Hello, Is This Planet Earth? Earth and SpacePhotographs from the Archives of NASA

In You Are Here, celebrated astronaut Chris Hadfield gives us the really big picture: this is our home, as seen from space. The millions of us who followed Hadfield's news-making Twitter feed from the International Space Station thought we knew what we were looking at when we first saw his photos. But we may have caught the beauty and missed the full meaning. Now, through photographs - many of which have never been shared - Hadfield unveils a fresh and insightful look at our planet. He sees astonishing detail and importance in these images, not just because he's spent months in space but because his in-depth

knowledge of geology, geography and meteorology allows him to reveal the photos' mysteries. Featuring Hadfield's favourite images, *You Are Here* is divided by continent and represents one (idealized) orbit of the ISS. Surprising, thought-provoking and visually delightful, it opens a singular window on our planet, using remarkable photographs to illuminate the history and consequences of human settlement, the magnificence of never-before-noticed landscapes, and the power of the natural forces shaping our world and the future of our species.

Overview Yard Dog Press

Unseen images of the International Space Station, untenanted and eerie: the legacy of humanity's fragile foothold in space On November 2 2020, NASA celebrates the 20th anniversary of continuous human habitation in space of the International Space Station. In *Interior Space*, American photographer Roland Miller and Italian astronaut and photographer Paolo Nespoli offer an in-depth portrait of the ISS, creating amazing unpeopled images of the interior of the ISS for the first time. As internationally acclaimed scholars of space archaeology Alice Gorman and Justin St. P. Walsh write in their essays, the ISS speaks not only of who we are and will be, but also of who we were. In 2024 the ISS will be abandoned; in 2028 it will be destroyed. This book provides us with an eerie account of what will remain in the space after our passing. Italian-born astronaut Paolo Nespoli (born 1957) spent 313 days in space. After a career in the military, he earned a M.Sc. in Aerospace Engineering, then joined the European Space Agency spending time in Europe, the US and Russia. In 2007 he flew on the Space Shuttle and then, in 2010 to 2011 and 2017, he

flew again to the International Space Station with the Russian Soyuz. He retired in 2018 from the astronaut corps launching a career as an international public speaker. Chicago-born photographer Roland Miller (born 1958) taught photography at Brevard Community College in Cocoa, Florida, for 14 years, where he visited many nearby NASA launch sites. He is the author of the acclaimed book *Abandoned in Place: Preserving America's Space History*, documenting deactivated and repurposed space launch and test facilities around the US. In 2017 he started the project *Interior Space*. His work is held at the Museum of Contemporary Photography, Chicago and at the NASA Art Collection in Washington, DC.

Takes readers on a journey to bear witness to the environmental destruction that is currently plaguing the planet. From forests devastated by mountaintop removal mining to regions left in ruins by the phosphate mining industry, J. Henry Fair presents hard evidence that society's unchecked consumerism is leading the way in the destruction of the planet, one natural resource at a time. Beneath the surfaces of abstracted images lurk horrific realisations of global destruction. This is a call to arms, brought to life through beautifully tragic imagery.

"Might be just the book to bring out your inner astronomer . . . over 250 pages of breathtaking images from the past 50 years of NASA's space exploration." —Parade Preface by Bill Nye This magnificent volume offers a rich visual tour of the planets in our solar system. More than two-hundred breathtaking photographs from the archives of NASA are paired with extended captions detailing the science behind some of our cosmic neighborhood's

most extraordinary phenomena. Images of newly discovered areas of Jupiter, fiery volcanoes on Venus, and many more reveal the astronomical marvels of space in engrossing detail. Anyone with an interest in science, astronomy, and the mysteries of the universe will delight in this awe-inspiring guide to the wonders of the solar system. "As you turn through the pages, you're hit with true moments of awe, photos that remind you the power of nature extends beyond our own planet." —Houston Chronicle "Breathtaking pictures show the otherworldly magic of the solar system . . . The images are at once humbling and uplifting: Here in the black void of space is Saturn's frozen moon, Mimas, white and pitted like a galactic golf ball; here is the tiny golden orb called Io, casting a shadow in a perfect inky circle on the marbled surface of Jupiter; here is the great sun, flames spurting from its surface like plumes." —The Wall Street Journal "[A] gorgeous photographic tour of space . . . The collection is a remarkable reminder of how much has been learned about the planets over the past few decades, solving many mysteries yet introducing many more." —Publishers Weekly

Around the World in 92 Minutes: Photographs from the International Space Station powerHouse Books

The Earth is in ruins. Cities and nations destroyed. Mankind is extinct. Brant and Arsha are synthetics, machines made in the image of people. They dream of bringing humans back into the world and have the technology to succeed, but the obstacles in their way are mounting. Not only are their own conflicting ideals creating a rift between them, but now the sinister Marauders are closing in as they seek revenge on Brant. Out in the wasteland,

strange lights and mysterious objects in the sky herald the arrival of new factions that seek to control the region. Even in the once quiet streets of their own city, malevolent forces are beginning to unfurl that threaten the sanctity of everything they hold dear, jeopardising the future that is within their grasp. Earth From Space: A Visual Tour is a book with a collection of over 180 gorgeous images compiled from instrument data of NASA and their world-class collaborators. Some of these instruments are sensitive to the visual range of the electromagnetic spectrum. Other instruments record other wavelengths such as ultraviolet and infrared. Colors are assigned to portions of data to make images that portray our Earth with visual imagery. Details of the Earth from above show forest fires, floods, hurricanes, parks, cloud formations, the great cities of the world, sleepy backwaters, reefs, oceans, glaciers, snow capped mountains, archaeological sites, and transportation highways. Our understanding is transformed as we can truly see events like

algae blooms, carbon emissions, crop health, volcanic eruptions, and more. The images in this book are beautiful and genuinely artful. Images of Earth from space are shaping our current ideas, beliefs, and perspectives and pointing the way to our future.

Back Home Createspace Independent Publishing Platform

Human civilizations' longest lasting artifacts are not the great Pyramids of Giza, nor the cave paintings at Lascaux, but the communications satellites that circle our planet. In a stationary orbit above the equator, the satellites that broadcast our TV signals, route our phone calls, and process our credit card transactions experience no atmospheric drag. Their inert hulls will continue to drift around Earth until the Sun expands into a red giant and engulfs them about 4.5 billion years from now. The Last Pictures, co-published by Creative Time Books, is rooted in the premise that these communications satellites will ultimately become the cultural and material ruins of the late 20th and early 21st centuries, far outlasting anything else humans have created. Inspired in part by ancient cave paintings, nuclear waste warning signs, and Carl Sagan's Golden Records of the 1970s, artist/geographer Trevor Paglen has developed a collection of one hundred images that will be etched onto an ultra-archival, golden silicon disc. The disc, commissioned by Creative Time, will then be sent into orbit onboard the Echostar XVI satellite in September 2012, as both a time capsule and a message to the future. The selection of 100 images, which are the centerpiece of the book, was influenced by four years of interviews with leading scientists, philosophers, anthropologists, and artists about the contradictions that characterize contemporary civilizations.

Consequently, The Last Pictures engages some of the most profound questions of the human experience, provoking discourse about communication, deep time, and the economic, environmental, and social uncertainties that define our historical moment. Copub: Creative Time Books

Keep in mind, reading testimonials can help you make notified choices regarding what to read following and can expose you to brand-new writers and styles you could not have actually considered previously.

REVIEW OF IMAGES OF EARTH ON THE VOYAGER GOLDEN RECORD YOUTUBE

- You'd expect a book with the title "Graphic Design Manual" to be comprehensive, covering all the fundamentals of graphic design. This book falls far, far short of being a complete guide to graphic design. To give you an idea of how short, the book has a dozen pages of text. That's it. I know graphic designers are fond of pictures but 12 pages of text out of 172 for a manual? (I'm reviewing my copy which is the 1965 edition.) That said, this *is* a good book on design. The little text that there is is informative and the graphics nicely illustrate and extend the text. Much of content of the book has to be generated by the reader himself, as he reads the brief introductory text and then studies the

examples. Hofmann's approach is logical and hierarchical. He starts off with the basics and illustrates each with a simple series of graphics. Then over the course of a few pages the examples get progressively more complex but still depend upon and illustrate the point/s being discussed. I highly recommend this book to someone who wants to learn or refresh their grasp of the fundamentals of design. Hofmann is a master and the graphics he has chosen for this book are compelling and informative. This book is probably beyond the novice level as it is so compressed, with very little discussion of each point but a lot of examples. A beginner will be hard pressed to follow the development of examples without some more guidance as to what he is looking at and how the more complex graphics relate to the original point. But still, you will learn a lot from this book, especially if you return to it later in your design education. In short, despite its title this book does not cover graphic design, it covers the elements of design, things such as the dot, the line, text and illustration and the interplay between these elements. You will not find any discussion of important principles such as hierarchy, alignment, grids, layout, color (in fact all graphics are black and white). This is however a valuable book that deserves careful study and will teach you a lot about the fundamentals of design.

- Another great one from Sloane Tanen. Same chicks, different day! You'll love this one too!
