REVIEW OF TOWMOTOR FORKLIFT MANUAL

- The chapters are set up like a pamphlet with bulleted information. It just doesn't seem appropriate for a college class. It is written like a middle school textbook, and it doesn't offer more information than what most laymen already know.

- I have read many books on Manson as well as other "Serial Killers." There is legitimate debate as to whether or not Manson himself should be lumped into this category. Digression. Of all the books I have read on Manson, surprisingly this one seems the least self-serving. The whole notion of "Helter Skelter" (which I honestly believe was preached to his followers, but in actuality was in no way the catalyst for the Tate-LaBianca murders) as being the one and only motive put forth by prosecutor Vincent Bugliosi seems to me to be one of the most self-serving. I won't reveal anything too important, but Manson is surprisingly candid in this book and his version seems much more plausible and realistic than any of the other accounts I have read.
