. . . the editors have done a good job of bringing together a series of contributions which provide a useful and welcome expansion of the theoretical

foundations of talent management through a knowledge management lens. David Collings, Personnel Review This book takes a fresh look at human talent in organizations, focusing on employees at all levels who represent key agents of knowledge management in acquiring, transferring, and applying important knowledge for competitive advantage. The overarching aim of the book is to identify, define, and explore the implementation of talent management strategies aimed at facilitating effective knowledge management in an organization. The contributors provide a valuable fusion of two important areas of emphasis for current research and practice in human resource management: talent management and knowledge management. They illustrate the immense significance of the latter to competitive advantage and organizational success in our rapidly changing global knowledge-based economy. The generation and acquisition of ideas and knowledge, their internal transfer and application throughout the organization, and the cross-border transfer of knowledge all through the effective management of human talent have become integral to contemporary management. The contributors examine planning and staffing, training/coaching, performance management, and organizational learning and development. Academics, human resource management practitioners and management consultants will find this volume valuable.

Most books on the biotechnology industry focus on scientific and technological challenges, ignoring the entrepreneurial and managerial complexities faced bio-entrepreneurs. The Business Models for Life Science Firms aims to fill this gap by offering managers in this rapid growth industry the tools needed to design and implement an effective business model customized for the unique needs of research intensive organizations. Onetti and Zucchella begin by unpacking the often-used 'business model' term, examining key elements of business model conceptualization and offering a three tier approach with a clear separation between the business model and strategy: focus, exploring the different activities carried out by the organization; locus, evaluating where organizational activities are centered; and modus, testing the execution of the organization's activities. The business model thus defines the unique way in which a company delivers on its promise to its customers. The theory and applications adopt a global approach, offering business cases from a variety of biotech companies around the world.
