Malice. The word is synonymous with Khushwant Singh; his pen has spared no one. For over four decades as India's most widely-read columnist, he has commented on just about everything: religion, politics, our future, our past, prohibition, impotency, presidents, politicians, cricket, dog-haters, astrologers, the banning of books, the secret of longevity...the list is endless. Candid to the point of being outrageous, Khushwant Singh makes both his reader and subject wince. He writes unabashedly on nose picking, wife-bashing, bribing journalists, gender wars and the desires of an octogenarian; on Nehru and Edwina, Laloo, Bal Thackeray, Chandraswami and Sonia Gandhi, among host of others. Khushwant Singh's Big Book of Malice brings together some of his nastiest and most irreverent pieces. Witty, sharp and brutally honest, this collection is certain to delight and provoke readers of all ages. 'Good people can be crashing bores. Evil men who combine evil-doing with drunkenness, debauchery and making illicit money make more interesting characters because they pack their lives with action. They do what most of us would like to do but do not have the guts to.' —Khushwant Singh

This is volume 2 of a three-volume publication on Bangladesh's trade prospects. Bangladesh's ambition is to build on its very solid growth and poverty reduction achievements, and accelerate growth to become a middle income country by 2021, and share prosperity more widely amongst its citizens. This includes one of its greatest development challenges: to provide gainful employment to the over 2 million people that will join the labor force each year over the next decade. Moreover, only 54.1 million of its 94 million working age people are employed. Bangladesh needs to use its labor endowment even more intensively to increase growth and, in turn, to absorb the incoming labor. The Diagnostic Trade Integration Study identifies the following actions centered around four pillars to sustain and accelerate export growth: (1) breaking into new markets through a) better trade logistics to reduce delivery lags ; as world markets become more competitive and newer products demand shorter lead times, to generate new sources of competitiveness and thereby enable market diversification; and b) better exploitation of regional trading opportunities in nearby growing and dynamic markets, especially East and South Asia; (2) breaking into new products through a) more neutral and rational trade policy and taxation and bonded warehouse schemes; b) concerted efforts to spur domestic investment and attract foreign direct investment, to contribute to export promotion and diversification, including by easing the energy and land constraints; and c) strategic development and promotion of services trade; (3) improving worker and consumer welfare by a) improving skills and literacy; b) implementing labor and work safety guidelines; and c) making safety nets more effective in dealing with trade shocks; and (4) building a supportive environment, including a) sustaining sound macroeconomic fundamentals; and b) strengthening the institutional capacity for strategic policy making aimed at the objective of international competitiveness to help bring focus and coherence to the government's reform efforts. This second volume provides in-depth analysis across seven cross-cutting themes that underpin most of the findings of pillars 1 and 2 above.

Sura's Year Book 2006 (English) OECD Publishing

The end of the MFA was followed by rising apparel exports, falling prices, and a reallocation of production and employment between countries. There were also significant changes within countries. The first main finding of this report is that export and employment patterns after the MFA/ATC did not necessarily match predictions. While many predicted that production would shift to low-wage countries, this book shows that only 13 percent of variation in export changes post-MFA can be explained by the differences in wage levels. Second, changes in exports are usually, but not

always, good indicators of what happens to wages and employment within countries. This is especially important for policy because it shows that simply using exports as a metric of 'success' in terms of helping the poor is not sufficient. Third, the Book identifies the specific ways that changes in the global apparel market affected earnings. The Book shows that wage premiums change in predictable ways: rising (in most cases) in countries that were proactive in adapting to the MFA phase-out and expanded their market shares, and falling in countries that failed to respond in a timely fashion to the changing environment. The Book shows that promoting 'upgrading' (defined as shifting to higher-value goods, shifting up the value chain, or 'modernizing' production techniques) seems to be necessary for sustainable competitiveness in the apparel sector but does not necessarily help the poor. Policies that support upgrading need to be complemented with targeted workforce development to make sure that the most vulnerable workers are not left behind. Having a vision for the evolution of the apparel sector that incorporates developing worker skills seems crucial. Otherwise, less-skilled workers could miss out on opportunities to gain valuable work experience in manufacturing.

Widespread voluntary tax compliance plays a significant role in countries' efforts to raise the revenues necessary to achieve Sustainable Development Goals. As part of this process, governments are increasingly reaching out to taxpayers - current and future - to teach, communicate and assist them in order to foster a "culture of compliance" based on rights and responsibilities, in which citizens see paying taxes as an integral aspect of their relationship with their government.

The book describes the difficulties of the current international corporate income tax system. It starts by describing its origins and how changes, such as the development of multinational enterprises and digitalization have created fundamental problems, not foreseen at its inception. These include tax competition—as governments try to attract tax bases through low tax rates or incentives, and profit shifting, as companies avoid tax by reporting profits in jurisdictions with lower tax rates. The book then discusses solutions, including both evolutionary changes to the current system and fundamental reform options. REVIEW OF BOOK BANGLADESH INCOME TAX BY NIKHIL CHANDRA SHILCS PDF

- James Clavell didn't disappoint me. The story is exciting, you never know what comes next. The ending is great, unlike Tai Pan's abrupt conclusion. I agree with one of the reviews: one doesn't need to read Tai Pan before in order to understand Noble House. However, there are some side stories that are brought in Noble House whose comprehension requires previous reading of Shogun, Tai Pan and King Rat. Besides, I enjoyed seeing how the characters of those books (or their descendants) get to know each other in Noble House.

- This was the first James Clavell book I had read, and now I am eager to read all of the others. In a word, Noble House is amazing. In its breadth and scope it is unsurpassed by any novel I have ever read. It is gripping from the Prologue where you introduced to the main character, Ian Dunross to the awe-inspiring conclusion. The characters are all well-formed, and you feel like you know them intimately. Their faults and good qualities are all known by the reader. Don't be discouraged by the book's weight and length. It will fly by. Even though the book weighs a pound, it is very hard to put down. This is a book that makes me want to tell anyone who can read that they should read this book.
