REVIEW OF COMPUTATIONAL RECREATIONS IN MATHEMATICA

- I love this book it's awesome. I think that This is one of her best books I own all 4 and I've read them all many times. I love how she mixes romance with drama and comedy. she's a senior at Ramsa high and shes an outsider and doesn't have any friends until alex comes to her school. Well I don't wan to ruin the bopok for anyone so just read the book you won't regrete it it's awesome!
- Ok I will give her a 1/2 star for an attempt because she is so young and she is published and I am not, but the editor needs to be fired. This book had characters coming out of the wood works. No explanation. No description. Alas, I do not fault the author it's the editor who needs a crash course writing. Also I am a 25 year old reader, the field wouldn't let me enter my real age.
