This extraordinary account of a remarkable journey made in 1933, through Iraq, Iran and Baluchistan (now part of Pakistan) to India is packed full of wonder, adventure, determination and love of travel and motorcycles. But what really sets this book apart are the wonderful descriptions of the people and cultures, now nearly forgotten, yet still hugely relevant in today's age: all brought evocatively to life by the stunning photos from 1933. At that time, the idea of travelling to India on a motorcycle through the Middle East was considered impossible; there were often no roads, not even any paths, and they were attempting to cross the burning deserts in the middle of August, on a tiny two-stroke motorcycle with barely enough power for the bike and rider, let alone a pillion passenger! This book is more than a fantastic adventure; it also offers some perceptive insights into the peoples, places and cultures of the time, as well as being full of drama, both personal and mechanical, as the motorcycle is urged on across the shimmering sands. A true window on the past - and a book which is definitely a 'must have' for all travel and motorcycle enthusiasts.

In the backwoods of Mississippi, a land of honeysuckle and grapevine, Jewel and her husband, Leston, are truly blessed; they have five fine children. When Brenda Kay is born in 1943, Jewel gives thanks for a healthy baby, last-born and most welcome. Jewel is the story of how quickly a life can change; how, like lightning, an unforeseen event can set us on a course without reason or compass. In this story of a woman's devotion to the child who is both her burden and God's singular way of smiling on her, Bret Lott has created a mother-daughter relationship of matchless intensity and beauty, and one of the finest, most indomitable heroines in contemporary American fiction.

Embrace and revel in the stories of the toughest cyclists of all time, told by The Velominati, originators of The Rules. Read and get ready to ride . . . In cycling, suffering brings glory: a rider's value can be judged by their results, but also by their panache and heroism. Prepared to be awed and inspired by Chris Froome riding on at the Tour de France with a broken wrist or Geraint Thomas finishing it with a broken pelvis. In The Hardmen the writers behind cycling superblog Velominati.com and The Rules will tell the stories and illuminate the myths of not just the greatest cyclists ever, but the toughest. From Eddy Merckx to Beryl Burton, and from Marianne Vos to Edwig Van Hooydonk, the book will lay bare the secrets of their extraordinary and inspirational endurance in the face of pain, danger and disaster. After all, suffering is one of the joys of being a cyclist. Embrace climbs, relish the descents, and get ready to harden up. . .

..Alice finally looked around and said, "What's with the murder room?" "The what?" asked Erica.A chair and a small table, isolated in the center of the living room, stood on top of a plastic sheet. Clippers, scissors, and a hand-held mirror rested on the table. At first glance, it looked awfully suspicious. Maybe it was for the best, thought Alice. She had cancer anyway, might as well get it over with in her best friend's murder room...ALICE MORGAN IS different, a fact she's reminded of every time she loses yet another job or another boyfriend. When she thinks it can't get any worse, she finds out she might have breast cancer. Before she even has a chance to come to grips with the diagnosis, she's offered a job and meets a man who might actually like her for who she is.Now what's she supposed to do?

This book is dedicated to Aristid Lindenmayer on the occasion of his 60th birthday on November 17, 1985. Contributions range from mathematics and theoretical computer science to biology. Aristid Lindenmayer introduced language-theoretic models for developmental biology in 1968. Since then the models have been cus tomarily referred to as L systems. Lindenmayer's invention turned out to be one of the most beautiful examples of interdisciplinary science: work in one area (developmental biology) induces most fruitful ideas in other areas (theory of formal languages and automata, and formal power series). As evident from the articles and references in this book, the in terest in L systems is continuously growing. For newcomers the first contact with L systems usually happens via the most basic class of L systems, namely, DOL systems. Here "0" stands for zero context between developing cells. It has been a major typographical problem that printers are unable to distinguish between 0 (zero) and 0 (oh). Thus, DOL was almost always printed with "oh" rather than "zero", and also pronounced that way. However, this misunderstanding turned out to be very fortunate. The wrong spelling "DOL" of "DOL" could be read in the suggestive way: DO L Indeed, hundreds of researchers have followed this suggestion. Some of them appear as contributors to this book. Of the many who could not contribute, we in particular regret the absence of A. Ehrenfeucht, G. Herman and H.A. Maurer whose influence in the theory of L systems has been most significant.

Early in the year, our North American forests come to life as native wildflowers start to push up through patches of snow. With longer days and sunlight streaming down through bare branches of towering trees, life on the forest floor awakens from its winter sleep. Plants such as green dragon, squirrel corn, and bloodroot interact with their pollinators and seed dispersers and rush to create new life before the trees above leaf out and block the sun's rays. Wake Up, Woods showcases the splendor of our warming forests and offers clues to nature's annual springtime floral show as we walk in our parks and wilderness areas, or even in shade gardens around our homes. Readers of Wake Up, Woods will see that Gillian Harris, Michael Homoya and Shane Gibson, through illustrations and text, present a captivating look into our forests' biodiversity, showing how species depend on plants for food and help assure plant reproduction. This book celebrates some of nature's most fascinating moments that happen in forests where we live and play.

REVIEW OF VUKA XL110 REPAIR MANUAL

- In 1939, three young people meet on an archeological dig in Egypt. The world seems like a fine place for Rachel Stern, Johann "Jack" Halder, and Harry Weaver as the two males amiably compete for the attention of their female companion.Four years later, their idyllic time together seems like a distant dream. The three of them have been impacted by the war in separate ways. However, they are about to reunite in Egypt as Hitler has set up a plot to kill Roosevelt and Churchill. Halder and Rachel have been blackmailed to implement the assassination. Harry is the person assigned to eliminate the enemy before they even attempt to achieve their objective.THE SANDS OF SAKKARA is a non-stop World War II thriller that will prove much enjoyment to fans of the sub-genre. The story line uses authentic events, which enhance the speed of a novel that fills the desert with blood. Though the trio of lead protagonists never seems quite real, the audience will root for them as they remain intrepid and loyal in spite of overwhelming odds against their success. With this tale and others like SNOW WOLF, Glenn Meade is quickly attaining a reputation for his historical thrillers.Harriet Klausner

- I thought this would be an Independence Day in the 1940's. At first, the battle scenes are amazingly written, but Turtledove sinks the book with characters that have no real purpose and have meaningless conversations. A pity that a book that is very well written, is killed by dull characters and endless conversations.
