## REVIEW OF QUANTUM MECHANICS A TEXTBOOK FOR UNDERGRADUATES

- What kind of life would you want to live? one where you are Happy and Stable or one filled with Truth and Beauty assuming that you cannot have one while the other is in place you must make your choice. society chooses with the mind, the logical choice is happiness and stability, so as society has now built

its entire structure around this core value there is no more art love poetry music passion there is only an empty feeling of satisfaction and contentment the world is full of light, but there is no darkness for which to dwell and rest, there is no pain and suffering, no crying no starvation, there is only life, and death This is Brave New World recommended to anyone wishing to find the truths in this world perpetuated into cheap thrills and empty passions.

- The dystopian society in Huxley's Brave New World combines the iron-clad totalitarian control of 1984 with the intellectually and emotionally stunted hedonism of Fahrenheit 451 for a uniquely unsettling effect. Set roughly 600 years into the future, Brave New

World portrays a world ruled by a single totalitarian government. The society is organized in a strict caste system, with the physically perfect Alpha intellectuals ruling the world at the top and physically and mentally stunted Epsilon menial workers at the bottom. Families have been abolished and reproduction takes place in laboratories. The embryos are manipulated to produce predetermined mental and physical effects, and the resulting children are carefully psychologically conditioned to accept their lot. The story begins with Bernard Marx, an Alpha caste misfit who is wildly torn between his conflicting desires to rebel and to conform. Bernard makes a visit to a Native American reservation where he meets Linda, an English woman who had accidentally been

abandoned on the reservation many years before, and her son John. Bernard offers to take them back to England, where John becomes an instant celebrity due to his "savage" ways. At this point the focus shifts to John, who challenges the society with his intense emotions and ideals. The somewhat abrupt shift away from Bernard and towards John is symptomatic of the simple fact that Huxley is less interested in the characters and the plot than in describing his hypothetical society. Luckily, his vision is disturbing enough to be interesting on its own. In the brave new world consumerism, sociability, sexual promiscuity, and psychotropic drugs are all compulsory. Individuality and emotional passions of any kind are relentlessly squashed. The situation is all

the more disturbing in that the control is so insidious that most of the people are simply unable to imagine a different life. *BNW* is about the limitations we accept because we don't realize that alternatives exist. Like many readers, I first encountered *BNW* as required reading in high school. One brief scene managed to stick with me in the many years between my readings: it is a scene where a group of low caste babies are given picture books and flowers, then exposed to loud sirens and electroshock to condition them against these undesirable interests. The brutal killing of innocent curiosity and the thought of all joy in books and nature being wiped out in infancy made a powerful impression on me. The descriptions of the intensive conditioning of the children

and the adults' total acceptance of the forces that stunted them was and still remains for me one of the most chilling parts of the novel. There are many criticisms that can be leveled at the novel. For myself, I found Huxley's prose rather uninspiring. More problematic to me was that although Huxley establishes stark contrasts between the "savages" and the "civilized" peoples in the story, neither society is an attractive place to live. John's reservation is cut off from the outside world by an electrified fence, and the people living there have no apparent access to modern science or technologies. Whereas the civilized world is overrun with mechanization and artifice, the reservation is overrun with disease and deprivation. John's society, like the civilized society, has no

tolerance for non-conformists, and John's violent reactions to civilized society show his inability to step outside of his own cultural conditioning. The result is a depressing false choice between extremes. To be fair, Huxley himself admitted this weakness. My edition includes a forward where he notes the

unrelenting pessimism of these alternatives and regrets that he did not include a third option. For all of its weaknesses, though, BNW remains a strikingly eerie novel, a gross exaggeration of trends that are a little too real to ignore.
