This volume reviews the historical roots and theoretical foundations of biological systematics in an approachable text. The author outlines the structure and main tasks of systematics. Conceptual history is characterized as a succession of scientific revolutions. The philosophical foundations of systematic research are briefly reviewed as well as the structure and content of taxonomic theories. Most important research programs in systematics are outlined. The book includes analysis of the principal problematic issues as "scientific puzzles" in systematics. This

volume is intended for professional taxonomists, biologists of various specialties, students, as well as all those interested in the history and theory of biology and natural sciences. Key Features
Considers the conceptual history of systematics as the framework of evolutionary epistemology
Builds a hierarchically organized quasi-axiomatic system of taxonomic theory
Contends that more reductionist taxonomic concepts are less objective
Supports taxonomic pluralism by non-classic philosophy of science as a normal condition of systematics
Documents that "taxonomic puzzles" result from conflict between monistic and

pluralistic attitudes

REVIEW OF SHEET MUSIC PIANO SIMON AND GARFUNKEL SOUNDS OF SILENCE

- Story is disjointed and so at times difficult to follow. Character development and story line predictable. Reference to other real and fictional characters over- done, but an interesting idea.

- Charles Dickens, as is his custom, slams into so-called civilized 19th century British industrial scenes in a smoky place called Coketown. He writes with a sharp knife about poverty, hunger, cruel management and lack of compassion. Humor here is on the grim side.
