Mobile Pastoralism and the Formation of Near Eastern Civilizations BRILL

Women's Writing of Ancient Mesopotamia presents fresh and engaging translations of works that were composed or edited by female scribes and elite women of the ancient Near East. These texts provide insight into the social status, struggles, and achievements of women during the earliest periods of recorded human history (c.2300-540 BCE). In three introductory chapters and a concluding chapter, Charles Halton and Saana Svrd provide an overview of the civilization of ancient Mesopotamia and examine gender by analyzing these different kinds of texts. The translations cover a range of genres, including hymns, poems, prayers, letters, inscriptions, and oracles. Each text is accompanied by a short introduction that situates the composition within its ancient environment and explores what it reveals about the lives of women within the ancient world. This anthology will serve as an essential reference book for scholars and students of ancient history, gender studies, and world literature.

Women's Writing of Ancient

Mesopotamia Cengage Learning

First Published in 1982, Iraq: The Contemporary State presents insights into the political, social, and economic developments in Iraq. The author argues that Iraq, is a country which the outside world will need increasingly to understand for the stability of the wider Gulf region. Unlike most Arab oil-producing states, moreover, Iraq has substantial agricultural and hydrocarbon resources. This book covers themes like class determination and state formation in Iraq; developments in the Kurdish Issue; emancipation of Iraqi women; eradication of illiteracy; economic relations between Iraq and other Arab Gulf states; Iraqi oil policy between 1961-1976; and western, Soviet and Egyptian influences on Iraq's development planning. This book is an essential read for scholars and researchers of international relations, West Asian studies, Middle East studies, and international politics.

The Early Neolithic of the Eastern Fertile Crescent Cambridge University Press

The Beans and the Peas: From Orphan to Mainstream Crops presents a comprehensive literature resource on the most important food legume crops previously known as "orphans," but which are increasingly becoming mainstream as their production opportunities have been improved through genetic improvement and biotechnology, and their role as an important nutrient source gains urgency. This book focuses on 12 important food legumes and discusses all relevant

aspects on their economic importance, crop statistics, botany, and their general description. It also provides exhaustive information on plant genetic resources and their use, genetic improvement, resistance to biotic and abiotic stresses, improved varieties, agronomy, seed system, and use of information and communication tools in each individual food legume. Development of innovative biotechnological tools, genetic transformation, and the genome sequencing information has also been covered in each chapter providing the readers with state-of-the-art information on pulses. All chapters have been supported by relevant figures, illustrations, and tables, which make the contents accessible and easy to understand. Each of the chapters has been authored by globally known scientists/researchers presenting up-to-date information on various aspects of food legumes. This book provides a current and comprehensive treatise to the readers and will be tremendously helpful in furthering their academic and research pursuits.

- Provides a single-volume resource on the most important food legumes having a prominent role in food and nutritional security
- Written by experts with a focus on providing foundational information for further research and development
- Presents both theoretical aspects and application-based case studies
- Supported by relevant figures, illustrations, and tables

Studies in Social History R&L Education

A lively global history of the bean reveals the lesser-known controversies attributed to the ubiquitous legume, from Pythagoras's opinion that the bean was the seat of the soul to St. Jerome's forbiddance of their consumption by nuns because of his belief about the

connections between beans and sin. 10,000 first printing.

A Middle East Primer for Students Macmillan Higher Education

Exploring history in global framework, Lockard's *SOCIETIES, NETWORKS, AND TRANSITIONS: A GLOBAL HISTORY*, Fourth Edition, combines the accessibility and cultural richness of a regional approach with the rigor of comparative scholarship. Emphasizing culture, social change, gender issues, economic patterns, science and religion, it helps you unravel the connections, encounters, cooperation and conflicts of world and regional history. The author includes profiles of individuals from various walks of life as well as highlights social life and cultural artifacts such as music, literature and art. Extensively revised, the text incorporates recent scholarship throughout, examines various debates among historians and explains how historians use original documents. Insightful questions help you reflect on the historical significance of text material -- and how it relates to you. W. W. Norton & Company

Issawi provides the first comprehensive history and economic analysis of the region encompassing Iraq, Syria, Lebanon, Israel, Jordan, and a small part of Turkey.

The British Empire in the Middle East, 1945-1951 Oxford University Press on Demand

We are what we eat: this aphorism contains a profound truth about civilization, one that has played out on the world historical stage over many

millennia of human endeavor. Using the colorful diaries of a sixteenth-century merchant as a narrative guide, *Empires of Food* vividly chronicles the fate of people and societies for the past twelve thousand years through the foods they grew, hunted, traded, and ate—and gives us fascinating, and devastating, insights into what to expect in years to come. In energetic prose, agricultural expert Evan D. G. Fraser and journalist Andrew Rimas tell gripping stories that capture the flavor of places as disparate as ancient Mesopotamia and imperial Britain, taking us from the first city in the once-thriving Fertile Crescent to today's overworked breadbaskets and rice bowls in the United States and China, showing just what food has meant to humanity. Cities, culture, art, government, and religion are founded on the creation and exchange of food surpluses, complex societies built by shipping corn and wheat and rice up rivers and into the stewpots of history's generations. But eventually, inevitably, the crops fail, the fields erode, or the temperature drops, and the center of power shifts. Cultures descend into dark ages of poverty, famine, and war. It happened at the end of the Roman Empire, when slave plantations overworked Europe's and Egypt's soil and drained its vigor. It happened to the Mayans, who abandoned their great cities during centuries of drought. It happened in the fourteenth century, when medieval societies crashed in famine and plague, and again in the nineteenth century, when catastrophic colonial schemes plunged half the world into a poverty from which it has never recovered. And today, even though we live in an age of astounding agricultural productivity and genetically modified crops, our food supplies are once again in peril. Empires

of Food brilliantly recounts the history of cyclic consumption, but it is also the story of the future; of, for example, how a shrimp boat hauling up an empty net in the Mekong Delta could spark a riot in the Caribbean. It tells what happens when a culture or nation runs out of food—and shows us the face of the world turned hungry. The authors argue that neither local food movements nor free market economists will stave off the next crash, and they propose their own solutions. A fascinating, fresh history told through the prism of the dining table, *Empires of Food* offers a grand scope and a provocative analysis of the world today, indispensable in this time of global warming and food crises.

Societies, Networks, and Transitions: A Global History Springer

Exploring history in global framework, Lockard's *SOCIETIES, NETWORKS, AND TRANSITIONS, VOLUME I: TO 1500: A GLOBAL HISTORY*, Fourth Edition, combines the accessibility and cultural richness of a regional approach with the rigor of comparative scholarship. REVIEW OF CHAPTER 2 THE FERTILE CRESCENT

- I highly recommend this book for anyone familiar with Tim's music. To get the most out of the book, you should be intimately familiar with the majority of it, if not all. His life and music encapsulates so much of what was beautiful and painful about the philosophical and psychological changes of the 60s and 70s seen and heard on this deeply

personal level. If you appreciate what he is trying to do and communicate, you will like a lot of his work. If not, maybe it's not for you...

- As some people would say that this book wasn't entertaining, I would have to agree- to a certain extent. Although I thought this book was tedious in some places, such as Xenocide, this did have

many enthralling parts in it and I think that the things that happened to the characters in this book makes it worth reading. I did find the book slow in some parts but very entertaining on the whole. I gave it four stars because I am judging it against Ender's Game, and it didn't measure up to the overall depth to Ender's Game.
