Bear in mind, reviewing evaluations can help you make informed choices about what to read following and can reveal you to brand-new authors and categories you may not have thought about before.

## **REVIEW OF IPHONE STUCK IN GUIDED ACCESS**

- Set more than 10,000 years in the future, at the edge of a failing galactic

empire, this book isn't a story so much as a series of vignettes spanning decades. The book starts by detailing the effort to create the Foundation, which will try to preserve civilization from total collapse as the Empire continues to decay. With each jump to the future, we see the members of the Foundation confront a series of crises that threaten both the Foundation and the very fabric of civilization. Asimov has done a remarkable job of creating a believable far future, with a human civilization that spans the massive space of the galaxy. His descriptions of the decline of the Empire, and of the resulting chaos at its edges extrapolates nicely from history (particularly the decline of the Roman Empire). Though written half a century ago, very little about this book feels particularly dated, except possibly for the prevalence of characters that smoked. This book deserves its reputation as a science-fiction classic.

- This is a classic series of galaxy rebuilding. These books combine stories that jump hundreds of years to become a history of the Foundation. This is a new and different way to look at science fiction writing that has created many copycats. As the series comes to a close the location of the actual Foundation is moved from planet to planet so many times that the reader is ready for the unexpected twist. Science fiction writing is all about the concept and the Foundation series has a concept that can produce books for years to come.
