REVIEW OF UNIT 1 GEOMETRY BASICS MRDREEVES WEEBLY

- This book was in very good condition and I received it in a very timely manner.
- In this classic book, Betty Smith creates a world with such realistic characters and vivid scenes that it invites the reader in and doesn't let go until the final page. The main character is Francie, a young girl who is a romantic like her father and yet a realist like her mother. She loves to read and longs for an education so that she can overcome the squalid conditions in which she is growing up. She is a survivor and does whatever it takes to get along in her world while having a rich life on the inside which no one else knows about. Her father is an alcoholic who causes severe financial problems for his family but still shows Francie love in a way that her serious and responsible mother never can. Her younger brother Neely is her constant companion and she loves him despite the fact that her mother favors him over Francie. This book was written during the time that my mother was growing up and yet I can relate to many of the timeless scenes in it, such as the magical moments when Francie learns to read. This is a wonderful book that should be taken off the shelf every few years and re-read.
