Transport World Old Pond Publishing

"As a reference book it has to be classed as one of the best! There should be a copy of it in every college library." Association of Motor Vehicle Teachers' Newsletter The Motor Vehicle has been an essential reference work for both the student and practising engineer ever since the first edition appeared in 1929. Today it is as indispensable to anyone with a serious interest in vehicle design techniques, systems and construction as it was then. The current edition has undergone a major revision to include seven new chapters. These include Electric Propulsion; covering all aspects from lead acid and alternative batteries to fuel cells and hybrid vehicles, Static and Dynamic Safety, and Wheels and Tyres. The chapter on the compression ignition engine has been expanded to form three chapters, concentrating on aspects such as common rail injection, recently developed distributor type pumps and electronic control of injection. Automatic, semi-automatic and continuously variable ratio transmissions are covered in two new chapters. A third contains information on the latest developments in computer-aided control over both braking and traction, for improving vehicle stability, while another contains entirely new information on the practice and principles of electrically-actuated power-assisted steering. Also included is coverage of material detailing the latest knowledge and practice relating to safety systems, vehicle integrity, braking systems and much more. The established layout of the book is retained, with topics relating to the Engine, Transmission and Carriage Unit dealt with in turn. Each chapter is well-provided with diagrams, sections, schematics and photographs, all of which contribute to a clear and concise

exposition of the material under discussion. Latest extensive revisions to a well-established title New chapters on electric propulsion and vehicle safety.

South African Mining & Engineering Journal Stationery Office/Tso

Anthony Clare starts with the preparatory work of 1943 and takes the story up to 1967, the era of the powerful 10/60 model - the machine that became known by many as the Rolls-Royce of tractors. He deals fully with development, production, models, sales, distribution, implements, after-sales service and testing. He has also unearthed a wealth of previously unseen photographs.

REVIEW OF LEYLAND 6 98 ENGINE

- The lovely watercolor illustrations of Horatio's Bed never descend into the realm of sap, although with stuffed animals, the potential is of course there. By treating the characters with the respect she does, Camilla Ashforth makes this book a delight for both the adult reader and the child audience. The basic plot is simple. Horatio, a small stuffed rabbit, needs a bed, and his friend James, a stuffed bear, is helping him to find one. This book is best for the under five crowd.

- THE BLUE LOTUS is much more than the sequel to CIGARS OF THE PHARAOH. This is the watershed from mere comic strip to outstanding cultural phenomenon. One can say it is the first graphic novel. In it, Tintin not only battles -and defeats- an opium ring in China, but Japanese militarism, Western imperialism, and most important, his own ignorance, prejudice, and comfort zone. Tintin -which is to say Hergé- would never be the same after that. Neither will comics. I've read this album countless times since my distant childhood. It never fails to entertain, surprise, and move me as if it was my first reading. It is not alone in my list of best Tintin adventures; it's just up front.
