This open access volume is the first comprehensive assessment of the Hindu Kush Himalaya (HKH) region. It comprises important scientific research on the social, economic, and environmental pillars of sustainable mountain development and will serve as a basis for evidence-based decision-making to safeguard the environment and advance people's well-being. The compiled content is based on the collective knowledge of over 300 leading researchers, experts and policymakers, brought together by the Hindu Kush Himalayan Monitoring and Assessment Programme (HIMAP) under the coordination of the International Centre for Integrated Mountain Development (ICIMOD). This assessment was conducted between 2013 and 2017 as the first of a series of monitoring and assessment reports, under the guidance of the HIMAP Steering Committee: Eklabya Sharma (ICIMOD), Atiq Raman (Bangladesh), Yuba Raj Khatriwada (Nepal), Linxiu Zhang (China), Surendra Pratap Singh (India), Tandong Yao (China) and David Molden (ICIMOD and Chair of the HIMAP SC). This First HKH Assessment Report consists of 16 chapters, which comprehensively assess the current state of knowledge of the HKH region, increase the understanding of various drivers of change and their impacts, address critical data gaps and develop a set of evidence-based and actionable policy solutions and recommendations. These are linked to nine mountain priorities for the mountains and people of the HKH consistent with the Sustainable Development Goals. This book is a must-read for policy makers, academics and students interested in this important region and an essentially important resource for contributors to global assessments such as the IPCC reports.

As with many spheres of public life, public diplomatic communication is being transformed by the boom of social media. More than 165 foreign governmental organisations in China have embarked on the use of Weibo (a hybrid of Facebook and Twitter in China) to engage with Chinese citizens and reach out to youth populations, one of the major goals of current public diplomacy efforts. This exciting new pivot, based on systemic research of Weibo usage by embassies in China, explores the challenges and the limits that the use of Chinese Weibo (and Chinese social media in general) poses for foreign embassies, and considers ways to use these or other tools. It offers a systematic study of the effectiveness and challenges of using Weibo for public diplomatic communication in and with China. Addressing the challenges of e-diplomacy, it considers notably the occurrence of cyber-nationalism on Weibo and encourages a critical look at its practice, arguing how it can contribute to the goals of public diplomacy.

This book joins an international and interdisciplinary group of leading experts on the biomedical, energy and environmental applications of Metal-Organic Frameworks (MOFs). The resulting overview covers everything from the environmentally friendly and scale up synthesis of MOFs, their application in green energy generation and storage, and water purification to their use as drug delivery systems, biosensors, and their association with relevant macromolecules (genes, enzymes). This book is focused on the interest of MOFs in applications such as the leading -edge environmental (energy-related) and biomedical fields. The potential of MOFs in these areas is currently progressing at a fast pace, since the wide possibilities that MOFs offer in terms of composition, topology, incorporation of active species (in their porosity, on their external surface or within the framework), and post-synthetic modifications, among others. The aim here is to provide future research goals that emphasize relevant nuances to this class of materials as a whole.

Children are already learning at birth, and they develop and learn at a rapid pace in their early years. This provides a critical foundation for lifelong progress, and the adults who provide for the care and the education of young children bear a great responsibility for their health, development, and learning. Despite the fact that they share the same objective - to nurture young children and secure their future success - the various practitioners who contribute to the care and the education of children from birth through age 8 are not acknowledged as a workforce unified by the common knowledge and competencies needed to do their jobs well. Transforming the Workforce for Children Birth Through Age 8 explores the science of child development, particularly looking at implications for the professionals who work with children. This report examines the current capacities and practices of the workforce, the settings in which they work, the policies and infrastructure that set qualifications and provide professional learning, and the government agencies and other funders who support and oversee these systems. This book then makes recommendations to improve the quality of professional practice and the practice environment for care and education professionals. These detailed recommendations create a blueprint for action that builds on a unifying foundation of child development and early learning, shared knowledge and competencies for care and education professionals, and principles for effective professional learning. Young children thrive and learn best when they have secure, positive relationships with adults who are knowledgeable about how to support their development and learning and are responsive to their individual progress. Transforming the Workforce for Children Birth Through Age 8 offers guidance on system changes to improve the quality of professional practice, specific actions to improve professional learning systems and workforce development, and research to continue to build the knowledge base in ways that will directly advance and inform future actions. The recommendations of this book provide an opportunity to improve the quality of the care and the education that children receive, and ultimately improve outcomes for children.

REVIEW OF N2 BUILDING SCIENCE PAPER 2013

- No seré yo quien quite la ilusión de quien necesite de otra vida para llevar mejor la presente. Pero analizado con sentido crítico, este libro presenta numerosos signos de ser totalmente inventado:- Alondra, la primera reencarnación, afirma estar en el año 1863 antes de Cristo. ¿Desde cuando el CALENDARIO CRISTIANO SE UTILIZÓ ANTES DE NACER CRISTO? Y dejando aparte este pequeño detalle, ¿cómo Catherine -la persona que supuestamente Weiss estudió- puede llegar a saber el año al instante? ¿realmente se piensa Weiss que la humanidad ha tenido siempre tan presente el AÑO en el que vivía? - otra cosa son las estaciones dentro de un periodo anual- . Decir la fecha parece sencillamente a un recurso narrativo para impresionar al lector, pero que no tiene ningun sentido en el caso acontecido.- El libro cae en tópicos que en una novela serían incluso detalles "malos". Por ejemplo, ¿por qué la vida que Catherine vivió a mediados de siglo XX ha de ser, precisamente, piloto de guerra alemán? ¿Por qué no era campesino en la India, o habitante de Brasil, o cualquiera de los millones de europeos que no tuvieron nada que ver con la guerra mundial? Es un detalle que le quita veracidad a la narración!- La teoría de que las almas viajan en grupo es absurda. La población mundial, hace 30 años, era la mitad que la de ahora. Por tanto, estadísticamente es imposible que las almas viajen en grupos sencillamente por que hace 30 años existían la mitad de las personas. Lo mismo se puede decir de las típicas encarnaciones en la civilización egipcia: Egipto tenía varios miles de veces menos población que el mundo actual, por lo que sería difícilísimo encontrar un reencarnado que hubiese vivido en Egipto!! En cambio, Weiss parece haber encontrado uno a la primera!!- Weiss se plantea pero inmediatamente descarta la posibilidad de si la memoria es heredada. ¡¡El simplemente hecho de plantearse tal aberración muestra que no tiene ni idea de, ni cómo funciona la memoria, ni cómo funciona la herencia!! Aparte...las vidas pasadas NO son de hijos o nietos... Por tanto, no podría tener nada que ver con la herencia!- El calendario cristiano, actualmente, es seguido por 1/5 de la población mundial. Por tanto, estadísticamente de nuevo, sólo un quinto de las vidas pasadas podrían haber expresado las fechas en este calendario. En cambio, TODAS las encarnaciones que son capaces de expresar la fecha lo hacen en este calendario. Hay mas detalles que hacen dudar muchísimo de la veracidad de lo que cuenta Weiss. En numerosas ocasiones es traicionado por su falta de visión del mundo, de lo que es y de lo que fué. Tampoco fué el primero en hablar de regresiones mediante hipnosis: a principios de siglo era una práctica de moda en círculos esotéricos.Lo siento, pero si por un remoto casual existiesen vidas pasadas, creo que Weiss puede aportar al asunto menos que yo: yo no puedo aportar nada, pero él sólo confusión.

- Literally broke the first time I used them. I bought two, thinking that they were cheap and probably more prone to breaking. But I certainly didn't expect each of them to fail after ONE use. Pathetic. Don't waste your time and money on these incredibly low-quality items.
