LOS ANGELES TIMES BOOK PRIZE WINNER • An MIT astrophysicist reinvents herself in the wake of tragedy and discovers the power of connection on this planet, even as she searches our galaxy for another Earth, in this “bewitching” (Anthony Doerr, The New York Times Book Review) memoir. “Sara Seager’s exploration of outer and inner space makes for a stunningly original memoir.”—Abraham Verghese, author of Cutting for Stone Sara Seager has always been in love with the stars: so many lights in the sky, so much possibility. Now a pioneering planetary

scientist, she searches for exoplanets—especially that distant, elusive world that sustains life. But with the unexpected death of Seager’s husband, the purpose of her own life becomes hard for her to see. Suddenly, at forty, she is a widow and the single mother of two young boys. For the first time, she feels alone in the universe. As she struggles to navigate her life after loss, Seager takes solace in the alien beauty of exoplanets and the technical challenges of exploration. At the same time, she discovers earthbound connections that feel every bit as wondrous, when strangers and loved ones alike reach out to her across the space of her grief.

Among them are the Widows of Concord, a group of women offering advice on everything from home maintenance to dating, and her beloved sons, Max and Alex. Most unexpected of all, there is another kind of one-in-a-billion match, not in the stars but here at home. Probing and invigoratingly honest, *The Smallest Lights in the Universe* is its own kind of light in the dark.

The Beatles Across the Universe Penguin

A New York Times Bestseller From the author of the New York Times bestseller *All the Bright Places* comes a heart-wrenching story about what it means to see someone—and

love someone—for who they truly are. Everyone thinks they know Libby Strout, the girl once dubbed “America’s Fattest Teen.” But no one’s taken the time to look past her weight to get to know who she really is. Following her mom’s death, she’s been picking up the pieces in the privacy of her home, dealing with her heartbroken father and her own grief. Now, Libby’s ready: for high school, for new friends, for love, and for EVERY POSSIBILITY LIFE HAS TO OFFER. In that moment, I know the part I want to play here at MVB High. I want to be the girl who can do anything. Everyone thinks they know Jack Masselin, too. Yes, he’s got swagger, but he’s also mastered the impossible art of giving

people what they want, of fitting in. What no one knows is that Jack has a newly acquired secret: he can't recognize faces. Even his own brothers are strangers to him. He's the guy who can re-engineer and rebuild anything in new and bad-ass ways, but he can't understand what's going on with the inner workings of his brain. So he tells himself to play it cool: Be charming. Be hilarious. Don't get too close to anyone. Until he meets Libby. When the two get tangled up in a cruel high school game—which lands them in group counseling and community service—Libby and Jack are both pissed, and then surprised. Because the more time they spend together,

the less alone they feel. . . . Because sometimes when you meet someone, it changes the world, theirs and yours. Jennifer Niven delivers another poignant, exhilarating love story about finding that person who sees you for who you are—and seeing them right back. "Niven is adept at creating characters. . . . [Libby's] courage and body-positivity make for a joyful reading experience." -- The New York Times "Holding Up the Universe . . . taps into the universal need to be understood. To be wanted. And that's what makes it such a remarkable read." -- TeenVogue.com, "Why New Book Holding Up the Universe Is the Next The Fault in Our Stars"

The Ape that Understood the Universe is the story of the strangest animal in the world: the human animal. It opens with a question: How would an alien scientist view our species? What would it make of our sex differences, our sexual behavior, our altruistic tendencies, and our culture? The book tackles these

issues by drawing on two major schools of thought: evolutionary psychology and cultural evolutionary theory. The guiding assumption is that humans are animals, and that like all animals, we evolved to pass on our genes. At some point, however, we also evolved the capacity for culture - and from that moment, culture began evolving in its own right. This transformed us from a mere ape into an ape capable of reshaping the planet, travelling to other worlds, and understanding the vast universe of which we're but a tiny, fleeting fragment.  his death! John Lennon
 is speaking from the
 other side through a
 number of channels
 that share his vision of

a world without war. Now imagine that John actually contacted two different channels living in two different countries, for a single purpose-imagine that! This book is a collection of messages-from the greatest songwriter and musician of the 20th century, John Lennon, as channeled by Marcia McMahan. She was then led to host a radio show and work collaboratively with Robert Murray a friend and channel. Marcia was beginning to "hear" lyrics from John at the same time! John Lennon began his contact with Marcia McMahan some ten years ago while she was working on a painting. She had been a channel/medium for many years previously and heard from Princes

Diana on the other side. This contact was her first message from John Lennon and his presence was unmistakable. Sample excerpt: Message from John Lennon on Music and Creativity. Channeled sometime in 2003. John: Be glad you're still in the flesh. We make great music here but there are no producers to get it out. You'll get the word out; the world is ready for your message. It wasn't ready for mine, but you know it's the same message: LOVE! Marcia: Thank you, John. I am very honored. John: We're trying to spare you your self-imposed suffering, the idea that your words of Princess Diana and Mother Teresa won't be listened to. That's all nonsense going round

in your pretty little head. You are a great channel, and we're happy for you. You don't know how lucky you are! Marcia: Again, John, thank you. John: You're welcome. And remember to listen to old Beatles songs. There's a great deal of wisdom there. Marcia: Oh, I do and I will. I've always loved you and the Beatles. John: See, I told you it would happen!

REVIEW OF ACROSS THE UNIVERSE

- for introducing Eastern dance to America in the late 19th century at the Columbian Exposition in Chicago in 1893. The various dances performed by Middle Eastern peoples shocked prim middle class Americans with their sensual body movements and their dress. American dance

at the time were very stiff and formal, stifling spontaneity, sensuality, and expression. Also, many moralists of the time consider such sensual dancing highly pornographic and sought to have them censored or banned in many communities. It's similar to the shock some people have when a prominent entertainer ripped the bodice of a singer at a Superbowl halftime performance a few years back. Likewise, "Little Egypt," as many Middle Eastern dancers were often called, caused a sensation throughout America. Belly dancing is still controversial in many places in America because of its association with "exotic dancing." Many

dancers are denied permission to dance at festivals and cultural events because of such associations. Little Egypt is crucial to understanding why so many people still associate belly dancing with stripping.

Linear time is not important and the jump cut is used profusely, one brief scene from the past or future inserted in the middle of a contemporaneous scene. At first it is very confusing but after a while one must simply go with the flow and let the novel's projector run until the characters are sorted out and their stories told.
