DIV In her entertaining and edifying New York Times bestseller, acclaimed author Francine Prose invites you to sit by her side and take a guided tour of the tools and tricks of the masters to discover why their work has endured. Written with passion, humour and wisdom, Reading Like a Writer will inspire readers to return to literature with a fresh eye and an eager heart - to take pleasure in the long and magnificent sentences of Philip Roth and the breathtaking paragraphs of Isaac Babel; to look to John le Carré for a lesson in how to advance plot through dialogue and to Flannery O'Connor for the cunning use of the telling detail; to be inspired by Emily Brontë's structural nuance and Charles Dickens's deceptively simple narrative techniques. The American Pageant Anchor

Krakauer's page-turning bestseller explores a famed missing person mystery while unraveling the larger riddles it holds: the profound pull of the American wilderness on our imagination; the allure of high-risk activities to young men of a certain cast of mind; the complex, charged bond between fathers and sons. "Terrifying... Eloquent... A heart-rending drama of human yearning." —New York Times In April 1992 a young man from a well-to-do family hitchhiked to Alaska and walked alone into the wilderness north of Mt. McKinley. He had given \$25,000 in savings to charity, abandoned his car and most of his possessions, burned all the cash in his wallet, and invented a new life for himself. Four months later, his decomposed body was found by a moose hunter. How Christopher Johnson McCandless came to die is the unforgettable story of *Into the Wild*. Immediately after graduating from college in 1991, McCandless had roamed through the West and Southwest on a vision quest like those made by his heroes Jack London and John Muir. In the Mojave Desert he abandoned his car, stripped it of its license plates, and burned all of his cash. He would give himself a new name, Alexander Supertramp, and, unencumbered by money and belongings, he would be free to wallow in the raw, unfiltered experiences that nature presented. Craving a blank spot on the map, McCandless simply threw the maps away. Leaving behind his desperate parents and sister, he vanished into the wild. Jon Krakauer constructs a clarifying prism through which he reassembles the disquieting facts of McCandless's short life.

Admitting an interest that borders on obsession, he searches for the clues to the drives and desires that propelled McCandless. When McCandless's innocent mistakes turn out to be irreversible and fatal, he becomes the stuff of tabloid headlines and is dismissed for his naiveté, pretensions, and hubris. He is said to have had a death wish but wanting to die is a very different thing from being compelled to look over the edge. Krakauer brings McCandless's uncompromising pilgrimage out of the shadows, and the peril, adversity, and renunciation sought by this enigmatic young man are illuminated with a rare understanding—and not an ounce of sentimentality. Mesmerizing, heartbreaking, *Into the Wild* is a tour de force. The power and luminosity of Jon Krakauer's storytelling blaze through every page.

Written by one of the founders of modern political philosophy, Thomas Hobbes, during the English civil war, *Leviathan* is an influential work of nonfiction. Regarded as one of the earliest examples of the social contract theory, *Leviathan* has both historical and philosophical importance. Social contract theory prioritizes the state over the individual, claiming that individuals have consented to the surrender of some of their freedoms by participating in society. These surrendered freedoms help ensure that the government can be run easily. In exchange for their sacrifice, the individual is protected and given a place in a steady social order. Articulating this theory, Hobbes argues for a strong, undivided government ruled by an absolute sovereign. To support his argument, Hobbes includes topics of religion, human nature and taxation. Separated into four sections, Hobbes claims his theory to be the resolution of the civil war that raged on as he wrote, creating chaos and taking casualties. The first section, *Of Man* discusses the role human nature and instinct plays in the formation of government. The second section, *Of Commonwealth* explains the definition, implications, types, and rules of succession in a commonwealth government. *Of a Christian Commonwealth* imagines the religion's role government and societal moral standards. Finally, Hobbes closes his argument with *Of the Kingdom of Darkness*. Through the use of philosophical theory and historical study, Thomas Hobbes attempts to convince citizens to consider the cost and reward of being governed. Without an understanding of the sociopolitical theories that keep government bodies in power, subjects can easily become complicit or allow society to slip into anarchy. Created during a brutal civil war, Hobbes hoped to educate and persuade his peers. Though *Leviathan* was a work of controversy in its time, Hobbes' theories and prose has survived centuries, shaping the ideas of modern philosophy. This edition of *Leviathan* by Thomas Hobbes is now presented with a stunning new cover design and is printed in an easy-to-read font. With these accommodations, *Leviathan* is accessible and applicable to contemporary readers.

REVIEW OF CHAPTER 14 GUIDED READING AP BIOLOGY ANSWERS UHORAK

- First off, I'd like to agree with the first reviewer. This is an excellent compilation that stands by itself (although, for an intro class, it definitely requires a "discipline-oriented" text book like Kottak as a guiding force). I would recommend this book highly to my fellow anthros and to general readers alike. What follows is a brief summary of some of my favorite articles in the collection. The selections are all short and well-written, they make interesting and useful points and convey the complexity and utility of anthropology very, very well. I've been waiting a long time to see Peggy McIntosh's wonderful essay on "White Privilege" in print somewhere. I had the distinct pleasure of hearing her give an oral version of the same talk a number of years ago and am very very pleased to see it published here for the benefit of students. The book is worth the price for that article alone. However, this is not the only gem in this collection. Phillippe Bourgois' work on crack dealers is introduced here as is Gerald Murray's work on wood farming as a means to encourage re-forestation programs in Haiti. There are also classics such as Richard Lee's story of the !Kung San insulting of his gift of a Christmas ox ("Eating Christmas in the Kalahari") and Laura Bohannon's failure to get Tiv elders to see Hamlet as a story about incest, revenge and justice. Jared Diamond's revisionist

view of the advent of agriculture is also here (perhaps an antidote for his more recent "Guns, Germs and Steel" though undoubtedly similar in style). Other personal favorites of mine include Eugene Cooper's discussion of Chinese table manners (also a must for people who want to teach a course on the anthropology of food), Richard Reed's examination of the tension between environmentalists and indigenous communities in Paraguay, Joan Cassels' excellent analysis of surgery as a male-gendered medical speciality and Paul Farmer's and Arthur Kleinman's thoughtful peice on suffering and AIDS in Haiti. Incidentally, I would thoroughly recommend anything by Paul Farmer to readers interested in social medicine. His scholarship and humanity are both quite phenomenal and totally justify the attention he has recieved due to the MacArthur fellowship. I only have a couple of quibbles with this book and even these are not so much criticisms as comments for the unwary: Jennifer Laab's peice on corporate anthropologists seems to have been written for a corporate audience as a selling point for anthropology. As such it plays up the notion of anthropologists as service providers for corporate interests in a way which is a little frown-inducing for an academician such as myself. Not because I don't approve of anthropology in the private sector, but because the peice itself seems to argue that anthropology is merely a set of techniques that can be workshopped (like team-building exercises) to busy executives for the greater good of the company. Again, this is a VERY worthwhile point to debate, but not one that easily stands without comment. Secondly, the article by Wade Davis (he of "Serpent and the Rainbow" fame), while again discussion-worthy, seems a little superficial, dated in language and probably replaceable (Robert Voeks' recently-published "Sacred Leaves of Candomble" is one alternative that springs to mind). Lastly, I would like to plead for the inclusion of a selection on tatooing or bodily adornment of some sort in any future editions. This is a topic of enduring interest among students and would definitely be an asset to such a nicely-balanced and valuable collection.

- I'm sorry but referencing Rumi? I don't think you ever even read it. Judging from the interpretation that this silly Aesop fable has anything at all to do with of - The Mouse and The Frog, Rumi's Mathnawi, the author completely misses the point and takes a very lazy view of the meaning of this great poetic work. The Mouse and The Frog is a powerful LOVE STORY not a tale of ~revenge presented by this author. READ THE ORIGINALS YOURSELVES, PEOPLE!
