A PASSION FOR POETRY Why poetry? Why has this ancient craft existed throughout time, continuing even into our fast-paced age of moderncy and technology? Perhaps two reasons: 1) The human condition still demands we ask who we are, what we are and why we are; and 2) space is limited in this form of writing requiring the poet reduce his thoughts into a quick-read format. Puns, pundits, quotes, poetry and prose capsule 90% of everything the human race believes to be important and true Poets are avatars who define the nature and meaning of our roles. They reduce the fabric of our existence to the simplest ingredients of mind, soul, bones, sinew and desire. It is the forum that speaks to all, reaches all, touches all, teaches all, questions all, answers all.

The two-volume set LNCS 9981 and 9982 constitutes the refereed proceedings of the 15th International Semantic Web Conference, ISWC 2016, which was held in Kobe, Japan, in October 2016. The 75 full papers presented in these proceedings were carefully reviewed and selected from 326 submissions. The International Semantic Web Conference is the premier forum for Semantic Web research, where cutting edge scientific results and technological innovations are presented, where problems and solutions are discussed, and where the future of this vision is being developed. It brings together specialists in fields such as artificial intelligence, databases, social networks, distributed computing, Web engineering, information systems, human-computer interaction, natural language processing, and the social sciences. The Research Track solicited novel and significant research contributions addressing theoretical, analytical, empirical, and practical aspects of the Semantic Web. The Applications Track solicited submissions exploring the benefits and challenges of applying semantic technologies in concrete, practical applications, in contexts ranging from industry to government and science. The newly introduced Resources Track sought submissions providing a concise and clear description of a resource and its (expected) usage. Traditional resources include ontologies, vocabularies, datasets, benchmarks and replication studies, services and software. Besides more established types of resources, the track solicited submissions of new types of resources such as ontology design patterns, crowdsourcing task designs, workflows, methodologies, and protocols and measures.

Haunting poems from one of the twentieth century's groundbreaking poets Paul Celan, one of the greatest German-language poets of the twentieth century, created brilliant works of pure musicality and stark imagery in tension with the haunting memories of his life as a Romanian Jew during the Holocaust. *Breathturn into Timestead: The Collected Later Poetry* gathers the five final volumes of his life's work in a bilingual edition, translated and with commentary by the award-winning poet and translator Pierre Joris. This collection displays a mature writer at the height of his talents, following what Celan himself called the "turn" (die "Wende") of his work away from the lush, surreal metaphors of his earlier verse. Given "the sinister events in its memory," Celan wrote, the language of poetry has to become "more sober, more factual . . . 'grayer.'" He abandoned the richer music of lyric poems, paring his compositions down to increase the accuracy of the language that now "does not transfigure or render 'poetical'; it names, it posits, it tries to measure the area of the given and the possible." In his need for an inhabitable post-Holocaust world that held the memory and anguish of that history, Celan experimented with a bold new poetics. *Breathturn into Timestead* reveals a poet undergoing one of the most profound artistic reinventions of the twentieth century—creating a poetry grounded in his painful personal history and the ravages of postwar Europe.

REVIEW OF RDS PP

- Tis book brings me back to my childhood when I used to help my mother with some recepies. The drawigs and illustrations are still the same! The quality of the ecepies are good, just a few adjustments (normal) had to be made to adapt to my kitchen

routine.

- I just had a few miscellaneous comments on this book. Although this book isn't so much about Feynman's last trip as about the trials and tribulations he and his longtime friend Leighton experienced trying to get there, this was still an enjoyable book. Feynman himself passed away from cancer shortly before they got permission to actually travel to Tuva, a remote region of Mongolia near the Altai mountains, a 10,000-foot-high mountain range that separates eastern Mongolia from western China. But because of his illness, Feynman himself isn't so much the protagonist in this story so much as the inspiration, as Leighton discusses the research and preparations that led up to the final journey. But there is still enough of the inimitable Feynman, the "curious character" as he calls himself, in the narrative for it to be enjoyable to long-time Feynman fans. The pictures of Feynman in an elaborate Tahitian headress playing the drums at a concert and dressed up like a Tibetan lama with hat and prayer wheel are truly comical and show the great physicist certainly had a sense of humour about himself too--even as he was dying from cancer. I came to the book partly because I already knew something about Tuvan throat singing and had read a little bit about Ural-Altaic linguistics, and so knew something about the Mongolian languages, and a little about the life-style of the herders in the area. It turns out the Altaic language group has had some capable linguists studying the family over the last 30 years, and a lot more is known now than in the past. I've found at least one site with much good information on Mongolian and Altaic languages on the web in the last year. But all that was by way of saying, stangely enough, that I actually knew something about this remote and obscure area of the world before reading this book, and so was interested to see what sort of adventures Feynman and his friend might have there. Although Feynman himself never made it there, I learned much about the country I hadn't known before, and having Feynman's unique and funny perspective on it made it all the more enjoyable.
