*The New Middle Class in China* Benjamin Cummings

Thanks to a mounting interest in climate change and severe weather phenomena, meteorology courses are increasingly popular among today's students - particularly in general education versions of the course, where rapid advances in visualization tools and technologies like GIS have greatly expanded the teacher's toolkit. The Atmosphere: An Introduction to Meteorology remains the standard introduction in its field, reinforcing basic concepts with everyday, easy-to-grasp examples. This revision retains the hallmarks professors have come to expect from Tarbuck and Lutgens: a friendly, largely non-technical narrative, timely coverage of recent atmospheric events, and carefully crafted artwork by leading science illustrator Dennis Tasa. The Twelfth Edition maintains a student-friendly approach while evolving to address various course challenges and trends. Current digital visualization and assessment tools are now available on MyMeteorologyLab, a new resource that both encourages student self-study and enables instructors to manage their courses online, with customizable assessments for students. Each chapter in this revision is organized by a new active learning path to help guide and engage non-science majors. A greater focus on popular and increasingly important Severe & Hazardous Weather applications, new critical visual analysis Eye on the Atmosphere features, as well as new discussions of the real-world career opportunities of meteorology with Professional Profile essays, make the science both relevant and exciting.

Michael Sullivan's time-tested approach focuses students on the fundamental skills they need for the course: preparing for class, practicing with homework, and reviewing the concepts. The Enhanced with Graphing Utilities Series has evolved to meet today's course needs by integrating the usage of graphing calculator, active-learning, and technology in new ways to help students be successful in their course, as well as in their future endeavors. In the Sixth Edition, new worksheets in MyMathLab-developed from the authors' experience in the classroom-provide mixed review for students who having trouble reconciling various topics, and also give students an opportunity to show their work.

For nearly a century families have been out-migrating to suburbs and peri-urban areas. In this book, Johanna Lilius conceptualizes the relatively recent phenomenon of families choosing to live in the inner city. Drawing on a range of qualitative data, the book offers a holistic approach to simultaneously understanding changes within parenting practices and changes connected to city development. The book explains not only why families choose to stay in the inner city and how they use the city in their everyday lives, but also how families change the landscape of contemporary cities, and how the family is, and has been, perceived in urban planning and policy-making. The Nordic perspective provided by Lilius makes this book an important contribution in helping understand inner city change outside the Anglo-American context, and will appeal to an international audience.

Uniform: Clothing and Discipline in the Modern World examines the role uniform plays in public life and private experience. This volume explores the social, political, economic, and cultural significance of various kinds of uniforms to consider how they embody gender, class, sexuality, race, nationality, and belief. From the pageantry of uniformed citizens to the rationalizing of time and labour, this category of dress has enabled distinct forms of social organization, sometimes repressive, sometimes utopian. With thematic sections on the social meaning of uniform in the military, in institutions, and political movements, its use in fashion, in the workplace, and at leisure, a series of case studies consider what sartorial uniformity means to the history of the body and society. Ranging from English public school uniform to sacred dress in the Vatican, from Australian airline

uniforms to the garb worn by soldiers in combat, Uniform draws attention to a visual and material practice with the power to regulate or disrupt civil society. Bringing together original research from emerging and established academics, this book is essential reading for students and scholars of fashion, design, art, popular culture, anthropology, cultural history, and sociology, as well as anyone interested in what constitutes a "modern" appearance.

Written for the mid to high-level developmental reading course, Bridging the Gap, Eighth Edition by Brenda Smith continues to be the #1 textbook choice of developmental reading educators. Bridging the Gap was the first book to focus on how to read college textbooks. Over the course of several editions, this theme has been broadened by linking textbook readings to recent news in the popular press and adding material on critical thinking and the Internet. A hallmark of the text, the end-of-chapter readings represent varying reading levels to permit individualization of assignments to meet varying student needs. A variety of academic disciplines are represented throughout, including psychology, history, biology, business, allied health, English literature, and more. This affordable Books a la Carte Plus Edition features the exact same content from our traditional textbook in a convenient, notebook-ready loose-leaf format -- allowing students to take only what they need to class. As a bonus, the Books a la Carte Plus Edition

is accompanied by a full-color, laminated Study Card that's a perfect tool to help students prepare for exams, plus an access code to the MyLab for this course.

### REVIEW OF PEARSON EDUCATION LIMITED MID COURSE TEST ANSWERS

- jarads books are very well studied and respected i would recommendthis book to anyone who wants to learn about our world
- Excerpt from a work in progress:"Perhaps basking in the afterglow of having won a Pulitzer Prize for Guns, Germs, and Steel, Jared Diamond

subsequently released a book entitled *Collapse*, in which he puts forth a multi-point thesis purporting to explain why societies, ancient and modern, pass away-sometimes abruptly. Among those points one will find resource depletion, climatic changes, lack of trading partner availability, and war--all of which Diamond supplements with considerable research. But for all of the grandiloquence and anthropological minutiae, Diamond devotes not one letter of copy to the lack of vital institutions as a factor in collapse. The problem with this oversight is that the primary cause for the collapse of any society, as well its ability to reform or rebound after collapse, is a lack of these institutions. As Judith Thornton explains with regard to why the Soviet and Eastern European collapses differed in their relative ability to restructure after 1990: "One difference between the Soviet Union and Eastern Europe is the immense size of the Soviet economy and high degree of centralization of its government system. The sheer size of the Soviet government meant that the resources at stake in government decisions were enormous, creating significant incentives for individuals in the decision-

making hierarchy to attempt to influence decisions by lobbying and by distorting the information on which decisions would be based. Local interests took advantage of long bureaucratic channels between local and central levels and their control of information to supply biased reports." What are the institutions whose absence impedes restructuring and post-collapse adjustment? Thornton's answer comes later in the same chapter: "First and foremost, they are property rights and markets. But what impedes the exercise of property rights and contracting in markets? The hurdles are lack of legal institutions, financial institutions, public goods such as law and order and physical infrastructure, and government administrative capacity." If the purported connection between institutions and transaction/interaction costs is right, no theory of societal collapse can be viable and fail to address the issue of institutions outright. In the same way, no theory of collapse can omit the idea that rules of a certain sort effect the ability of a system to transition from a hierarchical to a networked state of affairs. Thus, we should look past Diamond's work for valid theories of societal collapse. A good place to start might be Douglass North's *Institutions, Institutional Change and Economic Performance*."
