objectif: a) inventorier les processus et phénomènes terminologiques liés aux relations interdisciplinaires; b) dresser un cahier de recommandations terminologiques destinées aux équipes de travail interdisciplinaires. Le présent volume publie les actes de cette rencontre. Ces

actes font apparaître que la terminologie est elle-même une science interdisciplinaire (in statu nascendi) et partant, qu'elle n'échappe pas à certains travers. Ils rappellent aussi que plusieurs logiciels de terminographie sont de bons vecteurs de communication interdisciplinaire.

La publication de cet ouvrage est dictée par le souci de mettre à la disposition des étudiants en architecture, des architectes, des concepteurs et des constructeurs un document indépendant, consacré uniquement à la conception structurale des charpentes métalliques. Dans ce but, il reprend intégralement les chapitres 1 à 6 du volume 11 du Traité de Génie Civil, paru chez le même éditeur, où les différents critères de conception sont énoncés et les systèmes porteurs de halles et de bâtiments sont décrits sans avoir recours à des calculs. Les aspects du montage, de la sécurité incendie et de la protection contre la corrosion sont également pris en compte. Cet ouvrage devrait donc faciliter la conception d'une charpente métallique de bâtiment sans qu'il soit nécessaire d'aborder le calcul proprement dit. La conception des charpentes métalliques ne pouvant être enseignée sans une présentation graphique claire et une mise en page attractive, un soin particulier est apporté aux dessins et l'approche pédagogique est privilégiée. Dans cette nouvelle édition, le chapitre consacré aux principes de dimensionnement a été complètement remanié sur la base des nouvelles normes suisses et européennes de structures porteuses.

Admittedly engineers simply continue to calculate the projects they are given by architects, but engineers also draw or redraw, gauge aesthetics and reinvent the production of the form. Is it the architect or the engineer who designs the structure, lays its foundations and establishes the intentionality of the project?

Cet ouvrage constitue le deuxième volume des trois consacrés au domaine de la construction métallique. Il traite de la conception et du dimensionnement des halles et des bâtiments en charpente métallique, en utilisant les notions de base développées dans le volume X. L'ouvrage est divisé en deux parties, l'une relative à la conception des charpentes métalliques, l'autre à leur dimensionnement. La partie CONCEPTION décrit les différents critères de conception, les systèmes porteurs et le cheminement des charges et actions jusqu'aux fondations, sans avoir recours à des calculs. Les aspects du montage, de la sécurité incendie et de la protection contre la corrosion sont également abordés dans cette partie. La partie DIMENSIONNEMENT traite des éléments de structure, de leurs assemblages et des structures entières. L'importance est donnée au choix des dimensions et à leur vérification par des méthodes de calcul basées sur les principes actuels de sécurité et d'aptitude au service. Chaque chapitre de cette deuxième partie comprend des exemples numériques destinés à illustrer les concepts et méthodes exposés. Cet ouvrage s'adresse aux étudiants du deuxième cycle universitaire ainsi qu'aux concepteurs, aux architectes et aux ingénieurs de structures.

REVIEW OF NOTE DE CALCUL PONT CADRE

- Since this Kindle book has no introduction or information on the book page, I copied a publishers note I found on the Google books website which provides some background information about the author. "The writer of the following letters is a young woman who lost her husband in a railroad accident and went to Denver to seek support for herself and her two-year-old daughter, Jerrine. Turning her hand to the nearest work, she went out by the day to work as a housecleaner and laundress. Later, seeking to better herself, she accepted employment as a housekeeper for a well-to-do Scottish cattleman, Mr. Stewart, who had taken up a quarter-section in Wyoming. The letters, written through several years to a former employer in Denver, tell of her new life in the new country. They are genuine letters, and are printed as written, except for occasional omissions and alterations of names."The letters begin in 1909, apparently right after a homestead act made it possible for the author, Elinore Pruitt Stewart, to claim a homestead of 160 acres in Wyoming. Ms. Stewart is a very resourceful woman as well as a wonderful story-teller. She explains that she never received formal education but she refers to current literature so I am guessing that she has learned to write from her interest in reading. Apparently she was a prolific author in her time and one of her descendants has published a book about her. (There are pictures of her on the web and more information if you want to know more about her.)Elinore has a cheerful and pragmatic approach to life making her well-written letters a lot of fun to read. She mostly writes about events, usually involving meeting some of the other inhabitants of the area, ranging from mountain men to Mormons. She loves to go camping and several times recounts setting out on her horse with her baby and camping in the wilderness. She brings very little supplies, catching trout and snaring rabbits for food. She also does some description of her everyday life which apparently was very busy and full of hard work but she always describes it as fulfilling.I enjoyed this slice of life from another time. It is a quick fun read and definitely worth the price!

- The book I am reviewing is So. B It. It is written by Sarah Weeks. This is a realistic fiction novel.This book is about the life of a girl named Heidi. She and her mom showed up on the doorstep of a woman named Bernadette. Bernadette took them in and started taking care of them. The book describes the adventures in the lives of Heidi and her mom.So B. It is a good book. I like this book because it is somewhat true. But sometimes it does get a little bit boring. I would recommend this

book to fifth graders and up who want a good realistic fiction.
