#### REVIEW OF CRUISE THE DANUBE TO VIENNA BUDAPEST 2018 THE RIVER

- This is my very favorite popular science book. Professor Kaku is an excellent and entertaining writer and he brought a made a very complex subject penetrable by non-physicists. I never tried to read about string theory because I figured there were no easy ways to learn about it. Then I stumbled upon this book accidentally at the library and had one of those marvelous "AHA!" moments that I haven't really had since I was in school. Thank you, Professor!

- This is the second in the Dave Robicheaux series. I am trying to read them in order. Dave has quit the New Orleans police department and is running a fishing camp. He is married and very happy. Then a plane crash, and one of the bodies disappears. Dave is drawn back into the underworld he knows so well. This time he really pays for his involvement. Won't say how because it would take away from the reading. He goes at it with Bubba Rocque, a man he grew up with and has known for years. Bubba in one of the bad guys now. But, is it Bubba or his wife that is the worse. Burke writes so you can feel like you are there. You can see the people fishing and moving through the darkness. Except for his flashbacks I would give it a 5 rating but I don't care for those. A good book that will

hold you attention.
