From the New York Times-bestselling author, "an intelligent, fast-paced romance, chock-full of sensuality and spiced with mystery" (Publishers Weekly). NOTORIOUS NOBLEMAN SEEKS REVENGE
Name and title: Adam Penrose, Duke of Stratton. Affiliation: London's elite Society of Decadent Dukes. Family history: Scandalous. Personality traits: Dark and brooding, with a thirst for revenge. Ideal romantic partner: A woman of means, with beauty and brains, willing to live with reckless abandon. Desire: Clara Cheswick, gorgeous daughter of his family's sworn enemy. FAINT OF HEART NEED NOT APPLY Clara may be the woman Adam wants, but there's one problem: she's far more interested in publishing her women's journal than getting married—especially to a man said to be dead-set on vengeance. Though, with her nose for a story, Clara wonders if his desire for justice is sincere—along with his incredibly unnerving intention to be her husband. If her weak-kneed response to his kiss is any indication, falling for Adam clearly comes with a cost. But who knew courting danger could be such exhilarating fun? In 1965, soon after the first US combat troops had arrived in Vietnam, it was realized that in some areas the Viet Cong had developed vast tunnel complexes in which to hide from the enemy. It was long known that such complexes existed, but it was not realized just how extensive they were in some areas, how important they were to the Viet Cong, and how difficult it was to detect and neutralize them. At first infantrymen volunteered to enter the tunnels armed with only pistols and flashlights - the 'tunnel runners' were born, known to the Australians as 'tunnel ferrets'. Starting as an ad hoc force of infantrymen, combat engineers and chemical troops, it was not long before units were 'formalized' as 'tunnel exploration personnel' and 4-6-man 'tunnel exploitation and denial teams' were created. They came to be known simply as 'tunnel rats' with the unofficial motto Non Gratum Anus Rodentum - 'Not Worth a Rat's Ass'. This title will be based on the personal accounts of those who served in this unique role and will describe the specialist training and equipment, not to mention the tactics and combat experiences, of those who fought an underground war against the Viet Cong in Vietnam.

Reproduction in Mammals is intended to meet the needs of undergraduates reading zoology, biology, biochemistry, physiology, medicine, veterinary science and agriculture, and to be a source of information for advanced students and research workers. It is published as a series of small textbooks dealing with all major aspects of mammalian reproduction. Each of the component books is designed to cover independently fairly distinct subdivisions of the subject, so that readers can select texts relevant to their particular interests and needs. This volume consists of a series of thought-provoking essays by people with a number of very different backgrounds, including biology, comparative anatomy, psychology, psychiatry and moral philosophy. They discuss the physiology mechanisms, adaptive significance, clinical picture and social impact of a variety of patterns of human sexual behaviour, thereby providing a balanced and informative account of a highly sensitive and emotive subject.

This well-illustrated, authoritative text introduces students to the principles and concepts of physiology that are essential to the study and practice of veterinary medicine. Coverage of physiopathology, in addition to clinical problem-solving techniques, makes this resource uniquely relevant to practice.

Clinical correlation boxes in each chapter include history and background information on topics in physiology. Cases present realistic situations that show theory in practice and reinforce students' understanding of each topic. The organization by body system follows a logical progression and makes it easy to refer to specific information.

REVIEW OF LIVRO DUKES FIOLOGIA DOS ANIMAIS DOM STICOS LIVRO

- *Eragon* by Christopher Paolini Eragon is a fifteen years old and he is a great person because he always helps people. Brom is an old man but very strong who gets murdered by things called the Razzac. Roran is Eragon's cousin who has to leave his home so he won't be part of the king's army. A fifteen year old boy finds a blue stone in the mountains. The stone turns out to be an egg and hatches a dragon. Eragon names the dragon Saphira. They have many adventures together like going to a city called Gil'ead and rescuing an elf. Then they have to get to the Varden to help stop the empire from destroying their world. The story takes place in a world called Alagasia. Alagasia is a world with dragons, elves, dwarfs, humans, and an empire. Some of the world hasn't been discovered yet but most of it has. The theme of this book is a boy and his dragon tries to save his world from an evil empire. I liked this book very much because it was made up of action, drama, and happiness. It caught my attention and I couldn't put the book down unless I had to. The book was very exciting like a war video game.

- I am not much into reading, but I can't put it down. Only 130 pages in and it's my favorite book. Can't wait to buy the next two!
