Praise for Financial Valuation "This Second Edition addresses virtually all of the recent hot topics in business valuation, and there are many of them since the first edition. Most chapters are updated with new material, including, especially, the Duff & Phelps Risk Premium Report as an alternative to Ibbotson's risk premium data. As with the first edition, the authors are very well-known and provide incisive analysis." --Shannon Pratt, CFA, FASA, MCBA, CM&AA, CEO, Shannon Pratt Valuations, LLC "Though the first edition of Mr. Hitchner's book was excellent in all regards, this Second Edition squarely puts Hitchner and his team of authors at the top of the list of authorities in the field of business valuation. Few publications on the subject even come close to the book's thorough coverage of the topic, but equally impressive is the clarity with which Hitchner depicts and explains highly complex subject matters. So impressed with Financial Valuation Applications and Models, the National Association of Certified Valuation Analysts has developed a three-day course based upon this book entitled, 'Advanced Valuation and Case Study Workshop,' which is now a cornerstone training program for our organization." --Parnell Black, MBA, CPA, CVA, Chief Executive Officer, NACVA "This book is a valuable resource for every BV library. Praise for Intangible Assets "In Intangible Assets, Jeffrey Cohen presents an informative, thought-provoking and practical look at an increasingly important component of every business's worth. He describes the art and science of identifying assets that have clear economic benefit, but are typically not found on the balance sheet, and he provides an invaluable framework within which the reader can value these assets, despite their elusive nature." --Rick Westervelt, President, Skylist, Inc. "Jeffrey Cohen's integrative approach to conceptual issues of intangible assets is creative and a refreshing contribution. He brings law, economics, finance, and accounting to the same table, which results in a comprehensive framework for understanding how value is created and sustained. Dana Northcut, PhD, Adjunct Associate Professor of Accounting Graduate School of Business, University of Chicago Principal, Chicago Partners, LLC "This volume is the perfect resource for newcomers to IP valuation. Valuation for Financial Reporting: Intangible Assets, Goodwill, and Impairment Analysis provides guidance and insight in the identification and measurement of intangible assets and goodwill pursuant to the Financial Accounting Standards Board Statements of Financial Accounting Standards (SFAS) No. 141, Business Combinations and (SFAS) No. 142 Goodwill and Other Intangible Assets. The new rules are sweeping and complex. Valuation for Financial Reporting will bring clarity to CFOs, auditors, valuation professionals, and CPAs by explaining the valuation aspects of the new financial reporting requirements, including how to identify the characteristics of goodwill and intangible assets, determine if impairment has occurred, and employ specific methods to assess the financial impact of such impairment. While numerous articles and commentaries on the subject have appeared dating back to the time the FASB began considering the issue, Valuation for Financial Reporting is the first to provide "real world" examples of the valuation techniques and methodologies required to perform a purchase price allocation under SFAS No. 141 and an impairment study under SFAS No. 142. Valuation for Financial Reporting will help lift the veil of mystery surrounding these two important pronouncements and provide a practical guide for their implementation. This book: * Shows the CPA and client how to apply the new SFAS 141 rules that pertain to all companies involved in an acquisition (buyer or seller) by analyzing and valuing the tangible and intangible assets acquired. * Teaches the CPA and client how to apply the new SFAS 142 rules that pertain to all companies that recognize and measure intangible assets and goodwill which may now be impaired * Presents detailed case studies and examples on how to apply and implement SFAS 141 and SFAS 142 * Provides a "How To" on the identification and measurement of intangible assets. * Includes a checklist for controlling the gathering of data necessary for the analyses and another checklist guiding the work program for methodologies * Offers guidance and examples for financial reporting purposes.

FAIR VALUE MEASUREMENT Practical Guidance and Implementation "Writing Fair Value Measurement was a monumental task fraught with controversy not only in the U.S., but also abroad. Having coauthored a book with Mark as well as written one myself, I was even more impressed that Mark was able to navigate these fair value minefields and produce a work that will be a tremendous help to accountants and non-accountants alike. If you are looking for a 'one-stop' book on fair value measurement, this is it!" —Neil J. Beaton, CPA/ABV, CFA, ASA, Managing Director, Valuation Services, Alvarez & Marsal "In recent years, the FASB and the IASB have added many requirements for various assets and liabilities to be measured at fair value. In this book, Zyla clearly describes how to implement fair value measurement and how investors and creditors should interpret it. The crisp writing and illuminating analysis will help readers to grasp the essence of fair value accounting and to apply it wisely." —J. Edward Ketz, Associate Professor of Accounting, Pennsylvania State University "The focus of the book is on fair value measurement based on level 3 inputs. This is a critical area of valuations for financial reporting due to a false comfort given by routine application of evaluating models and assumptions without real possibilities of calibration. Mark Zyla offers an extraordinary help in understanding the reliability of the inputs and the outputs of the different methodologies and the inherent biases in each of them. The book is a precious support for better valuation both in U.S. GAAP and in IFRS fair value reporting." —Mauro Bini, Full Professor of Corporate Finance, Bocconi University; Chairman, Management Board OIV (Organismo Italiano di Valutazione) Essential guidance on the fair value measurement process Now in a second edition, Fair Value Measurement: Practical Guidance and Implementation helps you succeed in understanding the fair value accounting rules that entities must follow. This book provides an illuminating analysis of Internally Generated Goodwill from a strategic point of view. The author launches his strategic analysis from a foundational understanding of Internally Generated Goodwill as determined largely in relationship to intangible resources and competitive differentials. Arguing that intangible resources are at the origin of competitive differential--and accordingly at the origin of the achievement of economic profit--the author shows how Internally Generated Goodwill can be considered as the economic expression of competitive differentials and, therefore, as the expression of the greater firm's value that originates from those differentials. In addition to offering this innovative theoretical framework, the author develops a variety of practical tools for generating value estimates and value breakdowns of IIG. The masterful analysis provided here focuses on developing methods for identifying the elements that compose IIG and on achieving an accurate estimate of its value, ultimately seeking to evaluate the limitations and advantages of the existing variety of approaches to analyzing the constituent parts of IIG and to devise accounting practices that will help academics and professionals alike to obtain more significant and lucid results.

- I am a fan of Mr Feinsteins ability to tell a story. From a good walk spoiled to The Majors to The Punch and Now The Open Inside the Ropes at Beth Page Black Mr Feinstein know how to weave the details and the intricate fabric of an event into a interesting and page turning story. I found the lead up to be just as interesting as the guts of the tournament. Great book for all readers who enjoy a good story.
