The Politics of Everybody examines the production and maintenance of the terms 'man', 'woman', and 'other' within the current political moment; the contradictions of these categories; and the prospects of a Marxist approach to praxis for queer bodies. Few thinkers have attempted to reconcile queer and Marxist analysis. Those who have propose the key contested site to be that of desire/sexual expression. This emphasis on desire, Lewis argues, is symptomatic of the neoliberal project and has led to a continued fascination with the politics of identity. By arguing that Marxist analysis is in fact most beneficial to gender politics within the arena of body production, categorization and exclusion, Lewis develops a theory of gender and the sexed body that is wedded to the realities of a capitalist political economy. Boldly calling for a new, materialist queer theory, Lewis defines a politics of liberation that is both intersectional, transnational, and grounded in lived experience. With a new preface, Lewis discusses the argument for an explicitly Marxist understanding of trans rights - an understanding grounded in solidarity and materialist/scientific queer analysis. She also discusses the new wave of Marxist Social Reproduction Theory that has emerged since the first edition, family abolition, and the complexities of building an internationalist Marxist movement that is in solidarity with queer and trans struggles, attentive to women's realities, and one that refrains from imposing Western definitions (particularly American/Anglo definitions) onto global movements for liberation.

The Routledge Handbook of Heterodox Economics presents a comprehensive overview of the latest work on economic theory and policy from a 'pluralistic' heterodox perspective. Contributions throughout the Handbook explore different theoretical perspectives including: Marxian-radical political economics; Post Keynesian-Sraffian economics; institutionalist-evolutionary economics; feminist economics; social economics; Régulation theory; the Social Structure of Accumulation approach; and ecological economics. They explain the structural properties and dynamics of capitalism, as well as propose economic and social policies for the benefit of the majority of the population. This book aims, firstly, to provide realistic and coherent theoretical frameworks to understand the capitalist economy in a constructive and forward-looking manner. Secondly, it delineates the future directions, as well as the current state, of heterodox economics, and then provides both 'heat and light' on controversial issues, drawing out the commonalities and differences among different heterodox economic approaches. The volume also envisions transformative economic and social policies for the majority of the population and explains why economics is, and should be treated as, a social science. This Handbook will be of compelling interest to those, including students, who wish to learn about alternative economic theories and policies that are rarely found in conventional economics textbooks or discussed in the mainstream media, and to critical economists and other social scientists who are concerned with analyzing pressing socio-economic issues.

Marx in the Field is a unique edited collection illustrating the relevance of the Marxian method to study contemporary capitalism and the global development process. Essays in the collection bring Marx 'to the field' in three ways. They illustrate how Marxian categories can be concretely deployed for field research in the global economy; they analyse how these categories may be adapted during fieldwork; and they discuss data collection methods supporting Marxian analysis. Crucially, many of the contributions expand the scope of Marxian analysis by combining its insights

with those of other intellectual traditions, including radical feminisms, critical realism and postcolonial studies. The volume defines the possibilities and challenges of fieldwork guided by Marxian analysis, including those emerging from the COVID-19 pandemic. The collection takes a global approach to the study of development and of contemporary capitalism. While some essays focus on themes and geographical areas of long-term concern for international development - like informal or rural poverty and work across South Asia, Southern and West Africa, or South America - others focus instead on actors benefitting from the development process - like regional exporters, larger farmers, and traders - or on unequal socio-economic outcomes across richer and emerging economies and regions - including Gulf countries, North America, Southern Europe, or Post-Soviet Central Asia and Eastern Europe. Some essays explore global processes cutting across the world economy, connecting multiple regions, actors and inequalities. While some of the contributions focus on classic Marxian tropes in the study of contemporary capitalism - like class, labour and working conditions, agrarian change, or global commodity chains and prices - others aim at demonstrating the relevance of the Marxian method beyond its traditional boundaries - for instance, for exploring the interplays between food, nutrition and poverty; the links between social reproduction, gender and homework; the features of migration and refugees regimes, tribal chieftaincy structures or prison labour; or the dynamics structuring global surrogacy. Overall, through the analysis of an extremely varied set of concrete settings and cases, this volume illustrates the extraordinary insights we can gain by bringing Marx in the field.

Women and Revolution BRILL

Written by leading authorities from Europe, the Americas and Asia, this path-breaking work develops an innovative and original theorization of global political economy. Whilst most approaches theorize global political economy from the perspectives of power and production or states and markets, this work argues that what feminists call social reproduction is a more basic framework, upon which most forms of power and production, and states and markets, must necessarily rest. By combining Feminist and Radical Political Economy with Critical International Studies, the volume explores how global transformations of states, growth in the power of capital, and extension of market values and market forces in everyday life, all affect the security of the majority of the population, and the reproduction of communities and societies. The book shows how public and private forms of power regulate three main aspects of social reproduction: biological reproduction; reproduction of labour power; and social practices connected to caring and provisioning of human needs.

Recommended by The Nation, the New Republic, Current Affairs, Bustle, In These Times "Entertaining, tough-minded, strenuously argued." —The Nation A thrilling and timely account of ten moments in history when labor challenged the very nature of power in America, by the author called "a brilliant historian" by The Progressive magazine Powerful and accessible, A History of America in Ten Strikes challenges all of our contemporary assumptions around labor, unions, and American workers. In this brilliant book, labor historian Erik Loomis recounts ten critical workers' strikes in American labor history that everyone needs to know about (and then provides an annotated list of the 150 most important moments in American labor history in the appendix). From the Lowell Mill Girls strike in the 1830s to Justice for Janitors in 1990, these labor uprisings do not just reflect the times in which they occurred, but speak directly to the present moment. For example, we often think that Lincoln ended slavery by proclaiming the slaves emancipated, but Loomis shows that they freed themselves during the Civil War by simply withdrawing their labor. He shows how the hopes and aspirations of a generation were made into demands at a GM plant in Lordstown in 1972. And he takes us to the forests of the Pacific Northwest in the early nineteenth century where the radical organizers known as the Wobblies made their biggest inroads against the power of bosses. But there were also moments when the movement was crushed by corporations and the government; Loomis helps us understand the present perilous condition of American workers and draws lessons from both the victories and defeats of the past. In crystalline narratives, labor historian Erik Loomis lifts the curtain on workers' struggles, giving us a fresh perspective on American history from the boots up. Strikes include: Lowell Mill Girls Strike (Massachusetts, 1830–40) Slaves on Strike (The Confederacy, 1861–65) The Eight-Hour Day Strikes (Chicago, 1886) The Anthracite Strike (Pennsylvania, 1902) The Bread and Roses Strike (Massachusetts, 1912) The Flint Sit-Down Strike (Michigan, 1937) The Oakland General Strike (California, 1946) Lordstown (Ohio, 1972) Air Traffic Controllers (1981) Justice for Janitors (Los Angeles, 1990)

Revolutionary Rehearsals in the Neoliberal Age Routledge

This ambitious volume examines revolutionary situations during a non-revolutionary historical conjuncture--the neoliberal era. The last three decades have seen an increase in the number of political upheavals that challenge existing power structures, many of them taking the form of urban revolts. This book compellingly explores a series of such upheavals--in Eastern Europe, South Africa, Indonesia, Argentina, Bolivia, Venezuela, sub-Saharan Africa (including Congo, Zimbabwe, Burkina Faso) and Egypt. Each chapter studies the ways in which protest movements developed into insurgent challenges to state power, and the strategies that regimes have deployed to contain and repress revolt. In addition to empirical chapters, the book engages in theorization of revolution, dealing with questions such as the patterning of revolution in contemporary history, the relationship between class struggle and social movements, and the prospects of socialist revolution in the twenty-first century.

Using a feminist political economy approach, contributors document the impact of current socio-economic policies on states, markets, households, and communities. Relying on impressive empirical research, they argue that women bear the costs of and responsibility for care-giving and show that the theoretical framework provided by feminist analyses of social reproduction not only corrects the gender-blindness of most economic theories but suggests an alternative that places care-giving at its centre. In this illuminating study, they challenge feminist scholars to re-engage with materialism and political economy to engage with feminism.

These feminist Marxist and anti-racist essays speak to important current political issues. Though they begin from experiences of non-white people living in Canada, they provide a critical theoretical perspective capable of exploring similar issues in other Western and Third World countries. This reading of difference includes and extends beyond the cultural and the discursive into political economy, state and ideology. It cuts through the

conventional paradigms of current debates on multiculturalism. These essays take up in particular the notion of Canada--as the nation and the state--as an unsettled ground of contested hegemonies. They particularly draw attention to how the state of Canada is an unfinished one, and how the discourse of culture helps it to advance the legitimation claim needed by any state, especially one arising in a colonial context, with unsolved nationalist problems. The myth of the "two founding peoples," Anglo and Francophone, conveniently ignored the reality of First Nations. More recently, it has also ignored the entrance of non-European immigrants, who may have a history of being indentured and politically marginalized and have just begun struggling for political enfranchisement in their new homeland.

Winner of the Working-Class Studies Association C.L.R. James Award Seen as a pioneering figure in the critical study of whiteness, US historian David Roediger has sometimes received criticism, and praise, alleging that he left Marxism behind in order to work on questions of identity. This volume collects his recent and new work implicitly and explicitly challenging such a view. In his historical studies of the intersections of race, settler colonialism, and slavery, in his major essay (with Elizabeth Esch) on race and the management of labor, in his detailing of the origins of critical studies of whiteness within Marxism, and in his reflections on the history of solidarity, Roediger argues that racial division is part of not only of the history of capitalism but also of the logic of capital.

Named one of Vogue's "Most Anticipated Books of 2019" This is a manifesto for the 99 percent Unaffordable housing, poverty wages, inadequate healthcare, border policing, climate change—these are not what you ordinarily hear feminists talking about. But aren't they the biggest issues for the vast majority of women around the globe? Taking as its inspiration the new wave of feminist militancy that has erupted globally, this manifesto makes a simple but powerful case: feminism shouldn't start—or stop—with the drive to have women represented at the top of their professions. It must focus on those at the bottom, and fight for the world they deserve. And that means targeting capitalism. Feminism must be anticapitalist, eco-socialist and antiracist.

We are in the midst of a global crisis of care. How do we get out of it? The Care Manifesto puts care at the heart of the debates of our current crisis: from intimate care--childcare, healthcare, elder care--to care for the natural world. We live in a world where carelessness reigns, but it does not have to be this way. The Care Manifesto puts forth a vision for a truly caring world. The authors want to reimagine the role of care in our everyday lives, making it the organising principle in every dimension and at every scale of life. We are all dependent on each other, and only by nurturing these interdependencies can we cultivate a world in which each and every one of us can not only live but thrive. The Care Manifesto demands that we must put care at the heart of the state and the economy. A caring government must promote collective joy, not the satisfaction of individual desire. This means the transformation of how we organise work through co-operatives, localism and nationalisation. It proposes the expansion of our understanding of kinship for a more 'promiscuous care'. It calls for caring places through the reclamation of public space, to make a more convivial city. It sets out an agenda for the environment, most urgent of all, putting care at the centre of our relationship to the natural world.

Since the onset of global crisis in recent years, academics and economic theorists from various political and cultural backgrounds have been drawn to Marx's analysis of the inherent instability of capitalism. The rediscovery of Marx is based on his continuing capacity to explain the present. In the context of what some commentators have described as a "Marx renaissance", the aim of this book is to make a close study of Marx's principal writings in relation to the major problems of our own society, and to show why and how some of his theories constitute a precious tool for the understanding and critique of the world in the early twenty-first century. The book brings together varied reflections on the Marxian oeuvre, drawing on different perspectives and fields, and argues its case in two different parts. The first will encompass such diverse areas and themes as political thought, economics, nationalism, ethnicity, post-capitalist society, freedom, democracy, emancipation, and alienation, showing in each case how Marx has still today an invaluable contribution to make. The second presents a complete and rigorous account of the dissemination and the reception of Marx's work throughout the world in the last decade. Both parts make a significant contribution to the current research on Marx and Marxisms. This book was originally published as a special issue of *Socialism and Democracy*.

A Discussion of the Unhappy Marriage of Marxism and Feminism

With #metoo dominating headlines and an unprecedented number of women running for office, the fight for women's equality has perhaps never been higher on the political agenda. Around the world, women are fighting against unfair working conditions, restrictive abortion laws, and the frayed social safety net. The same holds true within the business world--but there's a twist: even as some women argue that pushing for more female CEOs would help the struggle for equality, other activists argue that CEOs themselves are part of the problem, regardless of gender. In *Feminist Thinking about Work*, Susan Ferguson explores the history of feminist discourse, examining the ways in which feminists have conceptualized women's work and placed labor, and its reproduction, at the heart of their program for emancipation. Engaging with feminist critiques of work, Ferguson argues that women's emancipation depends upon a reorganization and radical reimagining of all labor, and advocates for an inclusive politics that reconceptualizes women's work and work in general.

A Mariarosa Dalla Costa Reader

This book seeks to politicize and collectivise the issue of debt from a feminist perspective. Examining the intimate connection between gender-based violence and exploitation through debt, the authors argue that there is no universal debtor-creditor relationship. Debt cannot be separated from concrete situations because rather than homogenizing differences in gender, race and location, debt exploits these distinctions. This work seeks to expand and deepen our understandings of finance and reproduction, as well as provide useful accounts of how to resist debt from some of those most affected. The book includes five interviews with women from different organizations in Argentina and Brazil. These interviews draw a map of contemporary forms of exploitation, showing how different women are affected by debt, how they connect financial violence to other forms of gender violence, and how they resist the subjugation that debt seeks to impose on them. The book concludes with a series of manifestos coming out of the Argentine feminist movement that demonstrate this feminist reading of debt.

REVIEW OF SOCIAL REPRODUCTION THEORY REMAPPING CLASS RECENTERING OPPRESSION

• How could this book get anything less than five stars. It is so spectacular and vast that I don't know how you could not be sucked into the adventure of some of the most likeable heroes and evil villains ever created. The movie was fabulous, but nothing, nothing can compare to the book. The return of the king follows the last adventure of the fellowship of the ring, tells of the destruction of the ring of power, and the return of the king of men. Tolkien's long running devotion to middle earth is unrivaled by any other author in the history of literature. Some may say that the book isn't as good as some crappy classic that everyone ends up reading, but it is, by all means the best work ever put onto paper. Never eill a book this spectacular be put out again. Tolkien has created a legacy that will still being read and loved over one hundred years from now. I think it will live on longer than any book in existence. The return of the king is the final book in the trilogy that will never be topped by any fantasy novel. The best book in the best fantasy story ever written. Anyone who thinks Harry Potter is better than this should be shot, and would be if it were up to me, but fortunately for a lot of stupid kids, its not. Jerks. The return of the king expands and improves upon what has always been a fantastic adventure. If you havn't read the book yet, then get into your car right now, and go buy it. You won't regret it. Thats a guarantee.

• One might well worry that such an epic as The Lord of The Rings, such a universe as Middle Earth, such a wonderful series of books, could not possibly come to a satisfying conclusion. You need not be worried. The Return of The King is a masterpiece, as is the series as a whole. It brings the epic series to a grand, satisfying finale. You will not be disappointed. The prose is so immaculate; it's almost like you're reading poetry. I find that Tolkien is alone with this gift in modern literature. It is one of the many tenents that makes The Lord of The Rings one of the unarguable masterpieces of recent literature. This will be around as long as any book of fiction. The ending is bittersweet, and yet touching. It's perfect. There's simply nothing like this series. It's immaculate literature. It's wonderous writing. It's the best high fantasy ever written, period. I reccommend that you start with The Hobbit, and then definately read the first two books in the series, before reading this one. It's the only logical way to do it; you definately don't want to jump right into this one without reading those, as it will not make any sense to you. Read this masterpiece in chronological order. This is one of the greatest testaments to imagination ever published in any form, and The Return of The King is the series's essential grand finale. Also, very interesting to the LOTR fanatic, it contains a wealth of appendices and indexes of characters and place names. Such chronicles as the events preceding and following the series are included, as are a history of the kings, several dissertations on the various languages of Middle Earth (you can actually learn to write in, say, Elvish.) This shows just what an amazing and almost unbelievably large and complex complete universe Tolkien created with the series. It's a deserved acknowledged masterpiece. A must read for anybody, without a doubt. Long after countless other books of the 20th century fictional canon are forgotten, The Lord of The Rings will remain. Mark my words. You owe it to yourself to read this masterpiece of literature.
