Read the series that's sold more than 2 million copies--if you dare! Warning: this description has not been authorized by Pseudonymous Bosch. As much as he'd love to sing the praises of his book (he is very vain), he wouldn't want you to hear about his brave 11-year old heroes, Cass and Max-Ernest. Or about how a mysterious box of vials, the *Symphony of Smells*, sends them on the trail of a magician who has vanished under strange (and stinky) circumstances. And he certainly wouldn't want you to know about the hair-raising adventures that follow and the nefarious villains they face. You see, not only is the name of this book secret, the story inside is, too. For it concerns a secret. A Big Secret.

REVIEW OF GRANDPAS GREAT ESCAPE

- This is the best book ever! It teaches you everything you need to know and how to present your dog correctly. I highly recomend it to anyone who wish to know more about showing your dogs.

- This is an excellent study of this family of locomotives, and I found it surprisingly readable, despite the technical information discussed. It is excellently illustrated with many contemporary photographs.From the Preface -"The story of the Midland compounds, extending over nearly sixty years of British railway history, is not merely one of a single locomotive class, or groups of classes. In its origin, its development, its vicissitudes, and its triumph the Midland compound was, from the very outset, closely linked with other designs. It was involved probably in more competitive trials with very dissimilar engines than any other class, and in the story of these trials can be traced many of the principal trends in British locomotive practice. The compound principle, the introduction of superheating, the development of a more scientific approach to valve gear design, each in their turn received an important fillip from work centred upon the Midland compounds, while after the grouping of 1923 they formed for a time the focal point of the great controversy that raged over L.M.S.R. locomotive policy as a whole."The Contents are -P009: PrefaceP011: The Origin of the Smith Compound SystemP018: The Midland Smith-Johnson CompoundsP034: The Deely CompoundsP049: Comparisons and Tests: The Introduction of SuperheatingP062: L.M.S.R. and the First Leeds-Carlisle TrialsP076: Dynamometer Trials, Settle & Carlisle Line, 1924-25P089: The Preston-Carlisle Trials of 1925: Larger Compounds: Oil FiringP100: L.M.S.
