Introduction to Networks Companion Guide is the official supplemental textbook for the Introduction to Networks course in the Cisco® Networking Academy® CCNA® Routing and Switching curriculum. The course introduces the architecture, structure,

functions, components, and models of the Internet and computer networks. The principles of IP addressing and fundamentals of Ethernet concepts, media, and operations are introduced to provide a foundation for the curriculum. By the end of the course, you will be able to build simple LANs, perform basic configurations for routers and switches, and implement IP addressing schemes. The Companion Guide is designed as a portable desk reference to use anytime, anywhere to reinforce the material from the course and organize your time. The book's features help you focus on important concepts to succeed in this course: Chapter Objectives-Review core concepts by answering the focus questions listed at the beginning of each chapter. Key Terms-Refer to the lists of networking vocabulary introduced and highlighted in context in each chapter. Glossary-Consult the comprehensive Glossary with more than 195 terms. Summary of Activities and Labs-Maximize your study time with this complete list of all associated practice exercises at the end of each chapter. Check Your Understanding-Evaluate your readiness with the end-of-chapter questions that match the style of questions you see in the online course quizzes. The answer key explains each answer. REVIEW OF CCNA PACKET TRACER LAB

- I do not know if my opinion is what you are looking for. I own all of the Nero Wolfe books and have read and reread every one of them numerous times. I evidently like the way they are written because, from a purely personal stand point, I do not like either of the two main characters, and in real life would want no part of them. This may be a reason for someone else to love and admire them but I think you have to love New York

and it's style of living and attitudes. I don't. Never the less because, in my opinion, the stories are so well told and the characters are so well defined, they overcome my personal dislike of the people. I admire the talent of the man writing the stories. Wolfe is a self centered, Opinionated egomaniac with no sense of humor and a total disregard for convention. He uses words that are only useful to the curious because they will look them up and increase their vocabulary which in turn may increase their ability to work cross word puzzles, because those words are not used in normal discourse. The thing that constantly amazes me is, that with so many things about the two lead characters that I don't like, I continue to read the stories over and over again. The technical aspects are not my concern, mostly I read for relaxation and enjoyment I am not looking for education, morals or religion, just enjoyment, and Rex Stout, with whom I disagree in most philosophical areas, particularly politics, has the ability to enchant me with something that makes me forget that I don't like him and read another of his tales, again. I am 85 years old and somewhat of a puritan, I know all the dirty words and have used them to good effect at times, but not in mixed company and not in print, so if you want the tough talking, hard boiled wiseguy who has a vocabulary of nothing but four letter words, Nero Wolfe is not your meat. These stories are squeaky clean. There also are some regular characters such as Fritz, Saul and Durkin who are as kind, thoughtful and caring as Wolfe and Goodwin are abrasive. I love all of them.

- This is a book to read aloud to small children, and to have the older brothers and sisters take over reading aloud to

the younger ones. They will all surely fall in love with words and the sounds of words, even nonsense words !
