"For the third time in three decades world leaders reaffirmed their promise of "Education For All" when adopting Sustainable Development Goal 4 in 2015. It is the most far-reaching commitment to quality and equity in education so far, yet, there is no consensus on what the agenda means in practice. With a decade left until the 2030 deadline, Grading Goal Four calls upon the education community to engage more thoughtfully and critically with SDG 4 and related efforts. As an ever-growing number of actors and initiatives claim to contribute to its achievement, it is becoming clear that the ambitious but broad priorities within the goal are vulnerable to cherry-picking and misrepresentation, placing it at the heart of tensions between instrumentalist and rights-based approaches to education. This text, a critical analysis of SDG 4, provides a framework for examining trends and developments in education globally. As the first volume that examines early implementation efforts under SDG 4, Grading Goal Four formulates a critique along with strategies for moving forward. By scrutinising the challenges, tensions and power dynamics shaping SDG 4, it advances rights-based perspectives and strategies for effective implementation and builds capacity for strengthened monitoring and analysis of the goal"--

In 2011 the World Bank—with funding from the Bill and Melinda Gates Foundation—launched the Global Findex database, the world's most comprehensive data set on how adults save, borrow, make payments, and manage risk. Drawing on survey data collected in collaboration with Gallup, Inc., the Global Findex database covers more than 140 economies around the world. The initial survey round was followed by a second one in 2014 and by a third in 2017. Compiled using nationally representative surveys of more than 150,000 adults age 15 and above in over 140 economies, *The Global Findex Database 2017: Measuring Financial Inclusion and the Fintech Revolution* includes updated indicators on access to and use of formal and informal financial services. It has additional data on the use of financial technology (or fintech), including the use of mobile phones and the Internet to conduct financial transactions. The data reveal opportunities to expand access to financial services among people who do not have an account—the unbanked—as well as to promote greater use of digital financial services among those who do have an account. The Global Findex database has become a mainstay of global efforts to promote financial inclusion. In addition to being widely cited by scholars and development practitioners, Global Findex data are used to track progress toward the World Bank goal of Universal Financial Access by 2020 and the United Nations Sustainable Development Goals. The database, the full text of the report, and the underlying country-level data for all figures—along with the questionnaire, the survey methodology, and other relevant materials—are available at [www.worldbank.org/globalfindex](http://www.worldbank.org/globalfindex).

The book describes the difficulties of the current international corporate income tax system. It starts by describing its origins and how changes, such as the development of multinational enterprises and digitalization have created fundamental problems, not foreseen at its inception. These include tax competition—as governments try to attract tax bases through low tax rates or incentives, and profit shifting, as companies avoid tax by reporting profits in jurisdictions with lower tax rates. The book then discusses solutions, including both evolutionary changes to the current system and fundamental reform options. It covers both reform efforts already under way, for example under the Inclusive Framework at the OECD, and potential radical reform ideas developed by academics.

Although we have been successful in our careers, they have not turned out quite as we expected. We both have changed positions several times-for all the right reasons-but there are no pension plans vesting on our behalf. Our retirement funds are growing only through our individual contributions. Michael and I have a wonderful marriage with three great children. As I write this, two are in college and one is just beginning high school. We have spent a fortune making sure our children have received the best education available. One day in 1996, one of my children came

home disillusioned with school. He was bored and tired of studying. "Why should I put time into studying subjects I will never use in real life?" he protested. Without thinking, I responded, "Because if you don't get good grades, you won't get into college." "Regardless of whether I go to college," he replied, "I'm going to be rich."

#### **REVIEW OF PERSONAL FINANCE CHAPTER 8**

- The first time I read this book I was in the sixth grade. Since I've read it five times and it grows in depth each time. Lennie and George are two of the most detailed and loved characters. It is one of the most controversial books of our time, for one reason it makes you think.

- John Steinback is famous for writing book that took place during the Great Depression. Steinback's book "Of Mice and Men" is about two men, Lennie and George ,trying to reach their dream of "living off of the fat of the land", in other words they want to own their own land, be their own boss. While trying to reach this goal they run into many problems. Lennie has a problem of touching soft things such as rabbits, and he ends up doin some bad things at Weed and at the new ranch.In my opinion I didn't like this book alot because John steinback likes to describe the setting and i couldn't really picture it very much. Also, the ending of this book was very tragic and sad. I would recommend this book to any age because its a classic story that many people have loved and still rememeber after they read it.
