## REVIEW OF CAMBRIDGE CHECKPOINT MATHS REVISION GUIDE FOR THE

- Laurie Ulrich has written a thoughtful introduction to web design. This book covers the most popular methods of creating websites (Dreamweaver, GoLive, Frontpage, and hand-coding HTML) and helps you evaluate which might be best for you. It goes on to help you understand some of the basic ways each can accomplish specific tasks. Without going into extraneous details (which would require several books to cover), Ms. Ulrich gives a broad and lucid overview of how to make sense of these programs to create well-conceived website design. This is actually her strong point in this book - the conception of how to create the kind of website which will best express and realize the goal you desire. She helps you visualize (with the help of many good examples) what might or might not work for you, and how to evaluate it for yourself. After having read the excellent "Dreamweaver 4 -Virtual Classroom" which she co-authored with Robert Fuller, and several other Dreamweaver books, I had some of the technical abilities to create cool stuff. However I hadn't had any overview of design, and felt a little overwhelmed by the possibilities. "Web Design - Virtual Classroom" cleared a lot up for me, and I now feel a lot more confident about being able to create sites that won't look like a Jackson Pollock hangover.

- Leonard Ravenhill pulls no punches in this revival classic. He calls things as they are and challenges the reader to seek God with their whole heart and to deal with their sin in their life. He challenges ministers to be a voice no longer an echo. I loved this book and would recommend it to anyone.
