Recent progress and challenges ahead Oxford University Press

Competition between firms is usually the most effective way of delivering economic efficiency and what consumers want. However, there is a balance to be struck. Firms must not be over-regulated and so hampered in their development of innovative products and new strategies to compete for customers. Nor must they be completely free to satisfy a natural preference for monopoly, which would give them higher profits and a quieter life. The economic role of competition policy (control of anticompetitive agreements, mergers and abusive practices) is to maintain this balance, and an effective policy requires a nuanced understanding of the economics of industrial organization. Cases in European Competition Policy demonstrates how economics is used (and sometimes abused) in competition cases in practical competition policy across Europe. Each chapter summarizes a real case investigated by the European Commission or a national authority, and provides a critique of key aspects of the economic analysis.

Text, Cases & Materials Bloomsbury Publishing

Succinct and concise, this textbook covers all the procedural and substantive aspects of EU competition law. It explores primary and secondary law through the prism of ECJ case law. Abuse of a dominant position and merger control are discussed and a separate chapter on cartels ensures the student receives the broadest possible perspective on the subject. In addition, the book's consistent structure aids understanding: section summaries underline key principles, questions reinforce learning and essay discussion topics encourage further exploration. By setting out the economic principles which underpin the subject, the author allows the student to engage with the complexity of competition law with confidence. Integrated examples and an uncluttered writing style make this required reading for all students of the subject.

Making and Managing Markets Cambridge University Press

Document from the year 2017 in the subject Law - Civil / Private /

Trade / Anti Trust Law / Business Law, grade: A, , language: English, abstract: The major problem associated with the regulation of transnational mergers, which affect several national markets, is the allocation of jurisdiction. Each country concerned may wish to exert jurisdiction and apply its national competition law to regulate the anti-competitive effects a merger may have in its territory. However, this approach may lead to risks of inconsistent decisions regarding the legality of mergers. Indeed, the national competition laws applied by the regulating authorities may diverge in several aspects, which raise the likelihood of inconsistency. The authors advocates the creation of an international merger control framework (IMCF) for the regulation of transnational mergers. This framework will rest on an informal and a formal pillar. The former includes non-legally binding competition principles. Consistency of these principles with the concepts of legitimacy and efficiency, as well as the presence of peer reviews and assistance programmes, should lower the risk of non-implementation. The formal pillar includes bilateral cooperation agreements which apply to merger affecting the countries which have concluded the agreements. As essential pre-condition for the application of bilateral agreements, the level of cooperation achieved by such agreements should be at least equal to that ensured by the informal pillar. The last part of the study addresses and examines the long and complex processes in merger and acquisition (M&A) transactions. M&A arbitration faces certain difficulties during the transaction. Such difficulties the author seeks to underline. Two main problems of arbitration in M&A transactions, particularly, have been covered. Firstly, the problem of consent in consolidation of parallel proceedings during M&A transactions, and, secondly parties' consent that validate arbitration agreements/clauses in "assignment" or "succession" after M&A transactions have been completed. The author also tries to clarify the content of consent of parties to a transaction. Finally, a criticism of parallel proceedings is enhanced.

Comparative and Theoretical Perspectives Kluwer Law International B.V.

Niamh Dunne undertakes a systematic exploration of the relationship between competition law and economic regulation as legal mechanisms of market control. Beginning from a theoretical assessment of these legal instruments as discrete mechanisms, the author goes on to address numerous facets of the substantive interrelationship between competition law and economic regulation. She considers, amongst other aspects, the concept of regulatory competition law; deregulation, liberalisation and 'regulation for competition'; the concurrent application of competition law in regulated markets; and relevant institutional aspects including market study procedures, the distribution of enforcement powers between competition agencies and sector regulators, and certain legal powers that demonstrate a 'hybridised' quality lying between competition law and economic regulation. Throughout her assessment, Dunne identifies and explores recurrent considerations that inform and shape the optimal relationship between these legal mechanisms within any jurisdiction.

Competition Law in Brazil Edward Elgar Publishing

Standardisierung ist ein wesentliches Instrument zur Förderung von Innovation und Wettbewerb, was wiederum sowohl Verbrauchern als auch Unternehmen zu Gute kommt. Doch aufgrund der Tatsache, dass die Normen in der Regel durch Standardessentielle Patente (SEP) geschützt sind, kann die Standardisierung den Zugriff auf die Technologie behindern und denjenigen den Eintritt in den Markt erschweren, die nicht Patentinhaber sind. Normungsorganisationen (SSPs) haben die Aufgabe das Gleichgewicht zwischen den Patentinhabern und den Nutzern herzustellen. Die Patentinhaber sollen von den Nutzern eines Standards Gebühren erhalten, die die Akzeptanz des Standards nicht unnötig gefährden. Recht häufig kommt es zu kostspieligen und zeitraubenden Rechtsstreitigkeiten, weil die Parteien nicht in der Lage sind, angemessene und nicht diskriminierende Lizenzbedingungen (FRAND) zu vereinbaren. Eine solche Situation behindert zwangsläufig die Umsetzung der standardisierten Technologie und führt zu der Frage, welche Funktion die SSOs während des Standardisierungsprozesses und bei der Festlegung des Standards haben.

REVIEW OF ALISON JONES BRENDA SUFRIN COMPETITION LAW TEXT CASES

- Highly recommended read! The old English takes some time to get used to, but it's so worth it. You'll enjoy!
- I read this in high school because I had to, now, 20 years later, I re-read it because I wanted to and what a difference. Charlotte Bronte's writing style is so wonderful, different and refreshing. Her descriptions are so vivid, I can see why she caused such controversy in her day! This novel is honest, compelling and Jane is way ahead of her time, as Charlotte must have been. This has sparked me to dive headfirst into more classics and see what truly makes them classic. I would really recommend this for summer vacation at the beach, or curled up in a storm.
