REVIEW OF SOLAR PV ENGINEERING AND INSTALLATION PREPARATION FOR THE NABCEP PV INSTALLATION PROFESSIONAL CERTIFICATION

- Am I the only reader who found the prose ponderous, the dialogue stilted, and the whole thing badly in need of editing? I am amazed at the status this book has achieved, and doubly amazed that anyone would utter Salinger and Sittenfeld in the same breath. Read the prose out loud to yourself: are these long, wordy, rhythm-less sentences pleasing to the ear? Read the dialogue out

loud to yourself: does anyone really talk like that, and do we need to have every single tedious, expository word in every conversation? At the end of Chapter 2, where was an editor to cut out the second half of the last sentence? (We get it!) Really, why is such schlock getting such praise?

- I hope Curtis Sittenfeld never writes another long weak awful book like this one was. While it captures some of the flavor of attending a prep school, it also meanders on for nearly 400 pages never making a point and never cheering up - whole book needs a good drug and was a waste of time to read. Her point - the breakthrough message of the novel - appears

in the last 20 or so pages of the book: "If you feel like there are differences between you and other people, how much you want to play them up is really your decision." I'm also mad that she waited to introduce new information about the main character and her past until - again - the last 20 pages of the book. The character, Lee Fiora, seems to have a natural bent towards journalism - she asks herself interesting questions - and since even the reviewers seem confused whether there's any separation between the protagonist and the author, Ms. Sittenfeld might consider a career in journalism - her fiction doesn't move, progress, or grow - it lacks a plot - it

lacks a point.
