REVIEW OF ABNORMAL PSYCHOLOGY COMER 8TH EDITION STUDY GUIDE

- Wow, the Kindle version is selling for

\$15.99 but the used paperback is selling for like \$3.25, the new paperback for \$9.99. It's also free at your local library. The publisher sets the price. I like this book, but for \$15.99 it gets 1 star after adjusting for the value proposition.

- Back in the '80s, a TV commercial for a bath-water softener named Calgon featured a harassed, stressed-out woman. She says, "Calgon, take me away," and is then transported to a bathtub surrounded by a calming, misty forest. When I face stresses I wish to escape, I don't use Calgon. I read *The Lord of the Rings* (J.R.R. Tolkien), *The Dark Tower* series (Stephen King), or *Dune*. This time I chose *Dune*. These three writers have created complete alternative worlds in which I can escape. The characters face seemingly unsolvable problems, but they keep on keeping on and they prevail. Luckily, I have the ability to lose myself in a well-told story, so these three, in particular, can "take me away." *Dune* is the story of a feudal society of the future, when humans have spread to many planets. The Atreides House has been given control of Arrakis, a desert planet also known as *Dune*, which alone supplies "spice," a substance that has geriatric

qualities and also allows the pilots of the Spacing Guild to navigate from planet to planet. Treachery awaits them, and the Duke Leto Atreides is killed, but his 15-year-old son Paul and his concubine Jessica escape into the desert. There they must face the dangers of the environment, of the natives of the planet, and of the worms, giant (really, really giant) sandworms, who devour everything that they sense. Herbert has included every aspect of his created world in this book--the language patterns, the politics, the mythology, the religion, the life-style, the environment. His treatment of the science of desert ecology is apparently accurate (so I have read). Mysticism and mind-enhancing drugs also enter in, which may be one reason this book was so popular in the late '60s. This world is so clearly delineated that I would recognize it immediately if I ever found myself there. The plot here is intricate and not easily anticipated; the politics are also intricate; the characters are somewhat archetypal, but that is fitting. Suffice it to say, if you have the kind of mind that can suspend disbelief and escape from reality, you should read *Dune* and at least two of its sequels. If you have not read them already.
